Report of the Board of Directors and Management

The Report of the Board of Directors and Management was prepared in accordance with the Reporting to the Public Directives of the Banking Supervision Department. The principles applied to the preparation of the interim financial statements are consistent with those applied to the Annual financial statements as at December 31, 2022, except as outlined in Note 1 to the financial statements. The statements herein should be read in conjunction with the 2022 Annual Financial Statements.

Main Developments in the Israeli Economy[1]

The Global Economy

On July 25, 2023, the International Monetary Fund (IMF) revised its global growth forecasts for 2023. Compared with the prior forecast from April 2023, there was no significant change in the IMF's global growth forecasts. Although the growth forecasts were revised upwards slightly, they remained low. The IMF anticipates a slowdown in the rate of expansion of global activity during 2023. The forecast reflects the moderating effect on growth of the process of raising interest rates among most central banks around the world, which was done in order to deal with the accelerated inflation, as well as the continued negative effects of the war between Russia and Ukraine. In addition, the IMF referred to the fact that a number of banks around the world (the US, Switzerland) had experienced significant difficulties in the first half of 2023, to the point of collapse, with authorities intervening in order to stabilize the markets. However, at present, these appear to be specific events rather than a systemic event. In addition, the latest assessments of the IMF include reference to the downward trend in the general inflation in many countries during the reporting period; however, the core inflation (excluding food and energy) remains high.

According to the current growth forecasts, the gross world product is expected to grow at a rate of 3.0 percent in 2023. As for the major western economies - the US economy is expected to grow by 1.8 percent (a 0.2 percentage point increase compared to the April 2023 forecast), with the Eurozone at 0.9 percent, a forecast reflecting a 0.1 percentage point increase. As for the Israeli economy, the IMF anticipates growth of 2.5 percent in 2023.

Global growth/real change rate

Source: IMF - World Economic Outlook/July 2023

	2023	2022
World	**3.0%**	3.5%
USA	**1.8%**	2.1%
Eurozone	**0.9%**	3.5%
Japan	**1.4%**	1.0%
UK	**0.4%**	4.1%
China	**5.2%**	3.0%

Inflation rose in 2022 in many countries - to rates unseen for many years - partially due to excess aggregate demand, on the back of economic recovery following the coronavirus pandemic and with government support, and due to restrictions, which exacerbated the situation on the supply side and included significant effects of the war between Russia and Ukraine on commodity prices. During the second half of 2022, with the reduced effect of the factors mentioned, and against the backdrop of the worldwide contractionary monetary process, inflation began to moderate, a process which also continued during the first half of 2023. In the United States, the annual price increase rate was 3.0 percent in June 2023, compared to 6.5 percent in December 2022 and 9.1 percent in June of last year. In the Eurozone, inflation reached a peak of 10.6 percent in October 2022, and in June 2023 was 5.5 percent, and in the UK, inflation was

[1] Data sources: publications by the Central Bureau of Statistics, Bank of Israel, Ministry of Finance, Tel Aviv Stock Exchange, the IMF.

7.9 percent in June 2023 after reaching a peak of 11.1 percent in October 2022. On the other hand, the core inflation rate (excluding food and energy) declined more moderately in the United States, and in the Eurozone and in the UK, it is higher compared to the fourth quarter of 2022.

Multiple central banks continued the interest raising process. The US Federal Reserve temporarily halted the process at its June 2023 meeting, after ten consecutive meetings at which it decided to raise the interest rate, but once again raised the interest rate at its July meeting. Starting in March 2022, the Federal Reserve's Open Market Committee decided, as it did in each subsequent meeting until May 2023, to raise the short-term interest rate. In the May 2023 interest rate decision, the interest rate was raised by 0.25 percent, instead of increases of 0.50-0.75 percent at most of the previous meetings, due to which the interest rate rose to 5.00-5.25 percent. At the July 2023 meeting, it was decided to raise the interest rate by 0.25 percent to 5.25-5.50 percent. It should also be noted that on August 1, 2023, rating agency Fitch downgraded the rating of the United States from AAA to AA+ against the backdrop of the budget deficit.

The ECB continued the process of raising the interest rate, and in the decision of July 2023, the interest was raised by and additional 0.25 percent to 4.25 percent, and in August, the Bank of England raised the interest rate by an additional 0.25 percent to a level of 5.25 percent. This is also the case in many central banks, including the Bank of Israel, which began raising the interest rate in April 2022.

In late February 2022, a war broke out between Russia and Ukraine, which is continuing at this time. Due to the characteristics of the commercial relations between these countries and Israel, the direct effect on the Israeli economy may be limited to only a few industries which have production operations in Ukraine and Russia and/or which may have major customers in these countries. The indirect effects that are already materializing, as a result of global processes, such as lower global growth rates - as forecast by the IMF for 2023 as well - in addition to a sharp increase in the prices of commodities imported into Israel (such as food) and the sharp increase in energy prices around the world, which affect prices in Israel. However, it should be noted that the effects on prices have decreased considerably. In addition, the growing uncertainty is adversely affecting financial markets globally as well as asset values and - as a result – households and businesses in Israel.

Growth in the Israeli Economy

The Composite State-of-the-Economy Index, which is published by the Bank of Israel and serves as a monthly indicator of economic activity (publication of the Q2 growth data is expected after the closing of the financial statements) was up by 0.4 percent in the first half of the year. This is after a more rapid increase of approx. 1.9% in the first half last year.

The labor market continued to reflect robust economic activity, and according to the Bank of Israel, the labor market continues to be tight and is nearing full employment rates. The unemployment rate, under the ordinary definition (unemployed aged 15 or older), was 3.6 percent in June 2023, compared to a level of 4.2 percent in December 2022 and 3.4 percent in June 2022.

The Bank of Israel, in its July 10, 2023 forecast, estimated that the growth in 2023 is expected to amount to 3.0 percent, a rate that reflects a slight upward revision due to the effect of the data at the end of the first quarter. The Central Bank estimates that the GDP is expected to decline in the future to slightly below the long-term trend. The expected slowdown in growth is due to the expected moderation in world trade growth and to the increase in the real interest rate in Israel in the forecast period.

The State Budget and its Funding

In the first half of the year (January-June), the government's cumulative activity amounted to a budget surplus of NIS 6.7 billion, compared to a surplus of NIS 31.9 billion in the corresponding period in 2022. The decrease in the surplus stems from a decrease in state revenues, mainly from the collection of direct taxes and from an increase in expenses.

In May 2023, the 2023-2024 state budget was approved by the Knesset plenum.

Risk factor severity in the economy

During the first quarter of 2023, public legislative and social events began, for which there is uncertainty regarding the manner of their development and the degree of their impact on the Israeli economy in the mid- to long term, and as a result - on the Bank's results. As detailed, among other things, in the estimate published by the Bank of Israel's Research Department on April 3, 2023, which was re-emphasized in the Bank of Israel's estimate on July 10, 2023; the events are likely to have an adverse effect on the Israeli economy, and as a result, on the Bank's performance.

The Bank of Israel continues to emphasize that the main risk to the growth forecast is the materialization of a scenario in which legislative and institutional changes will be accompanied by an additional increase in the country's risk premium in addition to the continued devaluation of the NIS, damage to exports resulting from a decrease in Israel's attractiveness as a trade partner and a decrease in local investment and demand for private consumption.

On April 14, 2023, rating agency Moody's announced a change in the rating outlook of the State of Israel from positive to stable, while reiterating the rating at a level of A1. Moody's report noted that the change reflects assessments regarding the economic effects of the legislative and social public events in Israel.

In May 2023, S&P published a report on the credit rating of the State of Israel. The agency reiterated the credit rating and the rating outlook, at a level of AA- with a stable outlook. The report includes reference to the political, social and security risks that may affect the future rating outlook and/or credit rating.

Towards the end of July 2023, Moody's and S&P published special reports in response to the passing of the law to abolish the Rule of Reason, which emphasized the risks to the Israeli economy from continuing a unilateral legislative process. However, there was no change in Israel's rating and/or in its rating outlook.

At the beginning of August 2023, the Bank of Israel published the Financial Stability Report. In this Report, the vulnerability level of the exposure to the macroeconomic environment was raised from medium-low in the second half of 2022 to medium-high in the first half of 2023.

Foreign trade and service export data

Israel's trade deficit reached approx. USD 16 billion in the first half of the year, compared with approx. USD 21.4 billion in the corresponding period last year. The decrease in the deficit stems from the more rapid decline in imports compared to exports. The decline in imports stems mainly from a decrease in imports of raw materials and a more moderate decrease in the import group of consumer products. This is against the background of the decrease in commodities prices around the world in the first half of the year, alongside a weakening in global demand.

The service export data for the first five months of the year (January to May) indicate continued decline compared with the corresponding period last year. This is due to the decrease in exports of transportation services; on the other hand, exports of business services, most of which are in the high-tech industries, recorded a moderate increase.

Exchange Rate and Foreign Exchange Reserves

In the first six months of 2023, the shekel depreciated against the US dollar by 5.1 percent, and depreciated 7.1 percent against the euro; a 3.5 percent depreciation was recorded against the currency basket.

The Bank of Israel's announcement in July 2023, and in particular the Governor's statement with the publication of the interest rate decision, dealt with the devaluation of the NIS resulting from local developments, and in particular a considerable increase in social unrest and decline in the attractiveness of the Israeli economy and market. This excess devaluation contributed an additional 1.0-1.5 percent to inflation and, as long as the devaluation continues, it will result in an interest rate response from the Bank of Israel.

At the end of June 2023, the Bank of Israel's foreign exchange reserves stood at USD 201.9 billion compared to USD 194.2 billion as at the end of December 2022. The increase in balances is mainly explained by revaluation. In this period, the Bank of Israel did not intervene in the foreign exchange market.

Inflation and Monetary Policy

The "in lieu" consumer price index (CPI) was up 2.2 percent in the first half of 2023 and 4.2 percent in the 12 months ending in June 2023 - a deviation from the price stability target range (1-3 percent), but less than the peak recorded in January of 2023 (5.4 percent). The CPI, net of energy prices, was up 2.2 percent and 4.5 percent, respectively. The increase in the Consumer Price Index in the first half of the year was more moderate compared to the corresponding period last year - during which the CPI rose by 3.2 percent, and was led by the following items: transportation and communications, home furnishings and equipment and clothing and footwear. The continued deviation of the inflation from the target range reflects price rises in a significant part of the CPI items, with emphasis on the service components in the index, similar to the current situation in other western countries. The main explanations for the rapid rise in inflation are horizontal price adjustments to the increase in the inflationary environment and other factors whose impact has moderated to a considerable extent in recent months, which include: higher demand in the economy (some of which was pent up) due to the full reopening of, and improvement in, the labor market, which is reflected in wage increases in some market sectors, in addition to greater global trends of higher raw material and transport prices ("supply effects"), particularly in food and energy prices, on the back of the Russia-Ukraine war, but also due to bottlenecks in the supply chains across the world and particularly in China.

In the first half of 2023, the "known" CPI was up 2.5 percent.

In the second quarter of 2023, the Bank of Israel's interest rate was raised by 0.50 percent, standing at 4.75 percent at the end of the quarter, the highest level since the end of 2006.

In the Monetary Committee's decision on July 10, 2023, for the first time, following ten consecutive meetings in which the Bank of Israel raised the interest by a cumulative rate of 4.65 percent, the interest rate remained unchanged at a level of 4.75 percent. In this meeting, the Monetary Committee noted that the economic activity in the Israeli economy is at a high level and is accompanied by a tight labor market, although there is a certain moderation in several indicators. The inflation is still market-wide and at a high level. However, in recent months, inflation appears to be slowing down. Therefore, the Committee decided to leave the interest rate unchanged, but sees a considerable possibility of further increases in the interest rate in future decisions if the inflationary environment does not continue to moderate as expected. The interest rate trajectory is determined by the activity indicators and inflationary development, in order to continue to support the policy targets.

Israel's Capital Market

The Shares and Convertible Securities Index was down 0.9 percent in the first half of 2023, following a 15.5 percent decrease in 2022. The stock market was impacted in the reporting period by the effects of the inflation, which remained higher than the price stability target in Israel and in many countries in the developed world, which led to the continued process of interest rate increases by central banks around the world, including in Israel. In addition, the political uncertainty in Israel, against the backdrop of the public events - legislative and social, also appears to have contributed to the weakening of the stock market.

The average daily trade volume of shares and convertible securities in the first half of 2023 totaled approx. NIS 2.102 billion, a decrease of approx. 8.4 percent compared to the average level in 2022.

The CPI-Linked Government Bond Index was up 1.7 percent in the first half of 2023, while the Unlinked Government Bond Index was up 0.4 percent.

The CPI-linked non-government bond market (corporate bonds) rose in the first half of 2023 by 3.2 percent.

Condensed Financial Information and Key Performance Indicators

Further to Note 15.A to the financial statements as of December 31, 2022, regarding the merger agreement between Bank Leumi Corporation (hereinafter - “BLC”) and Valley National Bancorp (hereinafter - “Valley”). The comparative figures for the six months ended June 30, 2022 and for the year ended December 31, 2022 presented in this Report of the Board of Directors and Management include the results of Bank Leumi USA in the first quarter of 2022 in the various line items, unless expressly stated otherwise. As aforesaid, starting from the second quarter of 2022, the Bank records equity profits in respect of the investment in Valley.

For additional information, please see Note 16.A.

Forward-Looking Information in the Report of the Board of Directors and Management

The Report of the Board of Directors and Management includes, in addition to data relating to the past, information and assessments relating to the future, defined in the Securities Law, 1968 (hereinafter: the “Law”) as “Forward-Looking Information”. Forward-looking information relates to a future event or matter, the materialization of which is uncertain and not under the Bank's exclusive control.

Forward-looking information is generally worded using the following words or phrases: "the Bank believes", "the Bank foresees", "the Bank expects", "the Bank intends", "the Bank plans", "the Bank estimates", "the Bank's policy", "the Bank's plans", "the Bank's forecast", "expected", "strategy", “targets", "likely to impact", “estimate”, “scenarios”, “likely”, “may”, “can”, “will be”, “optimistic”, “pessimistic” and additional phrases indicating that the matter in question is a forecast of the future rather than past facts.

Forward-looking information included in the Report of the Board of Directors and Management is based, inter alia, on forecasts of various matters related to economic developments in Israel and abroad, especially the currency markets and capital markets, legislation, regulators’ directives, competitors’ behavior, technological developments and human resources issues.

As a result of the inability to foresee with certainty that these forecasts will be realized, and the fact that, in reality, events may differ from those forecasted, users should treat information defined as "forward-looking" with caution, since reliance on such information involves risks and uncertainty and the future financial and business results of the Leumi Group may be materially different.

The Bank does not undertake to publish updates on forward-looking information included in its reports. This does not derogate from the Bank's reporting obligations in accordance with any law.

Trends, Phenomena, Developments and Material Changes

Main Changes in the Reporting Period

Impairment of the investment in Valley's shares

On September 23, 2021, BLC, a US-incorporated corporation (85 percent of which is held by the Bank), which wholly owns BLUSA, entered into a merger agreement with Valley. On April 1, 2022, the merger transaction was completed.

As a result of the merger, a profit of approx. NIS 645 million, net of tax, was recorded in the first half of 2022. The Bank's investment in Valley is recorded in the financial statements according to the equity method.

For information on the transaction, please see the section entitled "Major Investee Companies" in the Report of the Board of Directors and Management for 2022.

In view of the significant decreases in the share prices of the banking segment in the United States in general and in mid-sized banks - including Valley in particular, the Bank examined, in the first quarter of 2023, the need to write down the value of the Valley shares recorded as an investment in the Bank's books. Therefore, in the first quarter of 2023, the Bank recorded an impairment of the value of the investment in Valley as at March 31, 2023 in the amount of approx. NIS 1.1 billion, after tax. The impairment loss was recorded to the income statement under the "Bank's share in associates' profits (losses)" item. The impairment was allocated in accordance with the fair value of net identifiable assets arising from the Bank's investment in Valley.

The reduction in the value did not have a significant effect on the Bank's regulatory capital adequacy.

For additional information, please see Note 16.A.

The Bank continues to consider Valley a long-term strategic investment, which serves as a significant layer in the Bank's overall strategy.

Shortly before the report's publication date, the market value of Valley's shares held by the Bank is NIS 2.6 billion.

Sale of Beit Lin

On March 28, 2023, the Bank (through a wholly owned subsidiary) entered into an agreement with JTLV 3 (Beit Lin) Limited Partnership (hereinafter - the "Acquirer") for the sale of 50 percent of its rights in an office tower at 35 and 37 Yehuda Halevy, Tel Aviv, known as "Beit Lin", which is currently used by the Bank (hereinafter - the "Asset") at a total asset value (100 percent) of NIS 650 million. The consideration to be paid to the Bank is NIS 325 million + VAT (hereinafter - the "Consideration", the "Sale Agreement"). At the same time, the parties entered into an agreement to regulate the cooperation in the property for its improvement.

If and to the extent that the transaction will be completed, the Bank is expected to record a profit (pre-tax) in the amount of NIS 265 million, which will be recorded in the financial statements that are expected to be published close to the date of the property's transfer, which is expected in the fourth quarter of 2023, upon completion of the transfer of the Bank's headquarters and main management units to Lod, or at a later date, by no later than March 24, 2024, at the Bank's discretion.

The information regarding the completion of the transaction, its effects on the Bank's financial statements and the date of vacating the property and the transfer of the main management and headquarters units is considered forward-looking information, which may not materialize in whole or in part or on the dates mentioned above, under circumstances beyond the Bank's control, including non-compliance with the Sale Agreement by the Acquirer or changes in the final data relevant to the calculation of the Bank's profit.

Material Changes in Financial Statement Items

During April 2022 and March 2023, the Bank entered into agreements to sell its two headquarters buildings in Tel Aviv. The two sales are expected to generate for the Bank a pre-tax capital gain of NIS 524 million and NIS 265 million, respectively; the capital gains will be recorded in the Bank's books immediately prior to the date of delivery of the property, which is expected in the last quarter of 2023 upon completion of the Bank's management's relocation to Lod, or at a later date, no later than March 24, 2024.

For more information, please see the section entitled "Main Changes in the Past Period" and Note 16.B.

During the first quarter of 2023, public legislative and social events began, for which there is uncertainty regarding the manner of their development and the degree of their impact on the Israeli economy in the mid- to long term, and as a result - on the Bank's results. The Bank of Israel continues to emphasize that the main risk to the growth forecast is the materialization of a scenario in which legislative and institutional changes will be accompanied by an additional increase in the country's risk premium in addition to the continued devaluation of the NIS, damage to exports resulting from a decrease in Israel's attractiveness as a trade partner and a decrease in local investment and demand for private consumption.

For more information, please see the section entitled "Main Developments in the Israeli Economy".

On April 16, 2023, the Bank signed a special collective agreement with the Workers' Union for 2023-2026.

For additional information, please see Note 8.A.

Below are the results for the second quarter of 2023:

Net income attributable to shareholders (hereinafter - "net income") in the six months ended June 30, 2023 (hereinafter - the "Reporting Period") amounted to NIS 3,434 million compared to profit of NIS 3,601 million in the corresponding period last year. Net income in the second quarter of 2023 amounted to NIS 2,453 million compared to NIS 1,992 million in the corresponding quarter last year.

The return on equity in the reporting period was 13.6 percent, compared to a rate of approx. 17.1 percent in the same period last year. Return on equity in the second quarter of 2023 was 19.4 percent compared to 18.5 percent in the corresponding quarter last year.

Net interest income in the reporting period totaled approx. NIS 8,212 million, compared to a total of approx. NIS 5,824 million in the corresponding period last year (excluding Bank Leumi USA's results), an increase of approx. 41 percent. The increase in interest income stems from growth in the credit portfolio, from increase in interest rates and from an increase in the deposit spreads. This increase was partly offset by the erosion of credit spreads. In the reporting period, the CPI was positive, at 2.5 percent, compared with a positive 3.1 percent in the corresponding period last year. The index in the second quarter of the year was 1.4 percent, compared with an index of 1.9 percent in the corresponding quarter last year.

Loan loss expenses in the reporting period reflect an expense rate of 0.36 percent of the average outstanding loans to the public compared to an expense rate of 0.04 percent in the corresponding period last year, excluding Bank Leumi USA's results. The expense in the reporting period stems mainly from the collective provision. The specific loan loss expense rate was 0.02 percent. The collective provision rate in respect of loan losses in the reporting period was 0.34 percent. The balance of loan loss provision rate for the credit balance as of June 30, 2023 was 1.32 percent.

Noninterest finance income in the reporting period totaled an income of NIS 508 million, compared to a total of NIS 682 million in the corresponding period last year, excluding Bank Leumi USA's results. The difference between the periods is due mainly to the profit recorded in the first half of 2022 in respect of the merger with Valley, which was partially offset by the effect of derivatives and exchange rate differentials.

Operating and other fees and commissions were up in the reporting period compared to the corresponding period last year, net of the results of Bank Leumi USA in the amount of NIS 84 million. Most of the increase is on the back of fees and commissions from exchange rate differentials, financing activities, and account management. The increase was partly offset by an decrease in fees and commissions on securities.

The operating and other expenses were up in the reporting period by NIS 35 million compared to the corresponding period last year, net of the results of Bank Leumi USA. The increase in expenses stems mainly from the increase in maintenance expenses and pension expenses on actuarial liabilities. This increase was partly offset by the decrease in salary expenses, mainly against the backdrop of provisions for bonuses.

The efficiency ratio for the reporting period was approx. 31.0 percent. compared to 39.7 percent in the corresponding period last year, net of the results of Bank Leumi USA. The efficiency ratio in the second quarter of 2023 was 29.5 percent, compared with 35.0 percent in the corresponding quarter last year. The improvement in the efficiency ratio stemmed mostly from growth in the Bank's business activity and from the interest rate increases.

Basic earnings per share attributable to the shareholders in the reporting period totaled a gain of approx. NIS 2.23 compared to a gain of NIS 2.47 in the corresponding period last year.

CET1 capital to risk weighted assets ratio as at June 30, 2023 was 11.23 percent, compared to 11.25 percent in the corresponding period last year.

Total capital ratio as of June 30, 2023 was 14.44 percent, compared to 14.00 percent in the corresponding period last year.

For more information, including anticipated regulatory changes regarding the measurement of capital adequacy, please see the section entitled Equity and Capital Adequacy.

On May 22, 2023, the Bank's Board of Directors approved a share buyback plan for a total of up to NIS 800 million. By the report publication date, a share buyback was carried out in the amount of NIS 300 million.

On August 14, 2023, the Bank's Board of Directors approved a dividend distribution totaling NIS 736 million, which represents approx. 30 percent of the profit for the second quarter of 2023.

For more information, please see section entitled "Equity and Capital Adequacy".

Material Developments in Income, Expenses and Other Comprehensive Income

Further to Note 15.A to the financial statements as of December 31, 2022, regarding the merger agreement between BLC and Valley. The comparative figures for the six months ended June 30, 2022 and for the year ended December 31, 2022 presented in this Report of the Board of Directors and Management include the results of Bank Leumi USA in the first quarter of 2022 in the various line items, unless expressly stated otherwise. As aforesaid, starting from the second quarter of 2022, the Bank records equity profits in respect of the investment in Valley.

For additional information regarding the Valley investment, please see Note 16.A.

Following is the change in net income in the second quarter of 2023 and in the reporting period compared to the corresponding quarter last year and the corresponding reporting period last year

(a) Net of the balances and results of Bank Leumi USA, which as from April 1, 2022 is not consolidated in the Bank's consolidated financial statements due to the merger transaction with Valley. For more information, please see Note 15.A to the financial statements as at December 31, 2022.

(b) During the first quarter of 2023, a change in classification was made between interest-bearing and non-interest-bearing deposits. For comparability reasons, the Bank made an immaterial adjustment to the comparative figures. For additional information, please see Note 7.

(c) Spread from credit granting activity is the difference between the interest received from credit and the cost of raising the sources used to grant the credit (hereinafter - "transfer prices"). These transfer prices are subject to the period, currency and type of interest in the transaction. Transfer prices are the Bank's internal pricing tool and are based on internal models and the Bank's judgment. Spread from deposit taking activity is the difference between the transfer prices and the interest paid to customers for these deposits.

(d) "Other" is attributable to the financial management segment and includes interest income and expenses of the segment, which are transferred to the Bank's divisions with respect to the sources.

(e) The data presented include the results of Bank Leumi USA.

Net interest income in the reporting period totaled approx. NIS 8,212 million, compared to a total of approx. NIS 5,824 million in the corresponding period last year (excluding Bank Leumi USA’s results), an increase of approx. 41 percent. The increase in net interest income was due mainly to growth in the credit portfolio and from an increase in deposit spreads, on the backdrop of the increase in interest rates, the increase was partially offset by a decrease in the net interest income of the financial management section.

During 2022 and in the first half of 2023, the prime interest rate rose sharply - from an average of 1.6 percent in the first quarter of 2022 to an average of 6.1 percent in the second quarter of 2023. This rise - which was moderated by turning interest bearing deposits to interest-bearing deposits - caused an increase in the deposits spread.

The deposit spread is affected, as aforesaid, from the mix of interest-bearing deposits and non-interest-bearing deposits; therefore, if the transition to interest-bearing deposits continues, the deposit spread is expected to be eroded.

The CPI in the reporting period was a positive 2.5 percent, compared with a positive CPI of 3.1 percent in the corresponding period last year. Net interest income in the reporting period was positively affected by the positive CPI in the amount of NIS 846 million, while in the corresponding period last year, the results were positively affected by the positive CPI by a total of approx. NIS 1,007 million.

Income rate was up 2.81 percent from one period to another, mainly due to the increase in interest rates, which was partially offset by an erosion of credit spreads and from a lower positive CPI during the reporting period, compared with the corresponding period last year.

Expense rate was up 2.93 percent from one period to the next, mainly due to the effect of the increase in interest rates and from the move from current accounts to deposits. This increase was offset by a lower positive CPI in the reporting period compared to the corresponding period last year.

The growth in net interest margin (NIM) in the reporting period, as mentioned, mainly stems from the growth in the credit portfolio and increase in interest income.

The total interest rate spread in the reporting period is 1.47 percent, compared to a 1.59 percent spread in the corresponding period last year, excluding Bank Leumi USA’s results.

The following table presents interest spread information from activity in Israel by linkage segment in the reporting period, net of the balances of Bank Leumi USA - in the corresponding period last year:

In the non-linked NIS segment, the interest rate spread was 1.97 percent, compared with 1.66 percent in the corresponding period last year. In the CPI segment, the interest rate spread is 1.80 percent, compared with 1.66 percent in the corresponding period last year. In the foreign exchange segment, the interest rate spread was (0.69) percent, compared with 0.42 percent in the corresponding period last year.

For more information regarding the credit spreads and deposits spreads, by operating segment see Note 12A.

For more information regarding interest income and expenses, please see Appendix 1 - “Income and Expenditure Rates and Analysis of Changes in Interest Income and Expenses”.

For details regarding interest rate exposures, please see the "Market Risks" section below.

Total fees and commissions	**1,838**	1,754	84	4.8

(a) Net of the results of Bank Leumi USA, which as from April 1, 2022 is not consolidated in the Bank's consolidated financial statements due to the merger transaction with Valley. For more information, please see Note 15.A to the financial statements as at December 31, 2022.

The 4.8 percent increase in fees and commissions compared with the corresponding period last year, net of the results of Bank Leumi USA, stems primarily from commissions on exchange rate differentials, fees and commissions on financing activities, and account handling fees. The increase was offset by an decrease in fees and commissions on securities.

Total operating and other expenses	**3,312**	3,277	35	1.1

(a) Net of the results of Bank Leumi USA, which as from April 1, 2022 is not consolidated in the Bank's consolidated financial statements due to the merger transaction with Valley. For more information, please see Note 15.A to the financial statements as at December 31, 2022.

In the reporting period, there was an increase of NIS 35 million in operating and other expenses compared with the corresponding period last year, net of the results of Bank Leumi USA; the increase in operating expenses stems mainly from an increase in advertising expenses, maintenance expenses for buildings and equipment and from an increase in the interest cost in respect of pension liabilities resulting from the rise in interest rates. This increase was partly offset by a decrease in the bonus expenses.

The efficiency ratio for the reporting period was approx. 31.0 percent compared to 39.7 percent in the corresponding period last year, net of the results of Bank Leumi USA. The improvement in the efficiency ratio stemmed mostly from an increase in income, among other things as a result of the interest rate increases.

Total (annualized) operating and other expenses constitute 0.96 percent of total assets, compared with 0.98 percent in the corresponding period last year, net of the balances and results of Bank Leumi USA.

Following is the condensed comprehensive income statement

Comprehensive income for the reporting period totaled NIS 3,502 million compared to NIS 4,103 million in the corresponding period last year.

In the reporting period, positive adjustments were recorded in respect of available-for-sale bonds in the amount of NIS 116 million before tax; part of these positive adjustments were offset by negative adjustments of the liabilities for employee benefits in the amount of NIS 28 million before tax, which mainly stem from actuarial changes which were partially offset by an increase in the discount interest rate. These adjustments were stated directly in other comprehensive income.

It should be noted that the decline in the value of the bonds is immediately recorded in regulatory capital. Regarding the manner of measuring the pension liabilities and assets designated for hedging, for regulatory capital purposes, as of July 1, 2022, see the section entitled Capital and Capital Adequacy.

Structure and Development of Assets and Liabilities, Equity and Capital Adequacy

On June 30, 2023, total assets of the Leumi Group reached NIS 686.9 billion compared to NIS 699.2 billion at the end of 2022, a decrease of 1.8 percent, and an increase of 2.9 percent compared to June 2022.

The value of financial assets denominated in, and linked to, foreign currency out of the Group's total assets as of June 30, 2023 is NIS 117.6 billion, 17.1 percent of the total assets. In the first half of 2023, the shekel devalued against the US dollar by 5.1 percent, devalued by 7.1 percent against the euro, and devalued by 10.2 percent against the pound sterling. The change in the shekel's exchange rates against all foreign currencies during the reporting period contributed to a 0.5 percent increase in the Group's total consolidated assets.

Total assets under the Group's management – total balance sheet and securities portfolios of customers, provident funds and study funds for which operational management and deposit management services are provided - reached approx. NIS 2,001 billion as of June 30, 2023, compared with a total of NIS 1,969 billion as of the end of 2022.

Securities

As of June 30, 2023, the Leumi Group's investments in securities amounted to NIS 118.0 billion, compared to NIS 83.0 billion as of the end of 2022, a 42 percent increase.

The Group's securities are divided into four classes: held-for-trading securities, not held-for-trading equity securities and mutual funds, available-for-sale bonds and held-to-maturity bonds.

Fair value calculation method

The fair value of Israeli securities is based mainly on quoted prices on the Tel Aviv Stock Exchange; the fair value of foreign securities is based on prices received from external sources. Equity securities and mutual funds for which no fair value is available are presented at cost less impairment, adjusted upwards or downwards for observable prices in similar transactions or identical transactions of the same issuer.

Non-marketable Israeli bonds denominated in NIS are revalued using a fair value model, since these bonds do not have an active market.

Following is the classification and analysis of the securities line item in the consolidated balance sheet

	June 30, 2023					December 31, 2022				
	Held-to-maturity bonds[e]	Available-for-sale bonds[a][e]	Not held-for-trading equity securities and mutual funds[b]	Held-for-trading securities[c]	Total	Held-to-maturity bonds[e]	Available-for-sale bonds[a][e]	Not held-for-trading equity securities and mutual funds[b]	Held-for-trading securities[c]	Total

(a) Including unrealized losses from fair value adjustments of NIS 3,656 million recorded in other comprehensive income (December 31, 2022 - losses of NIS (3,812) million).

(b) Including unrealized gains from fair value adjustments in the amount of NIS 363 million recorded in profit and loss (December 31, 2022 - gains of NIS 256 million).

(c) Including net unrealized losses from fair value adjustments in the amount of NIS 74 million recorded in profit and loss (December 31, 2022 - net losses of NIS (113) million).

(d) The US government - NIS 13.0 billion (December 31, 2022 – NIS 12.5 billion).

(e) The outstanding balance of held-to-maturity bonds are presented net of a NIS 3.0 million loan loss provision. The outstanding balances of available-for-sale bonds are presented net of a NIS 0.0 million loan loss provision.

(f) Most bonds of foreign financial institutions are SSA-rated (Super-nationals, Sovereign and Agencies) or state-backed.

As at June 30, 2023, approximately 77.3 percent of the Group's own (nostro) portfolio was classified as available-for-sale, approx. 6.2 percent - as held for trading, approx. 3.7 percent as not held-for-trading equity securities and mutual funds and 12.8 percent as held-to-maturity. Approximately 3.7 percent of the securities' value is investments in corporate equity securities or mutual funds that are not equity-accounted, but rather stated at cost or according to the listed share and listed mutual funds' prices.

For information on the value of securities by method of measurement, please see Note 15.A.

Available-for-sale portfolio

1. In the reporting period, there was a NIS 116 million increase (before tax) in other comprehensive income in respect of available-for-sale bonds, compared with a decrease of NIS 3,484 million (before tax) in the corresponding period last year.
2. In the reporting period, net losses on the sale of available-for-sale bonds, stated in profit and loss, amounted to NIS 220 million (before tax), compared with net losses of NIS 93 million (before tax) in the corresponding quarter last year.

The net accumulated balance of fair value adjustments of available-for-sale bonds held in the available-for-sale portfolio as at June 30, 2023 totaled a negative NIS 1,871 million (after tax), which represents a net realized loss as at the reporting date, compared with a negative NIS 1,944 million (after tax) as at the end of 2022, which represents a net unrealized loss as at the reporting date.

For information regarding fair value adjustments of available-for-sale securities recognized in equity, please see Note 5.

Held-for-trading portfolio

As at June 30, 2023, the held-for-trading portfolio has NIS 7.3 billion in bonds, compared with NIS 2.3 billion as at December 31, 2022. As at June 30, 2023, the held-for-trading portfolio constitutes 6.2 percent of the Group's total nostro portfolio, compared with 2.7 percent as at December 31, 2022.

Realized and unrealized losses in respect of held-for-trading bonds in the amount of NIS 26 million were recorded net in the income statement in the reporting period, compared with net losses of NIS 102 million in the corresponding period last year.

Investments in equity securities and mutual funds

As at June 30, 2023, investments in equity securities and mutual funds totaled NIS 4,381 million, of which NIS 1,834 million were marketable and NIS 2,547 million - non-marketable.

The regulatory capital required in respect of these investments as at June 30, 2023 was NIS 365 million.

Realized and unrealized gains (including dividend) in respect of the equity securities and mutual funds in the amount of NIS 204 million were recorded net in the income statement in the reporting period, compared with net gains of NIS 183 million in the corresponding period last year.

For more information on the portfolio's composition, please see Note 5.

Investments in foreign securities

A. Investments in foreign asset-backed securities

The Group's asset-backed (mortgage and non-mortgage) securities portfolio, all investment-grade, amounted to NIS 15.3 billion (about USD 4.1 billion) as at June 30, 2023, compared to NIS 11.0 billion as at the end of 2022. Out of the above portfolio, as at June 30, 2023, NIS 9.9 billion (about USD 2.7 billion) was classified to the available-for-sale portfolio and the remainder - to the held-for-trading and held-to-maturity portfolios.

As of June 30, 2023, the portfolio of available-for-sale investments in foreign asset-backed bonds, including investment in mortgage-backed bonds, totaled NIS 5.4 billion. 94.6 percent of all mortgage-backed bonds in the available-for-sale portfolio was issued by US federal agencies (FNMA, FHLMC, GNMA) and all were rated AAA as of the reporting date.

As of June 30, 2023, the total net cumulative impairment from the mortgage-backed bonds portfolio charged to shareholders' equity was approx. NIS 551 million.

Total mortgage-backed bonds that are neither government-backed (USA) nor backed by US federal institutions total NIS 330 million.

The weighted average maturity for the entire mortgage-backed bond portfolio is 5.22 years (average duration). In addition to the mortgage-backed bonds, the Group's available-for-sale portfolio also includes other non-mortgage asset-backed bonds totaling approx. NIS 4.4 billion, of which CLO bonds account for NIS 3.0 billion. The weighted average maturity for the entire non-mortgage asset-backed bond portfolio is 5 years.

For more information on investment in asset-backed bonds, please see Note 5.

B. Investments in foreign non-asset-backed securities

As of June 30, 2023, the Group's securities portfolio includes NIS 43.1 billion (USD 11.6 billion) in foreign non-asset-backed securities. NIS 35.4 billion (approx. USD 9.6 billion) is from bonds classified to the available-for-sale portfolio and the remainder - to the held-for-trading and held-to-maturity portfolios. 98.2 percent of the total securities are investment-grade and include mainly securities of the US government, banks and financial institutions as well as bonds of investment-grade corporations, and the remainder are mainly securities issued by the Israeli government.

For more information regarding exposure to foreign financial institutions, please see section entitled "Credit Risks".

As of June 30, 2023, the cumulative decrease in shareholders' equity in respect of foreign non-asset-backed bonds which are in the available-for-sale portfolio was NIS 1,912 million (NIS 1,258 million after tax).

As aforesaid, in addition to the available-for-sale portfolio, the held-for-trading portfolio and held-to-maturity portfolio also include non-asset-backed securities. The held-for-trading portfolio mainly includes securities issued by governments, banks and financial institutions. 97.3 percent of the securities in the held-for-trading portfolio are investment-grade.

As of June 30, 2023, the value of the non-asset-backed held-for-trading portfolio was NIS 340.0 million (approx. USD 91.9 million).

Investments in bonds issued in Israel

As at June 30, 2023, investments in bonds issued in Israel amounted to NIS 58.2 billion, of which NIS 56.8 billion was in shekel-denominated bonds issued by the Israeli government and the remainder - corporate bonds. Approx. 49.6 percent of corporate bonds investments - which are approx. NIS 0.7 billion - were included in the available-for-sale portfolio, and the remainder - in the held-for-trading portfolio.

The available-for-sale portfolio corporate bonds - which total NIS 0.7 billion - include a negative capital reserve of NIS (50) million.

All corporate bonds in the held-for-trading portfolio are listed and traded on the Tel Aviv Stock Exchange.

For more information, please see Note 5.

Total demand deposits	**265,893**	319,233	(16.7)
Fixed deposits	**268,084**	237,851	12.7
Total deposits by the public	**533,977**	557,084	(4.1)

(a) Reclassified; during the first quarter of 2023, a reclassification was made between interest-bearing and non-interest-bearing deposits. For comparability reasons, the Bank made an immaterial adjustment to the comparative figures. The effect of the adjustment as of June 30, 2022 and December 31, 2022 amounted to deposits of NIS 82.2 billion and NIS 62.7 billion, respectively, from interest-bearing to non-interest-bearing. The aforementioned had no effect on the Bank's profit and loss and equity. Please see Note 7.

The decrease in the deposits balance during the reporting period stemmed mainly from a decrease in deposits of business customers and capital market customers. This decrease was partly offset by an increase in private deposits.

Off-balance-sheet activity in securities held by the public

	June 30	December 31		
	2023	2022	Change	
	In NIS million		In NIS million	In %
Securities portfolios[a]	**943,718**	907,086	36,632	4.0

(a) Including changes in the market value of securities and value of securities of mutual funds and provident funds in the Group's custody, for which operational management and custody services are provided.
(b) The Group does not manage mutual funds, provident funds or study funds in Israel.
(c) Assets of customers to which the Group provides operational management services, including provident fund balances of customers who receive consulting services from Leumi.

Bonds, Commercial Securities, Capital Notes and Subordinated Bonds

Shelf Prospectus and Issuance of Bonds and Commercial Securities

On May 27, 2021, the Bank published a shelf prospectus in accordance with a permit granted by the Israel Securities Authority. On May 18, 2023, the Israel Securities Authority approved the application to extend the issuance period under the Bank's shelf prospectus to May 26, 2024.

On January 18, 2023, the Bank issued a total of USD 500 million in par value “Green” Subordinated Notes Series Leumi $ 2033 TACT Institutional. The series was listed for trading on the TACT Institutional on the Tel Aviv Stock Exchange.

Subordinated Notes Series Leumi $ 2033 TACT Institutional are repayable in one lump sum, 10 years and six months after their issue date, with the Bank having an early repayment option exercisable in the period from 5 years and three months to 5 years and six months after the issue date, subject to certain terms and conditions.

Subordinated Notes Series Leumi $ 2033 TACT Institutional bear a fixed annual interest rate of 7.129 percent per year to be paid semi-annually until July 18, 2028. At that time and if early redemption has not been made, the interest rate will be updated according to the government yield in the United States on the same date plus the margin agreed in the issue, as detailed in the issue documents.

If circumstances of a trigger event (a point of non-viability or trigger event for absorption of the principal loss amount, the earlier of the two) were to occur, the Series Leumi $ 2033 TACT Institutional Subordinated Notes shall be converted into shares according to the average closing prices of the Bank’s shares on the Tel Aviv Stock Exchange in the 14 consecutive trading days preceding the date on which the conversion notice (translated into USD according to the exchange rate as of that date) was issued or according to the set minimum rate (USD 4.21053, subject to adjustments), the highest of the two.

Subordinated Notes Series Leumi $ 2033 TACT Institutional are eligible for inclusion in Tier 2 capital as of the issue date.

For more information, please see the immediate reports dated January 11, 2023 and January 18, 2023.

On May 30, 2023, the Bank issued a total of NIS 1.492 billion p.v. in bonds by way of an expansion of Series 183 Bonds for a consideration of NIS 1.419 billion, as well as NIS 2.428 billion p.v. in commercial securities (CS Series 4).

The principal of the Commercial Securities and interest in respect thereof shall be payable in one lump sum on May 28, 2024; it is not linked to the Consumer Price Index, and carries a spread of 0.19 percent over the Bank of Israel’s interest rate.

For more information, please see the immediate report dated May 30, 2023.

On August 7, 2023, the Bank issued NIS 0.5 billion p.v. in Credit Linked Notes (Series 1).

The Notes’ principal will be payable in one payment on December 24, 2026, as long as the Bank does not carry out early redemption, as detailed in the terms of the issuance. The unpaid balance of the Note’s principal will bear annual interest at the Bank of Israel interest rate plus 2.3 percent, which will be paid in 40 monthly installments, from September 24, 2023 to December 24, 2026, the final repayment date of the Note’s principal. The Notes (principal and interest) will not be linked to any linkage basis.

Series 183 Bonds, Credit Linked Notes (Series1) and Commercial Securities (Series 4) are not recognized for regulatory capital purposes.

For more information, please see the immediate report dated August 6, 2023.

Early redemption of subordinated bonds

On July 5, 2023, the Bank’s Board of Directors decided to exercise full early redemption of Subordinated Bonds (Series 401), which were issued to the public in July 2018. Accordingly, on July 31, 2023, subordinated bonds totaling NIS 681 million were redeemed (including linkage differences).

For more information, please see the immediate reports dated July 5, 2023, July 16, 2023 and August 1, 2023.

Equity and Capital Adequacy

Equity attributable to the Bank's shareholders totaled NIS 51,771 million on June 30, 2023 compared with NIS 49,438 million as at the end of 2022.

This capital serves as the basis for calculating the regulatory capital which, in turn, is used to calculate the Bank's capital adequacy ratio, with the addition of capital instruments and regulatory adjustments, as set out in the Banking Supervision Department's Proper Conduct of Banking Business Directive No. 202.

The ratio of equity to total assets on June 30, 2023 is 7.5 percent.

Capital Adequacy Structure[a]

	June 30		December 31
	2023	2022	2022
	In NIS million		
Capital base for capital ratio purposes			
CET1 capital, after regulatory capital deductions and adjustments[c]	**51,373**	44,910	48,797
Tier 2 capital, after deductions	**14,667**	10,980	12,020
Total capital	**66,040**	55,890	60,817
Balances of risk-weighted assets			
Credit risk[c][d][e]	**422,968**	367,975	392,658
Market Risks	**5,956**	7,059	6,610
Operational risk	**28,441**	24,135	26,375
Total balances of risk-weighted assets	**457,365**	399,169	425,643
Capital to risk-weighted assets ratio			
Ratio of CET1 capital to risk-weighted components	**11.23%**	11.25%	11.46%
Total capital to risk-weighted assets	**14.44%**	14.00%	14.29%
Minimum CET1 capital ratio set by the Banking Supervision Department[b]	**10.20%**	10.20%	10.21%
Minimum total capital ratio set by the Banking Supervision Department[b]	**13.50%**	13.50%	13.50%

(a) For more information regarding the capital adequacy structure, please see Note 9.A.
(b) The minimum Common Equity Tier 1 capital ratio required and the minimum total capital ratio required as of June 30, 2023 are 10 percent and 13.5 percent, respectively. In addition to the Common Equity Tier 1 capital is a capital requirement of 1 percent of the outstanding housing loans, excluding housing loans granted during the temporary order term. For more information about the temporary order for addressing the coronavirus crisis, please see Note 9A.
(c) These data include adjustments in respect of the effect of first-time application of GAAP for current expected credit losses, which are gradually reduced until December 31, 2024. For more information, please see Note 1.X.1 to the financial statements as of December 31, 2022.
(d) Credit risk was calculated after implementing the revisions to Proper Conduct of Banking Business Directives 203 and 203A, "Measurement and Capital Adequacy - The Standardized Approach - Credit Risk". Comparative figures as at June 30, 2022 were not restated. For additional details, see directives pertaining to the attribution of capital for derivative financial instruments in this chapter.
(e) These figures include adjustments in respect of high-risk loans for the purchase of land. For additional details, see under "Regulatory and other changes in measuring the capital requirements" in this section.

The capital adequacy ratios in the first half of 2023 were mainly affected by the net income for the period, less the dividend and buyback, from the increase in the loan portfolio and by the issuance of "green" subordinated bonds at the beginning of the first quarter.. The impairment recorded in the first quarter of 2023 in respect of the investment in Valley shares had an immaterial effect on the Bank's capital ratios.

For more information on additional regulatory changes in the reporting period and anticipated changes regarding the measurement of capital adequacy, please see below in this chapter.

Regulatory capital structure

In May 2013, the Banking Supervision Department published the final directives for the implementation of Basel III in Israel, by amending Proper Conduct of Banking Business Directives Nos. 201-211 (hereinafter in this section - the "Directives"). The Directives went into effect on January 1, 2014, subject to the transitional provisions included in the Banking Supervision Department's Proper Conduct of Banking Business Directive No. 299.

Pursuant to the Directives, the Group's capital components for the purpose of calculating capital adequacy are attributed to two tiers:

1. Tier 1 capital, which includes Common Equity Tier 1 capital (CET1) and Additional Tier 1 capital.
2. Tier 2 capital.

The sum of these tiers is also known as "capital basis for capital adequacy purposes" or "regulatory capital" or "total capital".

Common Equity Tier 1 capital

Common Equity Tier 1 capital includes the banking corporation's shareholders' equity, with the addition of some of the minority interests (non-controlling interests of consolidated subsidiaries) less goodwill, other intangible assets and regulatory adjustments and additional deductions.

In addition to these, the following are included: adjustments to Common Equity Tier 1 capital, which arise from the implementation of operational efficiency programs, measurement of the pension liabilities and assets designated for hedging, for regulatory capital purposes, as of July 1, 2022, as outlined above, as well as the application of various regulatory provisions, as outlined below.

A breakdown of the minimum Common Equity Tier 1 capital regulatory requirement appears in the section entitled "Capital Adequacy".

Tier 1 capital

According to the Banking Supervision Department's directives, Tier 1 capital will include - in addition to CET1 capital - Additional Tier 1 capital, which is comprised of equity instruments complying with the criteria set forth in Proper Conduct of Banking Business Directive No. 202.

To date, Israel has set no regulatory requirement regarding minimum Additional Tier 1 capital ratio, and the Leumi Group has no Additional Tier 1 capital instruments.

Tier 2 capital

Tier 2 capital includes equity instruments and the outstanding balance of the collective loan loss provision, subject to the ceiling prescribed by the directives.

Capital instruments must comply with the criteria set forth in Proper Conduct of Banking Business Directive No. 202 in order to be included in capital. The main criteria that the instrument must include are: (1) a mechanism for absorbing reserve losses by way of conversion to ordinary shares or amortization of the instrument when the banking corporation's Common Equity Tier 1 capital ratio falls below 5 percent; (2) a clause determining that, on the occurrence of the defining event for non-viability (as defined in Appendix E to Proper Conduct of Banking Business Directive No. 202), the instrument shall be immediately converted to ordinary shares or written off.

For a description of the main features of issued regulatory capital instruments, please see the Bank's website at: https://english.leumi.co.il.

Capital Adequacy

Capital ratios are calculated as the ratio of capital to risk-weighted assets. The Common Equity Tier 1 capital ratio is calculated as the ratio of Common Equity Tier 1 capital to the risk-weighted assets, and the total capital ratio is calculated as the ratio of total capital to the risk-weighted assets.

The Bank of Israel's capital adequacy targets

Under Proper Conduct of Banking Business Directive No. 201, Capital Measurement and Adequacy - Introduction, Application and Calculation of Requirements, a large banking corporation whose consolidated on-balance sheet assets total at least 24 percent of the Israeli banking system's total assets, is required to meet a Common Equity Tier 1 capital ratio of at least 10 percent and a total capital ratio of at least 13.5 percent. This requirement applies to Leumi.

In addition to the Common Equity Tier 1 capital is a capital requirement of 1 percent of the outstanding housing loans as of the dates of the financial statements, excluding housing loans for which an expedient was granted during the temporary order term for dealing with the coronavirus crisis.

Circular entitled “Adjustments to Proper Conduct of Banking Business Directives for Dealing with the Coronavirus Crisis (Temporary Order)” - Proper Conduct of Banking Business Directive No. 250

In accordance with the circular published by the Banking Supervision Department on September 30, 2021, as of October 1, 2021, the easement remains in effect only in respect to the capital requirement for housing loans not intended for the purchase real estate properties (all-purpose loans). As at June 30, 2023, the additional capital requirement for housing loans, is 0.20 percent in terms of CET1.

Accordingly, the minimum capital requirements applicable to the Bank as of June 30, 2023 are 10.20 percent for Common Equity Tier 1 capital ratio (including capital requirement for outstanding housing loans) and 13.50 percent for total capital ratio.

Regarding the leverage ratio, according to the temporary order for coping with the coronavirus crisis, a banking corporation whose total consolidated on-balance-sheet assets constitute at least 24 percent of the Israeli banking system’s total assets shall have a consolidated leverage ratio of no less than 5.5 percent (in lieu of 6 percent previously). On May 15, 2022, a circular amending the temporary order was published, according to which the easement shall be extended until December 31, 2023. A corporation which will utilize the easement until that date will be required to once again meet the required leverage ratio that was in place prior to the temporary order in two quarters’ time, by June 30, 2024. It was also determined that taking advantage of the easement shall not prevent the distribution of dividends, subject to an total capital planning aimed at reverting to the required leverage ratio.

The Bank’s capital planning and capital adequacy targets

The Leumi Group’s capital planning reflects a forward-looking view of its risk appetite and profile, business strategy and the capital adequacy required as a result. The capital plan is approved by the Bank’s management and Board of Directors and takes into account the Group’s various P&L centers and other factors that affect the Bank's compliance with the capital requirements, such as: profit forecasts, changes in other comprehensive income, regulatory adjustments, the effect of the transitional provisions and the rate of increase in risk-weighted assets. The capital ratios forecast is also subject to various sensitivity tests and stress scenarios.

The Group's policy, which was approved by the Board of Directors, is to maintain a capital adequacy level that is higher than the minimum threshold set by the Bank of Israel from time to time and no less than the rate of capital required to cover the risks as assessed using the ICAAP process. In addition, the Group has set capital targets in case of a stress scenario event. For more information on the ICAAP process and the use of stress tests, please see the Risk Management Report as at December 31, 2022.

Under the regulatory review process, the Banking Supervision Department instructed the banks to set internal capital targets that would match each Bank's risk profile. As a result, the Bank’s Board of Directors approved an increase in the Bank’s internal Tier 1 capital target to 10.5 percent, as from December 31, 2017.

For more information regarding the easement in the Common Equity Tier 1 capital internal target under the temporary directives for dealing with the coronavirus crisis, please see the section entitled “Equity and Capital Adequacy” in the Report of the Board of Directors and Management as at December 31, 2022.

Dividend distribution policy

On March 6, 2019, the Bank's Board of Directors approved a dividend distribution policy, under which the Bank will distribute, each quarter, a dividend of up to 50 percent of the Bank's net income in accordance with the Bank’s financial statements for the previous quarter. and subject to, inter alia, the Bank's meeting its capital adequacy targets, even after the dividend distribution. The actual dividend distribution is subject to the specific resolutions being passed by the Board of Directors prior to each distribution, and to the provisions of the law which apply to dividend distribution, including the provisions of the Companies Law and directives of the Bank of Israel.

On August 14, 2023, the Board of Directors approved a dividend distribution totaling NIS 736 million, which represents approx. 30 percent of the net income for the second quarter of 2023. The approved dividend amount per share of NIS 1 p.v. is 48.00 agorot. The final dividend amount per share is subject to changes due to the share buyback. The Board of Directors has set August 28, 2023 as the record date for dividend payment and September 7, 2023 as the payment date.

Details of paid dividend

Declaration date	Payment date	Dividend per share	Cash dividend
		In agorot	In NIS million
August 12, 2021	September 2, 2021	43.36	630
November 15, 2021	December 12, 2021	94.11	1,367
March 9, 2022	April 6, 2022	40.48	588
May 24, 2022	June 15, 2022	22.14	322
August 16, 2022	September 6, 2022	25.82	399
November 29, 2022	December 19, 2022	23.08	356
March 14, 2023	April 4, 2023	45.20	698
May 23, 2023	June 15, 2023	19.10 [1]	294

The Bank's share buyback plan

On May 22, 2023, the Bank's Board of Directors approved the Bank's share buyback plan at a maximum of NIS 800 million, from May 24, 2023 to May 15, 2024, or until the entire amount will have been purchased, whichever is earlier.

The buyback plan will be carried out as part of the trading on the TASE and/or in off-exchange transactions, through an external and independent TASE member who will act under an irrevocable power of appointment, in accordance with the safe haven protection mechanism published by the Israel Securities Authority. The buyback plan will be carried out in three separate steps, each of which will be irrevocable, in accordance with the terms and conditions of the safe haven mechanism (hereinafter - "Step A", "Step B" and "Step C").

The implementation of Stage A began on May 24, 2023 and ended on August 1, 2023, during which time the Bank purchased (through the independent Stock Exchange member it had contracted) 10,740,308 shares totaling NIS 300 million under the said plan. As of the reporting date, the Bank owns 82,564,566 treasury shares.

Immediately prior to publishing the report, the Bank decided to proceed to Stage B, granting the Tel Aviv Stock Exchange member an irreversible order to initiate Stage B on August 16, 2023. Stage B will end on the earlier of: (a) November 2, 2023; or (b) Completion of the Bank's share buyback in the amount of NIS 300 million. After the end of Step B, if the Bank decides to carry out Step C, the Bank will give the stock exchange member an inseparable order to begin to carry out Step C on the second trading day from the date of publication of the first financial statements after the date of the decision to carry out Step C. In that case, Step C will end on (a) May 15, 2024; or (b) completion of the Bank share buyback in the amount of NIS 800 million, whichever is earlier, net of the total buybacks carried out in Step A and Step B. If, following the end of Stage B, a decision will be made not to proceed with Stage C, the Bank will publish an immediate report to that effect.

Approval by the Banking Supervision Department for the buyback plan, as required according to Proper Conduct of Banking Business Directive 332, was received on May 17, 2023, subject to compliance with restrictions and capital targets, including the condition that the plan be immediately terminated if, during the period of the plan, it appears that, according to the most recent financial statements published, the Bank is not in compliance with the Common Equity Tier 1 capital ratio of at least 10.9 percent.

[1] According to the supplementary report dated June 7, 2023.

Adjustments to Common Equity Tier 1 capital

Measurement of the employee benefits liability and hedging assets

Starting from July 1, 2022, calculation of the pension liabilities for the purpose of regulatory capital is as follows: Each quarter, the Bank calculates the change in the pension liability as a result of changes in the discount rate, net of the change in the value of assets designated in advance for hedging these liabilities. The change in the net pension liability, after tax, is spread in a linear manner over four quarters, beginning in the quarter for which the calculation was made. This method shall be in effect until the earlier of the following: a) the financial statements as at December 31, 2029 (inclusive) or b) the date of the financial statements in which the average pension liability amount for the past four quarters is lower than NIS 10 billion, linked to the CPI (from the known CPI as of July 1, 2022 until the known CPI on the date of the relevant financial statements).

For information regarding the discounting methodology, please see "Critical Accounting Policies and Estimates".

Relief for operational efficiency plans

In 2016 and 2017, the Banking Supervision Department published letters entitled "Operational Efficiency of the Banking System in Israel" - workforce and real estate. According to the letters, a banking corporation which meets the terms and conditions prescribed, will be granted a relief, according to which it may spread the effect of the plans, on a straight-line basis, over a period of five years.

As part of the understandings regarding the special collective agreement signed with the Workers' Union in July 2019, the Bank's Board of Directors approved a voluntary retirement plan, which amounted to NIS 167 million (after tax). As of June 30, 2023, 80 percent of the plan's costs are attributable to regulatory capital.

Regulatory and other changes in measuring the capital requirements

Developments in the guidance of the Basel Committee on Banking Supervision regarding capital adequacy measurement

In 2017, the Basel Committee on Banking Supervision completed its revision of the overall capital adequacy Basel III framework. As part of the revisions, also known as Basel IV, significant revisions were made in the manner of calculating risk-weighted assets for the purpose of the Tier 1 capital requirements. Implementation of the various standards included in the revision, as determined by the Basel Committee, was January 1, 2023, but in the EU the implementation is expected to begin in 2025.

In accordance with the policy for the adoption of accepted international standards, the Banking Supervision Department is adopting the Basel Committee provisions from 2017 on the calculation of capital requirements in respect of operational risk. On December 29, 2022, the Banking Supervision Department published a draft update to the Proper Conduct of Banking Business Directive 206 "Measurement and Capital Adequacy - Operational Risk". The draft established an updated definition of the calculation of the capital allocation in respect of operational risk so that it is based, among other things, on the business indicator components stipulated in the draft and on the internal loss multiplier based on the average historical losses of the banking corporation. Implementation of the Directive will become effective on January 1, 2026. However, according to the draft revision to the Directive of March 13, 2023, until December 31, 2027 the internal loss multiplier will be set at one.

Directives pertaining to the attribution of capital for derivative financial instruments

On December 1, 2021, the Banking Supervision Department published a circular revising directives on capital allocation for derivative financial instruments (application of the provisions of Proper Conduct of Banking Business Directives Nos. 203A and 208A), in an effort to adjust the directives of the Bank of Israel to the revised Basel Committee provisions regarding counterparty credit risk.
As of July 1, 2022, the Bank applies Directive No. 203A, Treating Counterparty Credit Risk.

The application date of Directive 208A, Value Adjustment for Credit Risk, will be January 1, 2025.

Circular entitled "Regulatory Capital - Effect of Implementation of Accounting Principles regarding Expected Loan Losses", Proper Conduct of Banking Business Directive No. 299 and circular entitled "Expected Loan Losses from Financial Instruments"

As of January 1, 2022, the Bank applies the transitional provisions published by the Banking Supervision Department - "Regulatory Capital - Effect of Application of GAAP on Expected Credit Losses" as of December 1, 2020, as well as additional revisions, as part of adjustments to additional Proper Conduct of Banking Business Directives adjusted to the new rules on expected credit losses. Among other things, since January 1, 2022, the Bank is applying Proper Conduct of Banking Business Directive No. 202, "Capital Measurement and Adequacy - Regulatory Capital", and deducts from Common Equity Tier 1 amounts to cover for housing loans classified over time as non-performing.

According to the transitional provisions published by the Banking Supervision Department, and since following the first-time application there was a decrease in the Common Equity Tier 1 capital of the Bank as at January 1, 2022, the Bank partially added to the Common Equity Tier 1 capital 75 percent of the decrease in the Common Equity Tier 1 capital as of the first-time application (as a result, at the beginning of each year from the first-time application, the addition to the Common Equity Tier 1 capital will decrease by 25 percent, until 0 percent is added on January 1 of the fourth application year). Accordingly, on January 1, 2023, 50 percent of the decrease in Common Equity Tier 1 capital on the date of first-time application was added to the Common Equity Tier 1 capital.

For more information regarding the effect of the application on the Bank's financial statements and on the Bank's capital ratios, please see Note 1.X.1 to the financial statements as of December 31, 2022.

Circular amending Proper Conduct of Banking Business Directive No. 203, "The Standardized Approach - Credit Risks"

The Bank applied, for the first time, the circular amending Proper Conduct of Banking Business Directive 203, "The Standard Approach - Credit Risk" in its financial statements as at December 31, 2022, according to which the weight of the risk attributable to credit provided for the sale of land for development and construction purposes at a loan to value (LTV) ratio of over 80 percent, was increased to 150 percent. The effect of the first-time application on the Common Equity Tier 1 capital ratio was a decrease by a rate of 0.15 percent. As clarified by the Banking Supervision Department, the change was implemented starting from the third quarter of 2022, over 4 quarters, such that in the quarter ended June 30, 2023, the capital requirement was fully reflected.

For more information, please see the section entitled "Equity and Capital Adequacy" in the Report of the Board of Directors and Management as at December 31, 2022.

Sensitivity analysis of the main factors affecting the capital adequacy of the Leumi Group

- Change in the amount of risk-weighted assets – Leumi's risk-weighted assets – amounted to NIS 457.4 billion as at June 30, 2023. Every NIS 1 billion increase in risk-weighted assets will reduce the CET1 capital ratio by 0.02 percent and total capital ratio by 0.03 percent.
- Change in Common Equity Tier 1 - as of June 30, 2023, Common Equity Tier 1 totals NIS 51.4 billion. A NIS 100 million decrease in CET1 capital will decrease the CET1 capital and total capital ratio by 0.02 percent.
- Change in the foreign exchange rate - a 1 percent depreciation in the shekel's exchange rate against all currencies will decrease the Common Equity Tier 1 capital by 0.02 percent and total capital ratio by 0.01 percent.
- A 1 percent increase in the risk-free interest rate curve across all currencies for the regulatory capital exposure signifies a 0.07 percent decrease in the Common Equity Tier 1 capital ratio and total capital ratio.
- The rating of the State of Israel has an effect on the capital requirements in respect of the Bank's exposures to the Israeli government and exposure to banks, institutional entities and public sector entities in Israel. According to the Bank, a one-notch downgrade in the credit rating of the State of Israel by one of the rating agencies that rate the Bank will not affect the Bank's capital adequacy ratios.

  For more information, please see The Credit Rating in the Corporate Governance Report.

The above information regarding capital adequacy and its management refers to the Bank's future activities and constitutes forward-looking information. For the meaning of the term, please see under "Forward-Looking Information".

Leverage Ratio

Leverage ratio is expressed as a percentage and defined as measured regulatory capital divided by the measured exposure. The regulatory capital for the purpose of leverage ratio measurement is Tier 1 capital, as defined in Proper Conduct of Banking Business Directive No. 202, according to regulatory adjustments regarding the capital calculation. A banking corporation's exposure is the sum of the balance sheet exposures, exposure to derivatives, exposure to securities financing transactions and off-balance-sheet items. The leverage ratio complements the capital ratio and constitutes yet another restriction on the banking sector's leverage level.

	June 30		December 31
	2023	2022	2022
	In NIS million		
Consolidated data			
Tier 1 capital[c]	**51,373**	44,910	48,797
Total exposures[b]	**767,928**	718,134	766,895
Leverage Ratio			
Leverage Ratio	**6.69%**	6.25%	6.36%
Minimum total leverage ratio set by the Banking Supervision Department[a]	**5.50%**	5.50%	5.50%

For additional information regarding capital adequacy and leverage, please see directives pertaining to the attribution of capital for derivative financial instruments above and Note 9.B.

(a) For more information regarding compliance with the leverage ratio temporary order, please see under "Capital adequacy targets" as set by the Bank of Israel above.

(b) Total exposures was calculated after implementing the revisions to Proper Conduct of Banking Business Directive 218, "Leverage Ratio", following the revision of Directives 203 and 203A, "Measurement and Capital Adequacy - the Standardized Approach - Credit Risk". Comparative figures as at June 30, 2022 were not restated. For more information, please see directives pertaining to the attribution of capital for derivative financial instruments above.

(c) When calculating the leverage ratio, the effect of implementation of the efficiency plan and adjustments in respect of the implementation the new measurement method in respect of certain actuarial liabilities, were taken into account. For additional details regarding the effect of the transition to the new method, see Note 9B.

Operating Segments - Management Approach

Operating segments reporting according to management approach presents the Bank's results by business line, in accordance with the Bank's organizational structure.
The Bank's business lines specialize in providing services to customer segments with similar characteristics and needs.

For more information regarding the business lines according to the management approach, please see section entitled "Operating Segments" in the financial statements as at December 31, 2022.

(b) Including income in the amount of NIS 782 million in respect of the Valley merger.

Main changes in the operating results of the regulatory segments

Households segment

Net income attributable to shareholders in respect of the household segment in the first half of 2023 totaled NIS 1,240 million, compared to NIS 380 million in the corresponding period last year. The increase in profit is mainly due to the increase in interest income, partially offset by an increase in the loan loss expense.

Interest expenses, net in the first half of 2023 totaled NIS 2,943 million, compared with NIS 1,419 million in the corresponding period last year. Most of the increase stems from growth in housing loans, an increase in the amount of deposits and an increase in deposit spreads due to the increase in interest rates.

Net interest income in the second quarter of 2023 totaled NIS 1,550 million, compared to NIS 758 million in the corresponding quarter last year. The increase stems mainly from the increase in credit volumes and deposits and deposit spreads, due to the rise in interest rates. Noninterest income in the first half of 2023 totaled NIS 597 million, compared with NIS 501 million in the corresponding period last year. Most of the increase stems from income from fees and commissions.

In the first half of 2023, loan loss expenses were recorded in the amount of NIS 275 million, compared to an expense of NIS 22 million in the corresponding period last year. The increase stems mainly from the collective provision, mostly due to the macroeconomic uncertainty.

In the second quarter of 2023, loan loss expenses were recorded in the amount of NIS 188 million, compared to an expense of NIS 77 million in the corresponding period last year. The increase stems mainly from the collective provision.

Operating and other expenses for the first half of 2023 totaled NIS 1,324 million, compared with NIS 1,316 million in the corresponding period last year.

Operating and other expenses for the second quarter of 2023 totaled NIS 692 million, compared with NIS 654 million in the corresponding period last year.

Outstanding loans to the public as of June 30, 2023 totaled NIS 154.9 billion compared to NIS 150.2 billion as at the end of 2022. Most of the increase stems from growth in the housing loan portfolios.

Balance of deposits by the public as of June 30, 2023 totaled NIS 133.7 billion compared to NIS 128.4 billion at the end of 2022.

Retail banking segment

Net income attributable to shareholders in respect of the private banking segment in the first half of 2023 totaled NIS 141 million, compared to NIS 52 million in the corresponding period last year. The increase stems mainly from net interest income.

Interest expenses, net in the first half of 2023 totaled NIS 216 million, compared with NIS 45 million in the corresponding period last year. The increase stems mainly from the increase in deposit volumes and deposit spreads, due to the rise in interest rates.

Net interest income in the second quarter of 2023 totaled NIS 109 million, compared to NIS 34 million in the corresponding period last year. The increase stems mainly from the increase in deposit volumes and deposit spreads, due to the rise in interest rates.

Micro- and small-business segment

Net income attributable to shareholders in respect of the micro- and small business segment in the first half of 2023 totaled NIS 886 million, compared to NIS 398 million in the corresponding period last year. The increase stemmed mainly from an increase in net interest income, which was partially offset by an increase in loan loss expenses.

Interest expenses, net in the first half of 2023 totaled NIS 1,962 million, compared with NIS 1,041 million in the corresponding period last year. The increase stems mainly from the increase in deposit volumes and deposit spreads, due to the rise in interest rates.Net interest income in the second quarter of 2023 totaled NIS 966 million, compared to NIS 571 million in the corresponding period last year. The increase stems mainly from the increase in deposit volumes and deposit spreads, due to the rise in interest rates. Noninterest income in the first half of 2023 totaled NIS 463 million, compared with NIS 445 million in the corresponding period last year.

Noninterest income in the second quarter of 2023 totaled NIS 216 million, compared with NIS 222 million in the corresponding period last year.

In the first half of 2023, loan loss expenses were recorded in the amount of NIS 260 million, compared to an expense of NIS 85 million in the corresponding period last year. Most of the increase stems from the specific provision.

In the second quarter of 2023, loan loss expenses were recorded in the amount of NIS 33 million, compared to an expense of NIS 101 million in the corresponding period last year. Most of the decrease stems from the collective provision.

Operating and other expenses for the first half of 2023 totaled NIS 774 million, compared with NIS 791 million in the corresponding period last year.

Outstanding loans to the public as of June 30, 2023 totaled NIS 66.7 billion compared to NIS 65.8 billion as at the end of 2022.

Balance of deposits by the public as of June 30, 2023 totaled NIS 103.0 billion compared to NIS 100.6 billion at the end of 2022.

Mid-market segment

Net income attributable to shareholders in respect of the mid-market segment in the first half of 2023 totaled NIS 628 million, compared to NIS 282 million in the corresponding period last year. The increase stemmed mainly from an increase in net interest income.

Interest expenses, net in the first half of 2023 totaled NIS 1,070 million, compared with NIS 481 million in the corresponding period last year. The increase stems mainly from the increase in deposit spreads, due to the rise in interest rates and increase in credit volumes.Net interest income in the second quarter of 2023 totaled NIS 549 million, compared to NIS 264 million in the corresponding period last year. The increase stems mainly from the increase in deposit spreads, due to the rise in interest rates.

Noninterest income in the first half of 2023 totaled NIS 178 million, compared with NIS 186 million in the corresponding period last year.

Noninterest income in the second quarter of 2023 totaled NIS 79 million, compared with NIS 87 million in the corresponding period last year.

In the first half of 2023, loan loss expenses were recorded in the amount of NIS 40 million, compared to an expense of NIS 13 million in the corresponding period last year.

In the second quarter of 2023, loan loss expenses were recorded in the amount of NIS 62 million, compared to income of NIS 7 million in the corresponding period last year. Most of the increase stems from the collective provision, primarily due to the macroeconomic uncertainty.

Operating and other expenses for the first half of 2023 totaled NIS 224 million, compared with NIS 224 million in the corresponding period last year.

Operating and other expenses for the second quarter of 2023 totaled NIS 123 million, compared with NIS 113 million in the corresponding period last year.

Outstanding loans to the public as of March 30, 2023 totaled NIS 40.7 billion compared to NIS 39.5 billion as at the end of 2022.

Balance of deposits by the public as of June 30, 2023 totaled NIS 65.2 billion compared to NIS 70.1 billion at the end of 2022.

Corporate segment

Net income attributable to shareholders in respect of the corporate segment in the first half of 2023 totaled NIS 974 million, compared to NIS 762 million in the corresponding period last year. The increase stemmed mainly from net interest income and from an increase in income from fees and commissions. This increase was partially offset by an increase in loan loss expenses.

Interest expenses, net in the first half of 2023 totaled NIS 1,492 million, compared with NIS 989 million in the corresponding period last year. The increase stems mainly from the increase in deposit spreads, due to the rise in interest rates and growth in credit activity in the construction and real estate sectors.

Net interest income in the second quarter of 2023 totaled NIS 765 million, compared to NIS 538 million in the corresponding period last year. The increase stems mainly from the increase in deposit spreads, due to the rise in interest rates and growth in credit activity in the construction and real estate sectors.

Noninterest income in the first half of 2023 totaled NIS 417 million, compared with NIS 318 million in the corresponding period last year. The increase stems mainly from fees and commissions from financing business and fees and commissions from handling credit, in view of the increase in the volume of activity.

Noninterest income in the second quarter of 2023 totaled NIS 205 million, compared with NIS 160 million in the corresponding period last year. The increase stems mainly from fees and commissions from financing business, in view of the increase in the volume of activity.

In the first half of 2023, loan loss expenses were recorded in the amount of NIS 127 million, compared to income of NIS 83 million in the corresponding period last year. The increase stems from both the specific and the collective provision.

In the second quarter of 2023, loan loss expenses were recorded in the amount of NIS 4 million, compared to income of NIS 83 million in the corresponding period last year.

Outstanding loans to the public as of March 30, 2023 totaled NIS 141.4 billion compared to NIS 126.6 billion as at the end of 2022.

Balance of deposits by the public as of June 30, 2023 totaled NIS 87.1 billion compared to NIS 97.7 billion at the end of 2022.

Financial management segment

The net income (loss) of the financial management segment attributable to the Bank's shareholders for the first half of 2023 was NIS (409) million, compared with NIS 1,042 million in the corresponding period last year. The results of this segment in the current period include the expense for impairment of the investment in associate Valley, which was made in the first quarter of 2023 (for more information, please see Note 16.A).Total interest expenses, net in the first half of 2023 totaled NIS 73 million, compared to interest income, net of NIS 1,697 million in the corresponding period last year. Due mainly to a decrease in the nostro, income from the management of capital and the exposures and from the change in the CPI.

Total interest expenses, net in the second quarter of 2023 totaled NIS 129 million, compared to interest income, net of NIS 879 million in the corresponding period last year. Due mainly to a decrease in the nostro, income from the management of capital and the exposures and from the change in the CPI.

Operating and other expenses for the first half of 2023 totaled NIS 123 million, compared with NIS 205 million in the corresponding period last year, primarily due to lower salary expenses.

Major Investee Companies

As of the report's publication date, the Leumi Group is mainly active in Israel, through the Bank and subsidiaries which serve as financial services companies. In addition, the Group continues to invest both in financial and non-financial corporations which do not engage in banking.

For information regarding the merger of the subsidiary Bank Leumi USA with Valley on April 1, 2022, see the section "Major Investee Companies" in the Report of the Board of Directors and Management for 2022 and for information regarding a restructuring in Bank Leumi UK (BLUK), please see details later in this section, under "Consolidated Companies Outside Israel".

The Bank's total investments in investees (including in capital notes) as of June 30, 2023, was NIS 16.4 billion, compared with NIS 13.7 billion as of December 31, 2022; most of the increase in the first half of 2023 stems mainly from the following changes that occurred in the first quarter of 2023: Issuance of a capital note in the amount of GBP 701 million to LABL of the Leumi UK Group, which was offset by the impairment of the Bank's investment in associate Valley; for more information, please see Note 16.A.In addition, the contribution of the investees to the Group's net income in the first half of 2023 amounted to a loss of NIS 719 million, compared to a profit of NIS 370 million in the corresponding period last year. The loss is due to the impairment of the Bank's investment in Valley in the first quarter of 2023, as stated above.

Consolidated Companies in Israel

The Bank's total investments (including in capital notes) in its Israeli consolidated subsidiaries was NIS 8,441 million as of June 30, 2023, compared to NIS 8,292 million as of December 31, 2022. The contribution of the consolidated companies in Israel to the Group's net income in the first half of 2023 was NIS 101 million, compared with NIS 189 million in the corresponding period last year; the decrease stems mainly from the activity of subsidiary Leumi Partners.

Leumi Partners Ltd.

Leumi Partners is the Leumi Group's investment and merchant banking arm.

On July 19, 2020, the Bank of Israel informed the Bank that regarding the group limit on non-financial investments, the Bank should follow the risk appetite to be set for that purpose, subject to assessment and challenging procedures to be executed by the lines of defense, including the Internal Audit Division and subject to meeting the non-financial investment limit, in accordance with Section 23A to the Banking Licensing Law.

Foreign Consolidated Companies (Offices)

The Bank's total investments (including in capital notes) in its foreign offices was NIS 5,300 million as of June 30, 2023, compared to NIS 1,772 million as of December 31, 2022.

In the first half of 2023, the foreign offices' contribution to the Group's shekel net income was NIS 204 million, compared with NIS 147 million in the corresponding period last year.

The Bank's Subsidiary in the UK

On March 8, 2022, the Bank's board of Directors approved the recommendation of BLUK's board to implement a measure which includes returning BLUK's regulatory license, such that after the measure will have been completed, BLUK will be a credit provision company. For this purpose, BLUK's activity will be merged into LABL, a subsidiary of BLUK (hereinafter - "Leumi UK Group").

Leumi UK Group provides credit primarily in the fields of real estate, hotels and ABL, only to commercial customers in the UK and Europe, including Israeli customers active in these geographic areas, including investments and development of residential real estate and financing for commercial real estate (retirement homes and student dormitories). Funding is extended both to customers in and outside the UK (mainly Israeli).

All the conditions required for the organizational change process were met, including the transfer of all business activity from BLUK to Leumi UK Group, an announcement of voluntary liquidation of BLUK and the UK regulator's confirmation regarding the revocation of BLUK's banking license. The aforementioned organizational change process was thus completed.

Risk Exposure and Management Thereof

The information in this chapter does not include all the information required in full annual financial statements, and this section should be read along with the detailed information provided in the Report of the Board of Directors and Management as at December 31, 2022 and the 2022 Risk Management Report.

The Bank's business activity involves managing financial and non-financial risks. The key financial risks managed by the Bank are as follows: credit risks, which are integral to the Bank's core business, as well as market and liquidity risks. In addition to financial risks, the Bank's activity poses non-financial risks, the management of which is a necessary precondition to meeting the Group's ongoing and long-term goals. These risks include operational risks, such as technological and cyber risks, regulatory risk, compliance risk, legal risk, reputational risk, strategic risk, model risk, environmental risk, conduct risk, and macroeconomic risk.

Leumi's risk strategy management is to maintain the Group's stability and support the achievement of its business objectives. These objectives are achieved while meeting the predefined risk appetite, the policy and the limitations deriving therefrom, which form the boundaries for the Bank's business activity. The risk management framework includes mechanisms for identifying and estimating risks, defining the corporate structure and areas of responsibility for managing risk as well as putting in place adequate control and reporting mechanisms.

The Bank continually upgrades its risk management infrastructure and analyzes the risk outlook, to enable informed decision-making.

Credit Risks

Credit provision is a core activity of the Bank and Group and is conducted in a decentralized manner by various business lines.

Credit risk is the Bank's risk of loss as a result of the possibility that a counterparty fails to meet its agreed commitments towards the banking corporation.

Activities which embody credit risk include on- and off-balance sheet credit risk, such as: Loans to the public; loans to banks; loans to governments; deposits with banks; investments in bonds and exposures for activity in derivatives.

The Bank applies a comprehensive risk management policy in line with the requirements of Proper Conduct of Banking Business Directive No. 311, "Credit Risk Management", Proper Conduct of Banking Business Directive 311A, "Management of Consumer Credit" and Proper Conduct of Banking Business Directive No. 314, "Sound Credit Risk Assessment and Valuation for Debts", including the accountability of management and the Board of Directors. In addition, the Bank is meticulous about managing risk in compliance with further guidelines and requirements included in the Banking Supervision Department's directives, implementing corporate governance which includes three "lines of defense".

As part of its credit risk management, the Bank monitors the quality of its credit portfolio, including the overall adequacy of its loan loss provision to cover losses embodied in the loan portfolio; the credit portfolio concentration level and activity by main products, such as: credit granted to the construction and real estate sector; housing loans; credit granted to private individuals; housing loans and leveraged credit.

As part of the credit risk management, on a regular basis, adjustments are made to the credit risk management and risk appetite, as necessary.

In the first half of 2023, there were no material changes in the corporate governance structure related to credit risk.

Macroeconomic effects

The Bank's activity is affected, among other things, by macroeconomic developments in the local business environment and the slowdown in global economic activity.

The economic activity in the local economy continues to grow, but at a slower pace. The slowdown is reflected, among other things, in a real decrease in the pace of new apartment sales, as well as in the consequences of the increase in the interest on borrowers, with an emphasis on leveraged borrowers and private individuals. There is also a slowdown in Israel's high-tech export activity.

The Bank monitors - on a regular basis, across all business lines - risk focus areas and also regularly examines the effect of the increase of the interest rate in the economy on portfolio credit risk, including through various sensitivity scenarios.

Israel is undergoing public legislative and social events, regarding which there is uncertainty as to their development and the degree of their impact on the Israeli economy in the mid- to long term, and as a result - on the Bank's results. The longer the macroeconomic effects and public legislative and social events continue, the greater the concern of a negative impact. In the interest rate decision of July 10, 2023, the Bank of Israel re-emphasized that the main risk to the growth of the Israeli economy is the materialization of a scenario in which legislative and institutional changes will be accompanied by an additional increase in the country's risk premium in addition to the continued devaluation of the NIS, damage to exports resulting from a decrease in Israel's attractiveness of Israel as a trade partner and a decrease in local investment and in the demand for private consumption.

For more information on this topic, please see the section entitled "Main Developments in the Israeli Economy" in the Report of the Board of Directors and Management and for the macroeconomic risk, please see the section "Other Risks" below.

The loan loss expense in the first half of 2023 was NIS 724 million, of which an expense of NIS 36 million - in the specific provision and an expense of NIS 688 million in the collective provision. The collective expense in the first half of 2023 was affected by continued growth in the credit portfolio, an increase in the amount of troubled debts and from the worsening of the macroeconomic forecasts described above, which were reflected in a provision mainly in the first quarter of 2023. A loan loss provision is an estimate based on significant judgment, which was exercised during a changing environment.

For more information, please see the section entitled "Main Developments in the Israeli Economy" in the Report of the Board of Directors and Management.

The loan loss provision methodology is comprised, inter alia, of past experience, a qualitative level - which includes a comprehensive framework for qualitative adjustments (Q factor) and macroeconomic forecasts, and naturally involves significant judgment.

Due to the uncertainty currently prevalent in the markets and the effects it may have on the condition of households and businesses in Israel, as described above, the provision may change in the future due to developments.

Some of the above information constitutes "forward-looking information". For the meaning and implications of the term, please see under "Forward-Looking Information".

For more information and details regarding developments in the credit portfolio and the qualitative indicators characterizing the portfolio, please see below in this section as well as in the Risk Management Report as at December 31, 2022.

State-backed loans (the Coronavirus Fund)

Against the background of the coronavirus outbreak, the Bank signed agreements with the state (which were revised from time to time) for extending state-backed loans as part of the "Coronavirus Funds", the purpose of which is to aid businesses (small, mid-sized and large), which encounter cash flow difficulties as a result of the crisis. The loan covenants were determined by the Ministry of Finance and were uniform for all borrowers.

Obtaining guarantees from the State has helped the Bank support the needs of its customers and positively contributed to the quality of the Bank's loan portfolio.

As of June 30, 2023, the outstanding balance of state-guaranteed loans is NIS 2,721 million.

Credit risk and non-performing assets

Disclosure, Valuation, Classification and Rules for Loan Loss Provision

For loan loss expenses and classification of troubled debts, the Bank applies the Banking Supervision Department's directives, which became effective on January 1, 2022 and adopt US GAAP for loan loss expenses (CECL) as well as additional specific directives regarding housing loans and additional revised directives of the same date on debt classification. According to the revised methodology, the loan loss provision is comprised both of a quantitative element and a qualitative element. As a rule, the Bank's estimates are based on past losses after adjustment due to credit characteristics, adjustment for current economic conditions and reasonable future forecasts. Depending on the credit portfolio, the quantitative components are based, inter alia, on net charge-offs, probability of default and loss given default. These estimates take into account several risk and economic characteristics, such as past losses, the risk groups' risk profile, debt classification, composition of the credit portfolio, state of collateral, risk appetite, current economic and expected conditions, etc. The Bank's estimates include assessments which reflect, inter alia, conditions of uncertainty and may naturally change from time to time. For more information on the application of the new accounting rules, please see Note 1.X.1 to the financial statements as of December 31, 2022.

Following is a breakdown of qualitative analysis indicators of loans to the public, expenses and loan loss provision

	June 30, 2023			
	Commercial	Housing	Private individuals - other	Total
	In %			
Analysis of quality of loans to the public				
Percentage of non-performing loans (NPL) to the public out of outstanding loans to the public	0.61	0.44	0.91	0.58
Percentage of non-performing loans to the public or in arrears of 90 days or more out of outstanding loans to the public	0.64	0.44	1.20	0.62
Percentage of troubled loans to the public out of outstanding loans to the public	2.16	0.45	2.97	1.71
Percentage of non-investment grade credit out of outstanding loans to the public	2.39	1.41	8.24	2.53
Analysis of expenses for loan losses for the reporting period[(a)]				
Percentage of loan loss expenses out of the average outstanding balance of loans to the public[(a)]	0.37	0.07	1.63	0.36 [(b)]
Percentage of net write-offs for loans to the public out of average outstanding loans to the public[(a)]	0.05	-	1.04	0.11
Analysis of the loan loss provision in respect of loans to the public				
Percentage of balance of the loan loss provision for loans to the public out of outstanding loans to the public	1.62	0.37	2.59	1.32
Percentage of balance of the loan loss provision for loans to the public out of non-performing outstanding loans to the public	264.85	84.10	284.95	226.34
Percentage of balance of the loan loss provision for loans to the public out of outstanding non-performing loans to the public or in arrears of 90 days or more	252.81	84.10	214.86	211.74
Ratio of outstanding loan loss provision for loans to the public out of the net write-offs for loans to the public[(a)]	31.08	115.00	2.52	12.02

(a) Annualized.
(b) Including loan loss expenses for loans to the public, banks, governments and bonds.

Following is a breakdown of qualitative analysis indicators of loans to the public, expenses and loan loss provision (cont.)

	June 30, 2022			
	Commercial	Housing	Private individuals - other	Total
	In %			
Analysis of quality of loans to the public				
Percentage of non-performing loans (NPL) to the public out of outstanding loans to the public	0.83	0.45	0.64	0.70
Percentage of non-performing loans to the public or in arrears of 90 days or more out of outstanding loans to the public	0.93	0.45	0.87	0.78
Percentage of troubled loans to the public out of outstanding loans to the public	2.12	0.50	2.32	1.64
Percentage of non-investment grade credit out of outstanding loans to the public	2.67	2.08	6.74	2.81
Analysis of income for loan losses for the reporting period[(a)(c)]

(g) Regarding the results without Bank Leumi USA, loan loss income from total foreign operations - public amounted to approx. NIS 25 million and net charge-offs amounted to approx. NIS 136 million.

Risks to the construction and real estate industries

Activity and risk boundaries in the construction and real estate industry

The construction and real estate sector is an area of activity to which the Bank has a significant credit exposure. As with other economic sectors, the bank's credit policy outlines internal methodologies and criteria for financing transactions in each of the real estate industry's sub-industries.

Credit granted to the real estate sector is in line with the Bank's risk appetite, in accordance with strict underwriting, a stringent financing and supervision method, property collateral and adequate pricing.

As a result, and in an effort to continue being a dominant player in the industry, the Bank strives to make optimal and effective use of the internal and regulatory restrictions in light of the macroeconomic forecasts.

The Bank closely monitors the real estate credit portfolio, while following macroeconomic trends and the development of the segment's risk characteristics.

Leumi continues to proactively expand the real estate portfolio, focusing on the housing segment and selected financially resilient customers. The Bank is careful to maintain geographical diversification of the projects, according to demand and macroeconomic forecasts.

In accordance with competition conditions in the market, in recent years, growth in the real estate credit portfolio at Leumi was accompanied by a certain increase in financing rates, mainly in the financing of land and of housing projects in high-demand areas. However, in the last year, there was a moderation in the financing rates for land and projects.

As of 2016, the Bank insures its guarantees portfolio in accordance with the Sales Law (Apartments).

Starting from December 31, 2021, the Bank also insures part of the financial credit portfolio for the financing of land, and starting from the fourth quarter of 2022, the Bank also insures part of the performance and formalities guarantee portfolio associated with the construction and real estate sectors.

As of June 30, 2023, the Bank complies with the regulatory limitation. In addition, the Bank set internal limitations that are in line with the Bank's assessment of the risk in the various sub-industries. Nevertheless, considering the significant credit needs in the sector on the one hand and the regulatory limitation on the other, the Bank is working on implementing a plan to reduce the concentration ratio in the sector.

Some of the above information constitutes "forward-looking information". For the meaning and implications of the term, please see under "Forward-Looking Information".

For more information on activity and risk boundaries in the construction and real estate industry, please see the Section "Credit Risks" in the Report of the Board of Directors and Management as at December 31, 2022.

Macroeconomic effects

In 2020-2021 and in the first half of 2022, the residential construction industry was characterized by a significant surge in transactions for the purchase of apartments as a result of the relatively stable demand stemming from the population growth, the supporting macroeconomic environment (strong recovery from the coronavirus crisis and low interest rate environment) and regulatory easements.

However, in as of the second half of 2022, there began a significant decline in demand for housing purchases, on the back of a macroeconomic environment which is growing less supportive of demand for real estate properties as a result of a rapid rise in inflation and interest rates and lower growth rates. Moreover, it is estimated that the high growth rate of the population in Israel will continue to drive demand in the mid- to long-term. On the supply side, the number of finished apartments continued to be relatively low in the past year for the yearly ongoing housing needs of the economy, while housing starts and building permits were similar or even exceeded the number of apartments required according to the current needs that characterized these two years.

The weakening of demand, alongside the level of housing starts, which are still high compared to most of the last decade, has lately resulted in the beginning of a decrease in apartment prices, led by the prices of new apartments on the "free market" (i.e. excluding "Apartment at a Discount" transactions). Further to this, in our assessment, the certain decrease in apartment prices is expected to continue in the coming year. The concern about the adverse effect resulting from political-legislative and social events may also weigh on the activity in the housing market and on prices therein in the near future.

The Bank is closely monitoring the effects of the rise in interest rates and slowdown in the demand for housing on the real estate companies.

In the commercial real estate domain, since the beginning of 2022, there has been a slowdown in the activity of the commercial sectors, in the context of the increase in Israelis' travel abroad and in view of the diminishing effect of the "pent-up demand" once the coronavirus restrictions have been lifted. Looking forward, the deterioration in the macro environment (the damage from inflation and rising interest rates on the public's purchasing power, along with the increasing economic uncertainty and the weakening consumer sentiment), and continued expansion in the share of online commerce may lead to a continued slowdown in the growth of the commercial centers' activity in the coming year. Most of the slowdown is expected in large shopping centers, while neighborhood shopping centers may continue to fare well.

In the office sector, starting from the second half of 2022, a slowdown was felt in market activity, including a decrease in rental prices in Tel Aviv. This slowdown is expected to continue in the coming year, along with the deterioration of the macro environment, especially in the high-tech service industry. It is expected that the supply of new office space will continue to grow substantially (especially in the Tel Aviv suburbs), while the economy continues to slow down; these factors are expected to put pressure on continued rise in prices and occupancy rates in the coming year and even result in their decrease. In this context, the report published by global credit rating agency S&P in May 2023 also warned of the effects of the slowdown in the high-tech sector on the real estate sector, and indicated a risk of excess supply of office space.

As mentioned at the beginning of the Credit chapter, Israel is undergoing public legislative and social events, regarding which there is uncertainty as to their development and the degree of their impact in the medium and long term on the Israeli economy in general and on the construction and real estate sectors in particular, and as a result, on the Bank's customers.

Some of the above information constitutes "forward-looking information". For the meaning and implications of the term, please see under "Forward-Looking Information".

Development of overall credit risk for the construction and real estate industry (in and outside Israel)

	June 30		December 31	Change compared to December 31, 2022

Total credit risk for construction and real estate in Israel				147,846

(a) On-balance sheet credit risk and off-balance-sheet credit risk are stated before the effect of loan loss provision and the effect of permitted collateral for borrower indebtedness.
(b) Financing rate - the ratio between the balance of total credit risk as of the reporting date and the value of the real estate security guaranteeing the credit risk as of the reporting date.
(c) Absorption capacity – an indicator reflecting the maximum rate of erosion of apartment inventory prices such that it provides adequate coverage to the project's costs, taking into account own capital invested and presale.
(d) Most of the outstanding balance is in respect of credit that is also backed by non-land collateral and/or another repayment source.
(e) Starting from the financial statements for 2022, the Bank is implementing the revision of the Bank of Israel circular on the subject of credit risk, with reference to the calculation of the financing rates of land. For more information, please see Regulatory and other changes in measuring the capital requirements.
(f) Other credit refers to all credit that does not meet the definition above and includes, among other things, credit provided against collateral that is not real estate and that is non-residential real estate under construction and real estate under construction that is not available for sale.

Following is the composition of credit secured by real estate properties in Israel - the Bank

	June 30	December 31
	2023	2022
	Overall credit risk[a]	
	In NIS million	
Housing	**79,936**	69,002
Office space	**22,710**	20,803
Industry	**7,638**	6,542
Commerce and services	**23,544**	23,200
Total overall credit risk secured by real estate collateral in Israel	**133,828**	119,547

(a) On-balance sheet credit risk and off-balance-sheet credit risk are stated before the effect of loan loss provision and the effect of permitted collateral for borrower indebtedness.

Analysis of total credit risk in the construction and real estate sectors (in Israel and abroad)

	June 30	December 31	
	2023	2022	
	In NIS million		Change in %
Credit risk in credit performance rating			
Non-troubled Credit Risk	**171,344**	155,309	10.3
Non-investment grade credit risk			
Non-troubled	**375**	407	(7.9)
Troubled performing	**2,015**	1,363	47.8

Total non-investment grade credit risk	**3,112**	2,085	49.3
Total	**174,456**	157,394	10.8

Borrower groups[1]

The Bank conducts orderly monitoring processes to ensure it complies with the restrictions imposed by Proper Conduct of Banking Business Directive No. 313, "Restrictions on Indebtedness of a Borrower or Group of Borrowers".

As of June 30, 2023, the Bank meets the restrictions prescribed by the directive.

In accordance with the policy for the adoption of accepted international standards, the Banking Supervision Department is adopting the Basel Committee provisions from 2014, which was revised in 2019 regarding supervision of large-scale exposures. On November 17, 2022, the Banking Supervision Department published a draft revision of Proper Conduct of Banking Business Directive No. 313, "Limitations on the Indebtedness of a Borrower and of a Group of Borrowers". In accordance with this draft, new definitions will be established for a borrower / borrower group, and also adjustments were made to measure the exposure. In accordance with the Banking Supervision Department's requirement, the Bank conducted a quantitative survey, which was reported to the Banking Supervision Department.

[1] A group of borrowers are all of the following together: the borrower, a person controlling it and all those controlled by them. If a corporation is controlled by more than one person, it is necessary to include in the same group of borrowers the controlling parties for which the controlled corporation is material (such as from an equity standpoint), including the corporation or any other entity under their control. An investee which is material to a holder that is not a controlling shareholder, and any entity under their control. Borrowers that are associated with the investee in such a manner that harming the financial stability of any one of them could affect the financial stability of the other or that the same factors could affect the financial stability of both.

Exposure to Foreign Countries

Part A - Information regarding total exposure to foreign countries and to countries where the total exposure to each country is the lower of the following: More than 1 percent of consolidated total assets or more than 20 percent of total capital for the purpose of calculating the capital ratio:

	June 30, 2023		
	Exposure(a)(b)(c)(e)		
	On-balance-sheet	Off-balance-sheet(d)	Total
	In NIS million

Exposure to Foreign Countries (cont.)

	December 31, 2022		
	Exposure[(a)(b)(c)(e)]		
	On-balance-sheet	Off-balance-sheet[(d)]	Total
	In NIS million		
USA	30,031	9,930	39,961
UK	16,860	21,602	38,462
France	748	1,582	2,330
Switzerland	2,942	3,880	6,822
Germany	6,334	3,590	9,924
Other	22,019	6,402	28,421
Total exposure to foreign countries	78,934	46,986	125,920
Of which: total exposure to GIPS countries[(e)]	427	170	597
Of which: total exposure to LDC countries[(f)]	1,175	1,445	2,620
Of which: total exposure to countries with liquidity issues[(g)]	250	317	567

(a) Exposure to foreign countries is presented based on the final risk.
(b) On-balance sheet credit risk and off-balance-sheet credit risk are stated before the effect of loan loss provision and the effect of deductible collateral for the purpose of restricting indebtedness of individual borrowers and borrower groups.
(c) On balance-sheet credit risk and off-balance-sheet credit risk for derivatives are presented after deducting credit risk.
(d) Credit risk for off-balance sheet financial instruments as calculated for the purpose of per borrower credit indebtedness limitations.
(e) Exposure to the GIPS countries includes: Greece, Italy, Portugal, and Spain.
(f) The Exposure to LDCs line item includes total exposure to countries defined as Less Developed Countries (LDCs), which are classified by the World Bank as low- or mid-income countries.
(g) The Bank set several criteria, according to which a list of several countries was drawn, where the current conditions may reflect liquidity problems and which may have an effect on their solvency. The balance applies to 28 countries (as of June 30, 2022 - 16 countries, as of December 31, 2022 - 16 countries). The measurement does not include exposures to investment-grade countries, unless they were individually identified as having liquidity issues which may have a material effect on their solvency.
(h) On-balance sheet credit risk and off-balance sheet credit risk, as revised in the Reporting to the Public Directives in a circular dated July 24, 2022 following the publication of Directive 203A (for additional details, see under Capital and Capital Adequacy). The comparative figures as of June 30, 2022 were not restated.
(i) The balance includes exposure for insurance policies backing mortgage portfolios in Israel, with the Barbados-based insurance company being a subsidiary of a global Canadian-based insurance group.

Credit Exposure to Foreign Financial Institutions

Credit exposure to foreign financial institutions relates to banks, investment banks, brokers/dealers, insurers and institutional entities.

The Bank closely monitors the position of banks worldwide and frequently analyzes their financial robustness. The Bank maintains a shortlist of high-quality banks to which it has collective credit exposures and as a rule, adequately distributes exposures among the various banks.

The geopolitical events, as well as the measures taken by central banks across the world, may impact the financial stability of financial institutions with which the Bank cooperates.

The Bank monitors the financial position of the foreign financial institutions as part of the management of its exposure to foreign financial institutions and is adjusting its exposure in accordance with changes in the risk environment and assessment of the effect of these changes on the various financial institutions.

Total current credit exposure to foreign financial institutions	36,453	2,756	39,209

	December 31, 2022[(e)]		
	On-balance-sheet credit risk[(b)(f)]	Current off-balance-sheet credit risk[(c)]	Current credit exposure
	In NIS million		
Current credit exposure to foreign financial institutions[(d)]			
AAA to -AA	28,509	1,233	29,742
+A to -A	3,605	1,247	4,852
+BBB to -BBB	204	221	425
+BB to -B	31	21	52
Lower than: -B	10	-	10
No credit rating	572	-	572
Total current credit exposure to foreign financial institutions	32,931	2,722	35,653

(a) Foreign financial institutions include the following: banks, investment banks, brokers/dealers, insurers and institutional entities, as well as entities under their control.
(b) On-balance-sheet credit risk includes: Deposits with banks, loans to the public, securities borrowed or purchased under reverse repurchase agreements, other on-balance sheet credit risk in respect of derivatives, and investments in bonds, including bonds of banks rated "subordinated" total NIS 652 million as of June 30, 2023 (as of June 30, 2022 - NIS 911 million and on December 31, 2022 - NIS 603 million).
(c) Mainly guarantees and commitments to extend credit (excluding off-balance-sheet derivatives).
(d) The Bank uses ratings of well-known rating agencies (ECAIs).
(e) As of June 30, 2023, June 30, 2022 and December 31, 2022, there is no troubled credit risk vis a vis foreign financial institutions.
(f) On-balance sheet credit risk, as revised in the Reporting to the Public Directives in a circular dated July 24, 2022 following the publication of Directive 203A (for additional details, see under Capital and Capital Adequacy). Comparative figures were not restated.
(g) Of which: to the US - on-balance sheet credit risk of NIS 5,596 million and off-balance sheet credit risk of NIS 186 million. The vast majority of institutions for which there is credit risk are rated A- and higher and they are not regional banks.

Comments:
1. The credit exposures do not include investments in asset-backed securities (for more information, please see Note 5).
2. Some of the banks received various forms of government support, including by way of direct equity investment, government guarantees for certain asset portfolios, guarantees for raising funds for the banks, etc.
3. For more information regarding the composition of credit exposures for derivatives with banks and brokers/dealers (local and foreign), please see Note 11.

Housing Loans Portfolio Risks

Credit risk developments

The rising interest rate trend and high inflation, combined with the high housing prices, led to a decrease in activity in the Israeli housing market starting from the second half of 2022.
The first to moderate their market activity were investors, followed by other households, with emphasis on young couples who are waiting for new government programs.
Accordingly, there is a decline in new housing loan performance in Israel in the first half of 2023 compared to the corresponding period last year.

The mortgage market is characterized by significant competition that escalated in this period in view of the market's "contraction".

The Bank continues to adhere to a balanced underwriting policy that takes into consideration the borrower's repayment capacity, linkage base and interest, loan-to-value ratio (LTV), etc., while complying with all of the requirements of the Banking Supervision Department.

The housing loan portfolio is monitored and the trends in its characteristics and risk centers analyzed on a regular basis, including analysis of the effect of the rising interest rate and expected inflation.

In order to assist customers in view of the increase in the interest rate on the monthly payments, a proactive appeal was made to the customers in a public advertisement and in targeted contact with customers for whom the change in the interest rate affected the amount of their payments, with a proposal to consider a freeze/recycling. As a result, there is an increase in the number of freezes. However, in absolute terms, the amount is not large (NIS 1.7 billion as of the end of June 2023).

Starting from June 30, 2023, the Bank insures an (immaterial) part of the mortgage loan portfolio according to agreed criteria.

Performance of new loans and refinancing loans for the purchase of residential apartments and mortgaging of residential apartments in Israel

	For the six months ended June 30		Rate of change
	2023	2022	
	In NIS million		In %
By the Bank	**10,479**	15,902	(34.1)
By the Government of Israel	**85**	60	41.7
Total new loans	**10,564**	15,962	(33.8)
Old recycled loans, from the Bank's funds	**1,091**[(a)]	1,568	(30.4)
Total performance	**11,655**	17,530	(33.5)

(a) Including freezes that were carried out for a period of more than three months.

The average loan extended by the Bank in the first half of 2023 was NIS 936 thousand, compared to NIS 984 thousand in the first half of 2022 and NIS 988 thousand in 2022.

Development of total outstanding housing loans in Israel, net

	Outstanding loans portfolio	Rate of change
	In NIS million	In %
December 31, 2021	103,109	15.1
December 31, 2022	119,272	15.7
June 30, 2023	**123,542**	**3.6**

As part of its monitoring of risk centers in the housing loans portfolio, the Bank also monitors characteristics of the portfolio and new credit, including the new credit's breakdown by loan-to-value ratios (loan-to-value ratio (LTV) is the ratio of total credit approved for the borrower - even if it has not yet been actually extended either in full or in part - out of the value of the mortgaged property during the approval of the credit facility) and the repayment ratio (the repayment ratio is defined as the ratio between the available monthly income and monthly repayment).

Development of the outstanding housing loans portfolio based on linkage bases and as a percentage of the Bank's outstanding loans portfolio

	Non-linked segment				CPI-linked segment				Foreign currency segment		Total loans portfolio, in NIS million
	Fixed interest		Variable interest		Fixed interest		Variable interest		Variable interest		
	Balance in NIS million	Percentage of the loans portfolio	Balance in NIS million	Percentage of the loans portfolio	Balance in NIS million	Percentage of the loans portfolio	Balance in NIS million	Percentage of the loans portfolio	Balance in NIS million	Percentage of the loans portfolio	
December 31, 2021	23,325	22.6	42,655	41.4	15,203	14.7	21,440	20.8	486	0.5	103,109
December 31, 2022	29,061	24.3	49,991	41.9	16,050	13.5	23,694	19.9	476	0.4	119,272
June 30, 2023	30,094	24.3	51,086	41.4	17,329	14.0	24,553	19.9	480	0.4	123,542

Variable interest loans are exposed to an increase in interest and inflation rates, which could affect borrowers' repayment capacity.

Development of new housing loans by interest track, in Israel

The following table outlines the development of the new credit performance by variable and fixed interest tracks (a variable-interest loan's interest rate may change over the loan period):

	2023		2022				2021
	Q2	Q1	Q4	Q3	Q2	Q1	Annual average
	Rate of performance						
	In %						
Fixed - linked	**20.3**	16.8	12.7	9.1	8.6	9.2	13.9
Variable every 5 years or more - linked	**9.9**	9.8	6.0	5.9	9.3	12.4	15.3
Variable up to 5 years - linked	**3.9**	6.9	9.8	8.9	6.6	4.5	1.2
Fixed - non-linked	**21.9**	25.0	29.0	30.8	32.4	32.4	28.2
Variable every 5 years or more - non-linked	**15.3**	5.3	1.7	0.6	1.0	1.3	1.5
Variable up to 5 years - non-linked	**28.2**	35.9	40.6	44.6	42.0	40.0	39.8
Variable - Foreign currency	**0.5**	0.3	0.2	0.1	0.1	0.2	0.1

The percentage of new variable-interest housing loans granted by the Bank during the first half of 2023 was 58.0 percent, compared to 58.9 percent in 2022.

Following is a balance of the housing loans portfolio and balances of non-performing debts or in arrears of over 90 days, in Israel

	Recorded outstanding debt	Amount in arrears or non-performing	Percentage of recorded outstanding debt
	In NIS million		In %
December 31, 2021	103,599	609	0.59
December 31, 2022	119,690	559	0.47
June 30, 2023	124,003	547	0.44

As of June 30, 2023, the outstanding loan loss provision for the housing loans portfolio is NIS 461 million, constituting 0.37 percent of the housing loans' outstanding balance as of that date, compared with NIS 419 million as at December 31, 2022, which also constitutes 0.35 percent of the outstanding housing loan balance as of that date.

Development of LTV ratio for new loans over 60 percent, in Israel

Following is the development in new credit granted by the Bank at an LTV ratio of over 60 percent, (LTV ratio is the ratio of the total loan granted to the borrower - even if it has not yet been granted in effect either in full or in part - out of the value of the pledged property during the approval of the credit facility):

	2023	2022					2021
	Q2	Q1	Q4	Q3	Q2	Q1	Annual average
LTV ratio	In %[(a)]						
Over 60 and up to 70, inclusive	**20.4**	20.9	21.9	22.4	22.7	23.2	21.6
Over 70 and up to 75, inclusive	**22.5**	25.0	24.4	25.6	25.8	25.4	23.1
Over 75	**0.2**	0.2	0.3	0.3	0.2	0.2	0.1

(a) Out of total new credit granted by the Bank.

Development of the loan-to-value (LTV) ratio, outstanding loans portfolio in Israel

The average LTV of the outstanding loan portfolio as at June 30, 2023 stands at 48.7 percent, similar to that of 2022 (a rate of 48.5 percent).

Development of new loans, in which the repayment ratio is lower than 2.5, in Israel

Repayment ratio is defined as the ratio between the monthly available income and the monthly repayment amount.
The percentage of loans granted in the first half of 2023 with a repayment ratio of less than 2.5 on the loan approval date was 0.67 percent of the total number of new loans granted compared with 0.36 percent in 2022.
The calculation is in accordance with the Bank of Israel's Reporting Directive No. 876.

Development of new loans, for which the loan term is longer than 25 years, in Israel

In the second quarter of 2023, the percentage of new housing loans in which the loan terms under the loan agreements are longer than 25 years, stood at an average of 59.5 percent of the total new loans, compared with an average of 49.6 percent in 2022.

For more information, please see the section entitled "Credit Risks" in the Report of the Board of Directors and Management as at December 31, 2022.

Credit Risk for Loans to Private Individuals (Excluding Housing Loans)

Credit granted to private individuals whose repayment capacity is largely based on their household's earning capacity is characterized by a very significant diversification of borrowers and a variety of credit products (various types of loans, current accounts, credit cards) and - to a lesser extent (on average) - credit per individual customer.
Individual customers' activity is almost entirely concentrated in the Banking Division.

The retail credit policy, formulated by the Risk Management Division in collaboration with the Retail Banking Division, constitutes a key element in outlining the risk appetite and ongoing management of this domain.

The Bank extended and boosted the ongoing monitoring of its entire consumer credit portfolio, while adhering to strict underwriting, there is ongoing monitoring at the individual borrower and aggregate level, based, inter alia, on an internal set of indicators.

In view of the private consumption trends in the Israeli economy and against the backdrop the macroeconomic changes affecting households, especially due to the increase in interest and inflation rates, the Bank closely monitors, on an ongoing basis, the credit portfolio and the effects of these developments on the portfolio's risk profile.

The macroeconomic changes, with emphasis on the rising interest rates, affect the repayment capacity of private borrowers, mainly leveraged borrowers and borrowers at variable interest. The longer the macroeconomic effects continue, the greater the concern of an adverse impact.

For more information and details regarding macroeconomic effects, please see the section Macroeconomic effects at the beginning of this chapter.

For more information about this segment, please see under "Credit Risks" in the Report of the Board of Directors and Management as at December 31, 2022.

Car purchase loans (secured)	1,370	3.0	1,440	3.3
Other loans	22,224	48.1	22,260	51.1
Total on-balance-sheet credit risk	30,699	66.5	30,369	69.7
Unutilized current account credit facilities	7,359	15.9	7,172	16.5
Unutilized credit card facilities	7,710	16.7	5,636	12.9
Other off-balance-sheet credit risk	407	0.9	384	0.9
Total off-balance-sheet credit risk	15,476	33.5	13,192	30.3
Total overall credit risk	46,175	100.0	43,561	100.0

Distribution of on-balance-sheet credit risk (excluding derivatives) for loans granted by the Bank to private individuals, by linkage segment and interest track (in Israel, excluding housing loans)

	June 30, 2023				
	Non-linked	Linked	Foreign currency	Total on-balance-sheet credit risk	% of portfolio
	In NIS million				In %
Variable interest loans[(a)]	28,108	34	107	28,249	92.0
Fixed interest loans	2,386	11	53	2,450	8.0
Total on-balance-sheet credit risk	30,494	45	160	30,699	100.0

	December 31, 2022				
	Non-linked	Linked	Foreign currency	Total on-balance-sheet credit risk	% of portfolio
	In NIS million				In %
Variable interest loans[(a)]	28,069	33	97	28,199	92.9
Fixed interest loans	2,121	11	38	2,170	7.1
Total on-balance-sheet credit risk	30,190	44	135	30,369	100.0

(a) Variable interest loans are exposed to an increase in interest rates, which could affect borrowers' repayment capacity. As stated above, the Bank monitors the private individuals loan portfolio on an ongoing basis, including analysis of the expected effects in case the interest rate continues to rise.

Balances of the financial assets portfolio of private individuals with the Bank, with an overall credit risk (in Israel, excluding housing loans)

	June 30	December 31
	2023	2022
	In NIS million	
Deposits by the public	109,587	104,855
Securities portfolios	54,779	51,419
Total financial asset portfolio	164,366	156,274
Total indebtedness to customers with financial asset portfolios	33,522	31,779

Distribution of on-balance-sheet credit risk (excluding derivatives) for loans granted by the Bank to private individuals, by fixed income amount[(a)] (in Israel, excluding housing loans)

	June 30, 2023		December 31, 2022	
Level of income	In NIS million	In %	In NIS million	In %
Accounts without fixed income	3,659	11.9	3,258	10.7
Of which: loan accounts[(b)]	1,681	5.5	1,786	5.9
Less than NIS 10 thousand	6,390	20.8	7,091	23.4
More than NIS 10 thousand and less than NIS 20 thousand	10,522	34.3	10,381	34.2
NIS 20 thousand or more	10,128	33.0	9,639	31.7
Total	30,699	100.0	30,369	100.0

(a) The fixed income amount deposited in a customer's current account (by ID number) includes the fixed credits to the customer's account, such as salary, transfers from another bank or bank account, cash deposits, checks, etc. The fixed monthly income is calculated according to the average income on several consecutive months, less exceptional credits.
(b) A loan account is an account whose only purpose is to repay a loan, while most of the customer's current account activity takes place in another bank.
(c) As aforesaid, the Bank's credit policy towards private individuals is based on a borrower's repayment capacity in relation to his/her income. As a result, over 85 percent of balance-sheet credit is from fixed-income earners.

Distribution of on-balance-sheet credit risk (excluding derivatives) in respect of loans granted by the Bank to private individuals (in Israel, excluding housing loans)

	June 30	December 31
	2023	2022
	In NIS million	
Non-troubled credit	29,787	29,631
Troubled performing loans	633	516
Troubled non-performing loans	279	222
Total on-balance-sheet credit risk	30,699	30,369
Percentage of troubled credit risk out of balance sheet credit risk for private individuals	3.0%	2.4%
Charge-offs, net (for the period ended)	159	129
Balance of loan loss provision	794	711

For more information, including regarding troubled debt and loan loss expenses, please see Note 6, Note 13, and the section entitled "Risk Exposure", "Credit Risk", under the "Total Credit Risk to the Public by Economic Sector". and in the Credit Risks section in the Report of the Board of Directors and Management as at December 31, 2022.

For more information about this segment, please see under "Credit Risks" in the Report of the Board of Directors and Management as at December 31, 2022.

The Bank's Exposure to Leveraged Loans

According to Proper Conduct of Banking Business Directive No. 311, the Bank's credit policy should also address leveraged financing. The Bank's credit policy for this segment is subject to unique principles, including with respect to financial criteria, credit authorizations, etc.

For more information, please see the Report of the Board of Directors and Management as at December 31, 2022.

The outstanding exposure in the table above is after charge-offs.

For additional qualitative and quantitative information regarding credit risks, please see the Risk Management Report as at June 30, 2023.

Market Risks

Market risk is defined as the risk of loss arising from a change in the value of assets and liabilities due to changes in market prices, interest rates, exchange rates, inflation rate and stock prices. Market risk exposure is reflected in the financial performance, in the fair value of the assets and liabilities, in shareholders' equity and in cash flows.

The Bank complies with the Banking Supervision Department's directives regarding management of the Group's market risks, including Proper Conduct of Banking Business Directive No. 333, "Interest Rate Risk Management", and No. 339, "Market Risk Management". To implement these directives, the Bank established basic principles and control mechanisms for these risks, including defining the purviews of management and the Board of Directors, the means of control and tools for measuring risk and the means of control as well as oversight of these risks, while implementing corporate governance which includes three lines of defense. For a description of the organizational structure and responsibility for the risk management, please see the Additional Information regarding the Exposure to Risk and its Assessment in the Risk Management Report.

During the first half of 2023, there were no material changes in the corporate governance structure, policy and market risk management framework.

From the end of 2021, there has been a step up with regard to the price increases in the developed countries with an emphasis on the United States and Europe. These price increases are a result of the consequences of the coronavirus crisis relating to the supply chains and the flow of substantial funds from the various central banks, of the effects of the war in Ukraine, including on energy prices, and as a result of other effects related to the demand side in the context of wage increases in the labor market.

The increase in inflation rates and inflation forecasts has resulted in central banks launching sharp interest rate increases in order to slow down price increase rates, even at the cost of a significant slowdown in economic activity. The interest rate increases by the central banks in Israel and around the world continued into the second quarter of 2023, although at a more moderate intensity, and it appears that the monetary contraction is nearing its peak.

The Bank tracks and closely monitors developments, applying stringent risk management practices, applying stress scenarios, and continuously examining the development of events and modes of operation in order to prepare in advance and adapt its activity as needed.

Market Risk Management Policy

The market risk management policy is an expression of the Group's market risk management strategy. This in addition to existing procedures for identifying, measuring, monitoring, developing and controlling market risk. The policy is designed, on the one hand, to support the achievement of business objectives while assessing the risks and rewards that may arise from exposure to the risks compared with the expected gains therefrom and, on the other hand, to mitigate the risk level arising from the Bank's ongoing activities, including by maintaining a high level of liquidity.

The policy constitutes an important tool for defining the Bank's risk appetite for its own (nostro) account, trading rooms and market exposure across the entire Leumi Group. The policy outlines the corporate governance, division of organizational responsibilities and escalation mechanisms. The risk appetite is reflected in the established restrictions.

As part of the market risk management policy, the Board of Directors prescribed restrictions for each material market risk. In addition, restrictions were placed at the Chief Risk Officer level as well as additional restrictions complementing them. The purpose of the restrictions is to limit the damage that can be caused as a result of unexpected changes in various market risk factors, such as interest rates, inflation, exchange rates, marketable credit spreads and stock prices.

The exposures to market risks are routinely managed at the Group level.

Market risk management is performed in two risk centers – the banking portfolio and the held-for-trading portfolio.

In order to oversee and monitor the implementation of the market risk management policy, the Board of Directors receives, once every quarter, a report on the main market risk exposures vs. the restrictions placed and main risks by business line, product and risk center, as well as reports on unusual events.

Exposure to market risks arising from the employee pension liabilities

The Bank applies US GAAP to employee benefits, as prescribed by the Bank of Israel. The long average duration actuarial obligation to employees is significantly impacted by changes in the discount rate. The discount rate used for calculating the actuarial liabilities for employee benefits is based - according to the directives of the Bank of Israel - on the Government of Israel's bond yield curve plus the fixed spread curve of globally rated AA corporate bonds which match the average durations of the liabilities for employee benefits.

Interest Rate Risk

Interest rate risk is the risk of gains or capital arising from interest rate fluctuations and stems from several sources, as follows: repricing risk (timing differences in terms to maturity and repricing dates of assets, off-balance-sheet liabilities and positions); yield curve risk (unexpected fluctuations in the yield curve); basis risk (less than perfect correlation between interest rate changes in various financial markets or in various instruments with similar repricing characteristics); and optionality risk (change in the timing or scope of cash flows from a financial instrument due to changes in market interest rates).

The Bank manages the interest rate risk and its effect on profitability, equity, assets and liabilities, under various assumptions of interest rate changes, including severe interest rate stress scenarios based on historic scenarios and hypothetical simulations. The Bank also uses a model which estimates the change in the expected finance income as a result of changes in the interest rate and future interest rate spread as well as the sensitivity of regulatory capital, which includes the effects on capital and capital reserve of a sudden change in the interest rate. These indicators are restricted by various hierarchical levels.

In effect, the interest rate risk is measured and managed on the basis of various behavioral assumptions regarding repayment dates of the assets and liabilities. According to past experience, the Bank treats some of the current account balances as a long-term liability. In addition, assumptions about early repayments of mortgages are based on a statistical model that attempts to forecast early repayment based on interest rates. Such estimates are of great significance in managing interest rate risks, inter alia, due to the marked increase in these balances in recent years. In the context of the sharp interest rate increases, several adjustments were made in these models along with ongoing monitoring and follow-up.

The tools for managing the exposures in the banking portfolio are: the price policy; the management of the Bank’s own bonds portfolio; the issue of debt instruments; off-balance sheet transactions, and more. In addition, the exposures management relies, inter alia, on forecasts and work assumptions regarding the expected developments in the money and capital markets in Israel and abroad.

The exposure to interest rate changes is measured for both increases and decreases in interest rates in each linkage segment. The measurement is designed to test the sensitivity of the current value structure of assets and liabilities, including pension liabilities, to an interest rate change.

As a rule, interest rate sensitivity is measured at least once a month.

On March 12, 2023, the draft Proper Conduct of Banking Business Directive 333, Interest Rate Risk in the Banking Portfolio was published and on June 1, a revision to the draft was published. The directive is expected to enter into effect in December 2024. The Bank is studying the directive and preparing for its implementation.

For more information, please see the section entitled Interest Rate Risk, please see the Risk Management Report as at December 31, 2022.

Discontinuation of LIBOR

In March 2021, the British Financial Conduct Authority (FCA) officially announced the discontinuation of all LIBORs as of the end of 2021, with the exception of the dollar LIBOR, which was discontinued in June of 2023.

On October 3, 2021, the Banking Supervision Department published Proper Conduct of Banking Business Directive No. 250A, “Transitioning from LIBOR”. The directive outlines principles for implementing the transition from LIBOR to alternative base interest rates, in order to ensure proper preparation, while addressing the potential risks embodied in the transition. In addition, the directive addresses aspects of fairness and disclosure required vis-a-vis customers. The directive covers both current agreements and new agreements.

When selecting the new interest base rates and adopting the alternative calculation methods, the Bank took into account the recommendations of the committees and work groups for the various currencies, including the International Swaps and Derivatives Association (ISDA) and fairness considerations. The Bank updated the relevant customers regarding the expected change, and posted it on its website.

The LIBOR transactions in all currencies, with the exception of the USD, were converted at the beginning of 2022, and in USD were converted at the end of June 2023, once the LIBOR's publication ceased. Therefore, the Bank does not have exposure to the LIBOR interest as of June 30, 2023.

For more information, please see Note 1.Y. to the financial statements as at December 31, 2022.

Quantitative information about interest rate risk - sensitivity analysis

Net adjusted fair value[(a)] of financial instruments of the Bank and its consolidated companies

Of which: banking portfolio	(1,649)	(27)	(1,676)

	December 31, 2022		
	Interest income	Noninterest finance income	Total*
	In NIS million		
Simultaneous changes			
Simultaneous increase of 1 percent	1,098	(150)	948
Of which: banking portfolio	1,098	(69)	1,029
Simultaneous decrease of 1 percent	(1,098)	153	(945)
Of which: banking portfolio	(1,098)	69	(1,029)

* After netting effects.

The sensitivity of the income in the above table is a theoretical estimate calculated based on a parallel change in all the interest rate curves using assumptions regarding changes in the spreads in deposits and credit, and changes in the asset and liability structure under a scenario.

For more information, please see the Risk Management Report as at December 31, 2022.

Foreign exchange rate risk

In the first half of 2023, the effect of the change in foreign currency rates on the net income was immaterial since the Bank does not have substantial Forex exposures.

Liquidity Risk and Financial Risk

Liquidity risk is the risk to the banking corporation's profits and stability resulting from the inability to meet its liquidity needs.

The Leumi Group's liquidity risk management policy is part and parcel of its strategic business management and is adapted to the requirements of Proper Conduct of Banking Business Directive No. 342, Liquidity Risk Management, and also the requirements of Proper Banking Management Directive No. 221, Liquidity Coverage Ratio, and the requirements of Proper Conduct of Banking Business Directive 222 - Net Stable Funding Ratio, which adopt the recommendations of the Basel III Committee, with adjustments for the Israeli economy.

Proper Conduct of Banking Business Directive 221 - Liquidity Coverage Ratio is intended to ensure that a banking corporation will hold an adequate inventory of high quality unencumbered liquid assets, comprised of cash or assets that can be converted into cash in private markets with little or no loss of value, in order to meet the banking corporation's liquidity needs in an extreme liquidity scenario lasting 30 days.
The regulatory requirement is compliance with the liquidity coverage ratio of at least 100 percent.

Proper Conduct of Banking Business Directive No. 222, Net Stable Funding Ratio, demands that banking corporations maintain a stable funding profile according to their asset composition and off-balance sheet operations. Maintaining a sustainable financing structure over time is intended to reduce the chances that disruptions in the banking corporation's permanent sources of financing will erode its liquidity situation in a way that will increase its risk of default and lead to a broader systemic scenario.
The regulatory requirement is to meet an NSFR of at least 100 percent.

Starting January 1, 2023, for the first time the Bank has applied revisions to Proper Conduct of Banking Business Directives 221 and 222 regarding the treatment of currency swap transactions that are not transactions of differences in all currencies (according to the revision, the cash flow is presented from the first quarter of 2023 on a gross basis) and a renewable line of credit. In accordance with Proper Conduct of Banking Business Directive 221, at the beginning of May 2023, the Bank received approval from the Bank of Israel to recognize the liquidity coverage ratio in funds for operational purposes (hereinafter - "operational deposits"), this approval from the Bank of Israel entered into effect on the date of its receipt.

Leumi maintains an adequate liquidity level by investing its own (nostro) portfolio in high-quality diversified assets in NIS and foreign currencies, so as to meet the liquidity needs under a variety of stress scenarios, as well as through a policy of raising diversified and solid sources for different periods of time, with emphasis on raising deposits from retail customers and issuing long-maturity bonds.

The Bank has a contingency plan in place for early identification handling of a liquidity crisis, which includes a system of warning signs that can indicate a change in the Bank's liquidity status.

There was no material change in the average liquidity coverage ratio for the three months ended June 30, 2023, compared to the average liquidity coverage ratio for the three months ended March 31, 2023, while on the one hand - during the second quarter of 2023 - there was the effect of the initial recognition of operational deposits in accordance with Proper Conduct of Banking Business Directive 221 and the issuance of bonds during the quarter, and on the other hand - these effects were offset by the current business activity (mostly credit provision offset by deposit taking).

In the second quarter of 2023, the LCR in foreign exchange and across all currencies was above the regulatory requirement.

Liquidity coverage ratio

	For the three months ended		
	June 30		December 31
	2023	2022	2022
	Average in %		
a. Consolidated data			
Liquidity coverage ratio	**128**	122	131
Minimum liquidity coverage ratio required by the Banking Supervision Department	**100**	100	100
b. Banking corporation's data			
Liquidity coverage ratio	**125**	119	129
Minimum liquidity coverage ratio required by the Banking Supervision Department	**100**	100	100

Note: Based on an average of daily observations.

For more information, please see the section entitled Liquidity Risk in the Risk Management Report as at June 30, 2023 and Note 9.B.

Net stable funding ratio

	As at June 30		As at December 31
	2023	2022	2022
	In %		
a. Consolidated data			
Net stable funding ratio	**121**	127	128
Net stable funding ratio set by the Banking Supervision Department	**100**	100	100
b. Banking corporation's data			
Net stable funding ratio	**120**	125	127
Net stable funding ratio set by the Banking Supervision Department	**100**	100	100

As of June 30, 2023, the NSFR in foreign exchange and across all currencies was above the regulatory requirement. The increase in the NSFR as of June 30, 2023 in relation to March 31, 2023 stems from the effect of the recognition of operational deposits in accordance with Proper Conduct of Banking Business Directive 222 and from the effect of the issuing of bonds.

The Bank set internal Net Stable Funding Ratio restrictions, in addition to the Liquidity Risk Management restrictions.

Operational Risks

Operational risk is the risk of loss as a result of inadequate, or failure of, internal processes, people and systems, or external events.

The Leumi Group engages in a wide range of financial activities and is therefore exposed to operational risks which include, inter alia: Information security and cyber risks, technological risk, business continuity risk as well as embezzlement and fraud risks.

The risk management approach is consistent with the Leumi Group's strategy, constitutes a basis for defining its risk tolerance, the manner of managing risk and corporate governance and determining the focus and emphases in operational risk management processes, allowing for informed and well-focused risk management as well as prioritizing tasks and resources.

During the first half of 2023 there were no material changes in the corporate governance structure, policy and operational risk management framework.

The regulatory capital required for operational risks is calculated using the standardized approach in the capital adequacy measurement directives of the Banking Supervision Department. It should be noted that the Bank of Israel published a draft revision to this directive that adopts the Basel directive.

For more information on regulatory changes in the first half of 2023 and anticipated changes regarding the measurement of capital adequacy, please see under Equity and Capital Adequacy in this report.

Main operational risk areas:

Information security and cyber risk

The increase in cyber-attacks on financial organizations in Israel and around the world, as well as on entities in their supply chains continues. The characteristics of the attacks are varied and include ransomware attacks, phishing and social engineering attempts. The exposure to the probability of a cyber event materializing increases as a result of a wider use of digital channels by customers and extensive and remote work by employees and suppliers.

Leumi takes several steps to mitigate the risks, including: implementing preventive and detective controls, conducting information security surveys, boosting monitoring to remove fictitious websites, rendering authorization management and control processes more stringent, and increasing awareness to information security guidance among the employees.

During the first half of 2023, no cyber incidents were discovered which affected the Bank's financial statements.

Technological risk

Leumi attributes great importance to ensuring that the technological infrastructure servicing its customers and employees will enable business and operational availability and continuity, and invests considerable resources to that end. The Bank implements a new product policy, which outlines the risk management processes involved in introducing new products, including new technological initiatives and innovation.

Leumi is implementing a business-technological (transformation) plan to achieve its business goals in the coming years. The plan is subject to stringent corporate governance.

Fraud

The expanded use of digital channels could increase exposure to embezzlement risks in terms of identity, money and information theft, as well as compromise functionality and cause customer information leaks and misuse of information. Leumi invests significant resources in identifying and mitigating these risks through focused, ongoing monitoring.

The human resource risk

The changes in the business and banking environment have had a bank-wide effect of the human capital domain as well, among other things, due to the need to adjust and preserve the work force, while motivating and engaging the employees. Leumi uses various means to address the risk.

On April 16, 2023, the Bank signed a special collective agreement with the Workers' Union for 2023-2026. For more information, please see Note 8.A.

For more information about operational risk and main risk areas, please see the "Operational Risks" section in the Report of the Board of Directors and Management as at December 31, 2022.

Climate and Environmental Risk

Environmental and climate-related risks to the Bank are exposure to potential damage which may be caused as a result of events or processes related to the environment, including climate change.

Environmental risks arise from the Bank's exposure to activities which may potentially cause environmental damage or be effected therefrom, such as: greenhouse gas emissions, waste creation, air or water pollution, soil contamination, compromised biodiversity, deforestation and extreme weather events.
Environmental and climate-related risks are usually divided into three types:

- Physical risks.
- Transition risks.
- Liability risk.

The Bank is exposed to these risks both directly and indirectly.

Environmental risks may have a financial and non-financial impact on the Bank, such as: credit risk, market risk and liquidity risk, as well as operational risk, compliance risk, legal risk, regulatory risk, reputational risk (such as in a case where the Bank is attributed a connection to an environmental hazard, either directly as the creator of the hazard or indirectly as the financier of the hazard).

Leumi recognizes the economic, social and environmental responsibility assigned to it in accompanying and supporting our customers in the transition process through the provision of credit and supporting investments. Focus on the management and assessment of exposure to climate-related risk along with identification of the opportunities is an integral part of the process.

Environmental risk is an "evolving" risk. Evolving risks are characterized by lack of quantitative data of adequate historical depth for their estimate and by high variance compared to other risks over time; this requires well-structured processes to adjust their management and measurement tools.
The Bank is monitoring regulatory, technologies and company-based developments, studying them and adjusting the risk management tools and methodologies on an ongoing basis.

On June 12, 2023, the Banking Supervision Department published Proper Conduct of Banking Business Directive, Principles for Effective Management of Climate-Related Financial Risks, which establishes 12 "fundamental principles" for effective management and supervision of climate-related financial risks, according to which the banking corporations are required to operate to optimally manage their exposure to climate-related financial risks. The directive is based on a document published by the Basel Committee in June 2022. The directive will be effective 24 months from its publication. The Bank is studying the directive and preparing for its implementation.

The information in this section constitutes forward-looking information. For the meaning of the term, please see under "Forward-Looking Information".

For more information, please see the section entitled "Climate and Environmental Risk" in the Report of the Board of Directors and Management as of December 31, 2022 and the Environment chapter in the Bank's Environmental, Social and Governance (ESG) Report for 2022.

Other Risks

Regulatory Risk

Regulatory risk is the risk of legislative and regulatory changes affecting the income and expenses of the Group, its capital, areas of activity or the business environment in which it operates.

The Leumi Group operates in a complex and multi-dimensional environment. Continuous material changes in a variety of regulatory fields require adequate, ongoing preparations by the Bank.

Recently, the emphasis had been placed mainly on guidance in the following areas:

Directives for boosting competition in the financial sector, especially in the area of Open Banking and payments, directives regarding bank-customer relations and conduct, including directives addressing fees and commissions, risk management directives, especially ESG risk management and risks regarding the prohibition of money laundering and terror financing, as well as privacy protection and information security directives.

In addition, several legislative initiatives are being promoted that are in preliminary stages in various contexts regarding the activities of banks in Israel, among other things, capping fees and commissions amounts for certain services, imposition of a designated tax in respect of excess profits, a cap on the difference between the interest on credit and the interest on deposits, and authorizing the Governor of the Bank of Israel to determine the interest rate on current accounts deposits and credit balances (including Proper Conduct of Banking Business Directive allowing banks to send text messages to customers with credit balances in their current accounts, in order to encourage them to transfer the funds held in the current account to interest-bearing channels).The abovementioned trends and changes affect, and are expected to continue to affect, the Israeli banking system in the coming years. The Bank monitors and identifies relevant regulatory provisions, and examines its preparedness for the following: changing market conditions; increased competition and transparency; entry of new players into traditional banking domains; use of databases and information of the Bank's customers by non-banking entities; and providing customers with tailored value propositions. At the same time, the regulation erodes income, increases compliance expenses and requires constant improvement of the service and innovation levels.

For more information, please see Laws and Regulations Governing the Banking System in the Corporate Governance Report.

Reputational Risk

Reputational risk is the risk of compromising the trust of various stakeholders of Bank Leumi (such as customers, bondholders, shareholders, etc.) in the Leumi Group, as a result of conduct, an act, or an omission by the Group, officers in the Group, its employees or other involved parties.
Reputational risk refers to the perceptions of the shareholders, stakeholders, the public, influencers and the media, whether they are based on facts or otherwise. Reputational risk is dynamic and changes depending on various topics and populations.

Strategic Risk

The financial industry and banking sector are experiencing significant changes affecting strategic risk and requiring adjustment to the business model, including:

Entry of new players, such as BigTechs (Google, Amazon, Facebook, Apple), FinTechs (such as Revolut), insurance companies, non-banking credit companies and digital banks, which often enjoy regulatory arbitrage compared to the regulation applicable to banks, as well as agile business systems.

The Bank's strategic plan is for three years, and has been approved by management and the Board of Directors. The strategic plan is set following an extensive process of examining trends and changes in the business environment, competitive environment, technological environment and customer preferences, in an effort to identify threats and opportunities. In addition, an annual refresher process is undertaken, in which the key external trends are examined, as well as their potential impact on Leumi. The strategic risk is managed by the Bank's Board of Directors and management, with the assistance of the Strategy, Digital and Data Division.

In addition, recently several legislative initiatives are being promoted that are in preliminary stages in various contexts regarding the activities of banks in Israel, as detailed under Regulatory Risk above.

Macroeconomic Risk

The main macroeconomic changes currently relate to the cumulative effects of the contractionary monetary process that took place in most countries around the world, in response to the acceleration of inflation. The main risks relate to the extent to which the course of monetary tightening, which appears to have reached its peak but has not yet reached its end, will moderate economic activity. An additional risk is in connection with failures discovered in the banking systems in the United States and in Switzerland. These appear to be events specific to certain banks rather than a systemic event. In response to these failures, the various authorities responded decisively in order to stabilize the situation.

Nevertheless, the weakening of activity in various areas, and, in particular in commercial real estate around the world, along with the decline in the public’s trust in some of the banks, may lead to a renewed deterioration in the global banking situation and negative macroeconomic consequences, which may result in a lack of liquidity and a tightening of credit terms and conditions. In addition, there are significant risks arising from climate change and various geopolitical risks, including the Ukranian-Russian crisis, which increase the potential for volatile global economic processes.

On the local level, the first half of 2023 was characterized by public events - legislative and social, with emphasis on legislative processes led by the government, the development of which and degree of impact of which on the Israeli economy in the mid- to long term is uncertain, and as a result - their impact on the Bank’s results is uncertain. As detailed, among other things, in estimates published by the Bank of Israel’s Research Department on April 3, 2023 and on July 10, 2023, the events are likely to have a negative impact on the Israeli economy, and as a result, on the Bank’s performance.

The Bank of Israel’s announcement in July 2023, and in particular the Governor’s statement with the publication of the interest rate decision on July 10, 2023, dealt with the devaluation of the NIS resulting from local developments, and in particular a considerable increase in social unrest and decline in the attractiveness of the Israeli economy and market. This excess devaluation contributed an additional 1.0-1.5 percent to inflation and, as long as the devaluation continues, it will result in an interest rate response from the Bank of Israel. The Bank of Israel continues to emphasize that the main risk to the growth forecast is the materialization of a scenario in which legislative and institutional changes will be accompanied by an additional increase in the country’s risk premium in addition to the continued devaluation of the NIS, damage to exports resulting from a decrease in Israel’s attractiveness as a trade partner and a decrease in local investment and demand for private consumption.

On March 1, 2023, Fitch reiterated the State of Israel’s credit rating at A+ with a stable outlook. Subsequently, on May 29, 2023, the agency published a review and analysis of the Israeli economy, particularly regarding Israel’s expected budgetary trajectory and possible effects of the public events in Israel - legislative and social.

On April 14, 2023, rating agency Moody’s announced a change in the rating outlook of the State of Israel from positive to stable, while reiterating the rating at a level of A1. Moody’s report noted that the change reflects assessments regarding the economic effects of the legislative and social public events in Israel.

In May 2023, S&P published a report on the credit rating of the State of Israel. The agency reiterated the credit rating and the rating outlook, at a level of AA- with a stable outlook. The report includes reference to the political, social and security risks that may affect the future rating outlook and/or credit rating.

At the end of July, an amendment to the basic law: The Judiciary was approved by the Knesset and entered into effect. Immediately thereafter, rating agencies Moody’s and S&P published special reports, which emphasized the risks to the Israeli economy posed by the continuation of the legislative process. However, there was no change in Israel’s rating and/or in its rating outlook.

At the beginning of August 2023, the Bank of Israel published the Financial Stability Report for the first half of 2023. The Report stated that the uncertainty surrounding the legislative changes had raised the economy’s risk premium and was accompanied by a devaluation of the exchange rate, which contributed to an increase in inflation, a decrease in share prices and increased volatility in the foreign exchange market and financial markets. It also stated that the financial system in Israel maintained stability during the reviewed period, with the strength and stability of the banking system contributing thereto; this was reflected in high capital ratios, adequate liquidity ratios and high profitability compared to recent years. According to the Report, the vulnerability level of the exposure to the macroeconomic environment risk was up from medium-low in the second half of 2022 to medium-high in the first half of 2023.

For more information regarding compliance, legal, model, reputational and conduct risks, please see under "Other Risks" in the Report of the Board of Directors and Management dated December 31, 2022.

Critical Accounting Policies and Estimates

Overview

The financial statements are prepared in accordance with the generally accepted accounting principles and the directives and instructions of the Banking Supervision Department regarding the preparation of annual and quarterly financial statements of a banking corporation as detailed in Note 1 to the Financial Statements as at December 31, 2022.

The preparation of the consolidated financial statements in accordance with generally accepted accounting principles and directives of the Banking Supervision Department requires Management to use estimates and assessments which affect the reported amounts of assets and liabilities as well as income and expense amounts.

The actual results of these estimates may differ from the estimates and/or assessments. In most cases, the estimates and assessments are based on economic forecasts, assessments regarding various markets and past experience, while exercising discretion. Management believes the estimates and assessments to be reasonable at the time of signing the financial statements.

For additional information, please see the section entitled Critical Accounting Policies and Estimates in the financial statements as at December 31, 2022.

Collective Loan Loss Provision and Classification of Troubled Debts

As of January 1, 2022, the Bank is implementing the directives of the Banking Supervision Department on Current Expected Credit Losses (CECL) ASC 326, Financial Instruments - Credit Losses. The new rules present a new methodology for recording loan losses, which primarily results in earlier recognition of loan losses. The purpose of the new rules is to improve the quality of reporting on a banking corporation's financial position by early recording of the loan loss provisions so as to in order to support a swifter response by banks to a deterioration in borrowers' credit quality and enhance the correlation between credit risk management and the manner in which these risks are reflected in the financial statements. The rules are based on existing methods and processes.

The provision to cover the current expected credit losses in the loan portfolio is estimated through one of the two tracks: a collective provision and an individual provision.

Collective provision

1. In non-housing segments, the provision is usually estimated using the loss-rate method. This process is initially based on average past losses in the portfolio, represented by net charge-offs as from 2011 and until the quarter preceding the reporting date. Past losses are adjusted later in the process, using a series of risk and economic characteristics, such as past losses, the risk groups' risk profile, debt classification, composition of the credit portfolio, state of collateral, risk appetite, concentration of the credit portfolio, risk ratings, the Bank's credit provision policy and procedures, and additional terms and conditions. At the end of the process, the provision for estimates is adjusted for expected recoveries in respect of charged off debts. Changes in these estimates are recognized as incurred against the loan loss provision.

   The provision for off-balance sheet credit is recognized for obligations that may not be unconditionally terminated by the Bank, and is based on the segmentation described above, taking into account the Bank's estimates regarding the reasonableness of utilizing the various off-balance sheet items (i.e., credit conversion coefficients). These estimates are based both on past experience of the Bank - which indicates utilization rates - and on subjective judgment. The provision is presented in the balance sheet under “Other liabilities”.

   This process involves significant judgment and expert assumptions, in order to reflect the best expectations and assessments of management regarding current expected credit losses.

2. In the housing loans segment, the Bank measures the current expected credit losses based on the probability of default and loss given default.

Classification of troubled debts and specific provision

The Bank assesses the loan portfolio on an ongoing basis and in accordance with procedures in order to identify, as soon as possible, borrowers whose risk level and exposure increased and who require special supervision and close monitoring by management. either due to risk characteristics or as a result of economic/market conditions that might have an adverse effect on the borrowers, aiming to improve their condition. As to corporate customers, judgment is exercised by corporate department's employees dealing with the borrower in order to assess the extent of the problem, which is then assessed by the Credit Risk Management units of the Risk Management Division with the aim of making an objective assessment, to the extent possible, of the identified problems in order to determine the borrower's risk rating.

As a rule, a commercial debt with a contractual balance of NIS 1 million or more is examined on an individual basis by the competent functions at the Bank regarding their classification as troubled debts, including recording a charge-off if relevant. As a rule, other Bank customers are examined for the purpose of their classification on the basis of their extent of arrears and according to certain automated defined negative indicators.

Non-performing debts, excluding housing loans, are debts which the Bank believes do not share the risk characteristics with performing debts, and therefore assesses their respective provision on a specific basis.

The methodology for dealing with troubled debts requires, among other things, a methodical assessment of the adequacy of the loan loss provision for debts classified as non-performing. The provision is assessed according to the difference between the recorded outstanding debt and the present value of the future cash flows expected to service the debt from the customer's activity and the realization of collaterals and other assets, discounted at the effective interest rate of the debt. For debts the repayment of which relies on collaterals (collateral-contingent debts) and there are no other available and reliable sources of repayment, the provision is determined based on the fair value of the collateral less costs of disposal and after triggering buffers for the collateral's value so that it will be possible to realize the collateral and have the debt repaid therefrom. In this context, it should be noted that the Bank is implementing the requirements of the Bank of Israel, according to which debts are classified based on the debtor's repayment capacity; i.e. – the expected strength of the primary repayment source of the debt, despite support by secondary and tertiary repayment sources, such as collateral and guarantors.
Similarly, to examining the adequacy of the classifications, the liability adequacy was also tested on a quarterly basis, in accordance with the requirements of the Bank of Israel.

According to revised Proper Conduct of Banking Business Directives, the Risk Management Division is responsible for setting appropriate classifications and allowances for credit losses. In addition to the discussions held by business divisions' managements and by representatives of the Risk Management Division, the Bank's Provisions Committee, headed by the President and CEO, holds quarterly discussions as to the aggregate amount of the provisions required for that quarter and the classification of specific provisions (in excess for a stipulated threshold amount).

For additional information regarding the accounting policy for the collective loan loss provision and the classification of troubled debts, please see the section entitled Critical Accounting Policies and Estimates in the financial statements as at December 31, 2022.

For more information regarding first-time application of the directives of the Banking Supervision Department on Current Expected Credit Losses (CECL), please see Note 1.X.1 to the to the financial statements as at December 31, 2022.

Impairment of securities in the available-for-sale portfolio

The Bank estimates the current expected credit losses for bonds in the available-for-sale portfolio at each reporting date if the fair value of the security is lower than its amortized cost. In any such case, the Bank examines whether there is an intent to sell the security or whether the Bank believes that it is more likely than not that it will be required to sell the security before recovering its carrying amount. If yes - the entire difference between the carrying amount and the fair value is recognized in profit and loss. If not - the Bank examines whether the impairment arises from loan losses or other factors, and if the Bank believes that the impairment stems from loan losses, it is recognized under the loan loss provision, while other types of impairments are recognized against other comprehensive income. A loan loss exists when the Bank does not expect principal and interest inflows to adequately recover the entire amortized cost of the security. The loan loss provision is limited to the amount in which it exceeds the security's amortized cost over its fair value. The provision amount is updated upwards or downwards according to changes in assessments in subsequent periods.

As part of the Bank's assessment regarding the existence of a loan loss, the Bank examines data, assessments and various information items.

According to the new rules, the Bank does not take into consideration the time during which the security's fair value was lower than its cost.

If the Bank decides to carry out a quantitative test, the latter shall be done using the PD LGD method. As part of the test, a comparison is made between the discounted cash flows and the fair value and amortized cost. If the expected discounted cash flow amount is lower than the amortized cost, the difference is recognized as a loan loss provision. If the fair value of the bond is higher than the discounted cash flow amount, the provision is recognized up to the minimum fair value.

For more information regarding first-time application of the directives of the Banking Supervision Department on Current Expected Credit Losses (CECL), please see Note 1.X.1 to the to the financial statements as at December 31, 2022.

Impairment of investments in equity-accounted associates

Each reporting period, the Bank examines the need to record losses in respect of impairment of an other-than-temporary nature for its investment in associates.

An investment in an associate is tested for impairment when events or changes in circumstances indicate that the impairment is of an other-than-temporary nature.

In that case, impairment of an other-than-temporary nature is tested for.

Testing for impairment of an other-than-temporary nature is carried out while taking into account, among other things, the following indicators:

- The length of time that the fair value of the investment is lower than its book value and the severity of the impairment.
- The financial position of the investee, including the quality of the investee's assets, its profit and profitability and its liquidity.
- Changes in the investee's credit rating.
- Legal or regulatory events related to the investee.
- Analysts' assessments and valuations of the investee.
- Legal or regulatory changes that affect the investee's operating segment.
- Significant change in the market environment that may affect the value of the investee's assets and securities (for example, a decrease in real estate prices).
- Significant changes in economic conditions related to the investee.
- Changes in the investee's business model as a result of changes in technology or new competitors in the industry.
- The intention and ability of the banking corporation to hold an investment until a date when it is expected that the investment will not be sold at a loss.

An impairment of an other-than-temporary nature is recognized in the income statement according to the fair value of the investee, and the book value after the impairment constitutes the new cost basis. The loss recognized will not be reversed in subsequent periods if there will be an appreciation.

In the wake of significant decreases in the first half of 2023 in the share prices of the US banking segment in general, and of mid-sized banks in particular, the Bank examined the need to recognize an impairment in respect of its investment in Valley.

The Bank examined indicators related to Valley's performance and to the performance of the shares, taking into consideration the general situation in the markets, and in the US banking system in particular, with emphasis on mid-sized and small banks.

Accordingly, as of March 31, 2023, the Bank recorded an impairment of an other-than-temporary nature with respect to its investment in associate Valley; the impairment was allocated according to Valley's fair value of the net identifiable assets arising from the Bank's investment in Valley. For additional information, please see Note 16.A.

Liabilities for Employee Benefits

As at June 30, 2023, the balance of accumulated other comprehensive income for employee benefits amounted to a negative post-tax balance of NIS 1,415 million, compared to a negative post-tax reserve of NIS 1,397 million as at December 31, 2022.

The outstanding liability for employee benefits as of June 30, 2023, according to a discount rate based on Israeli corporate bonds ("deep market according to the Israel Securities Authority's approach") is NIS 1,573 million less than the actual outstanding liability.

The actuarial assessment of the employee benefits is on the Israel Securities Authority's website, on the following address www.magna.isa.gov.il.

For additional information, please see the section entitled Critical Accounting Policies and Estimates in the financial statements as at December 31, 2022.

Controls and Procedures Regarding Financial Statements Disclosures

The Banking Supervision Department's directives impose the requirements of Sections 302 and 404 of the SOX Act on banking corporations. The SEC and the Public Company Accounting Oversight Board have established provisions with regard to the abovementioned sections, on management's responsibility for instating and maintaining disclosure controls and procedures and for exercising internal control over financial reporting and the opinion of the independent auditors on the audit of internal control over financial reporting.

The Banking Supervision Department's directives require the following:

- Banking corporations shall apply Sections 302 and 404 and the SEC directives issued thereunder.
- Adequate internal control requires an auditing system that follows a predefined, recognized framework. The 2013 COSO (Committee of Sponsoring Organizations of the Treadway Commission) meets these requirements and can be used to evaluate the internal controls.

The Bank regularly applies the directive to the Leumi Group.

During 2023, the Bank validates and updates material control processes and conducts effective evaluations of its entire internal system of control over financial reporting.

Evaluation of disclosure controls and procedures

The Bank's management, with the cooperation of the President and Chief Executive Officer and Head of the Finance Division and Chief Accountant, have evaluated the effectiveness of the Bank's disclosure controls and procedures as at the end of the reporting period. Based on this evaluation, the Bank's President and Chief Executive Officer and the Head of the Finance Division and the Chief Accountant have concluded that, as at the end of the reporting period, the Bank's disclosure controls and procedures are effective for the purpose of recording, processing, summarizing and reporting the information the Bank is required to disclose in its financial statements pursuant to the Banking Supervision Department's Reporting to the Public Directives and as at the date prescribed by the Directives.

Internal control changes

In the quarter ended June 30, 2023, no material change has occurred in the Bank's internal control over financial reporting which has had a material effect, or is reasonably expected to have a material effect, on the Bank's internal control over financial reporting.

The Board of Directors

From January to June 2023, Leumi's Board of Directors held 21 plenum meetings and its committees held 25 meetings.

At a Board meeting held on August 14, 2023, the Board resolved to approve and publish the Group's unaudited condensed consolidated financial statements as at June 30, 2023 and for the period then ended.

The Bank's Board of Directors would like to express its appreciation and gratitude to the employees and managers of the Bank and the Group's subsidiaries - both in Israel and overseas - for their dedicated work and contribution to the Group's business.

Dr. Samer Haj Yehia
Chairman of the Board

Hanan Friedman
President and Chief Executive Officer

August 14, 2023

Certification

I, Hanan Friedman, hereby certify as follows:

1. I have reviewed the quarterly report of Bank Leumi le-Israel B.M. (hereinafter - the "Bank") for the quarter ended June 30, 2023 (hereinafter - the "Report").

2. To my knowledge, the Financial Statements do not contain any misrepresentation of a material fact, nor do they omit a representation of a material fact that is necessary in order for the representations included therein - under the circumstances in which such representations were included - to be misleading as to the reporting period.

3. To my knowledge, the quarterly financial statements and other financial information included in the Financial Statements fairly represent, in all material respects, the Bank's financial position, financial performance and changes in shareholders' equity and cash flows as at the dates and for the periods presented in the Financial Statements.

4. I and others at the Bank signing this certification are responsible for the establishment and implementation of controls and procedures regarding the Bank's disclosure and internal control over financial reporting (as defined in the Reporting to the Public Directives regarding "Report of the Board of Directors and Management"). In addition:

   A. We have established such controls and procedures, or caused such controls and procedures to be established under our oversight, with the aim of ensuring that material information about the Bank and its consolidated companies is brought to our attention by others in the Bank and said companies, especially during the preparation of the Financial Statements;

   B. We have established such internal control over financial reporting or have caused such internal control to be established under our oversight, with the aim of providing reasonable assurance as to the reliability of the financial reporting and that the financial statements for external purposes have been prepared in accordance with the generally accepted accounting principles and the directives and guidance of the Banking Supervision Department;

   C. We have evaluated the effectiveness of the Bank's disclosure controls and procedures and presented in the report our conclusions regarding the effectiveness of the disclosure controls and procedures as at the end of the reporting period according to our assessment; and

   D. The Financial Statements discloses any change in the Bank's internal control over financial reporting which occurred during the quarter and has materially affected, or is reasonably expected to affect, the Bank's internal control over financial reporting; and

5. I and others at the Bank signing this certification have disclosed to the joint independent auditors, the Board of Directors, and the Board of Directors' Audit Committee, based on our most recent assessment of the internal control over financial reporting, the following:

   A. All significant deficiencies and material weaknesses in the establishment or implementation of the internal control over financial reporting that are reasonably expected to harm the Bank's ability to record, process, calculate and report financial information; and

   B. Any fraud, whether or not material, involving management or other employees who have a significant role in the Bank's internal control over financial reporting.

Nothing in the foregoing shall derogate from my responsibility or the responsibility of any other person, under any law.

August 14, 2023.

Hanan Friedman
President and Chief Executive Officer

Certification

I, Hagit Argov, hereby certify as follows:

1. I have reviewed the quarterly report of Bank Leumi le-Israel B.M. (hereinafter - the “Bank") for the quarter ended June 30, 2023 (hereinafter - the “Report").
2. To my knowledge, the Financial Statements do not contain any misrepresentation of a material fact, nor do they omit a representation of a material fact that is necessary in order for the representations included therein - under the circumstances in which such representations were included - to be misleading as to the reporting period.
3. To my knowledge, the quarterly financial statements and other financial information included in the Financial Statements fairly represent, in all material respects, the Bank’s financial position, financial performance and changes in shareholders' equity and cash flows as at the dates and for the periods presented in the Financial Statements.
4. I and others at the Bank signing this certification are responsible for the establishment and implementation of controls and procedures regarding the Bank's disclosure and internal control over financial reporting (as defined in the Reporting to the Public Directives regarding “Report of the Board of Directors and Management"). In addition:
   A. We have established such controls and procedures, or caused such controls and procedures to be established under our oversight, with the aim of ensuring that material information about the Bank and its consolidated companies is brought to our attention by others in the Bank and said companies, especially during the preparation of the Financial Statements;
   B. We have established such internal control over financial reporting or have caused such internal control to be established under our oversight, with the aim of providing reasonable assurance as to the reliability of the financial reporting and that the financial statements for external purposes have been prepared in accordance with the generally accepted accounting principles and the directives and guidance of the Banking Supervision Department;
   C. We have evaluated the effectiveness of the Bank's disclosure controls and procedures and presented in the report our conclusions regarding the effectiveness of the disclosure controls and procedures as at the end of the reporting period according to our assessment; and
   D. The Financial Statements discloses any change in the Bank’s internal control over financial reporting which occurred during the quarter and has materially affected, or is reasonably expected to affect, the Bank’s internal control over financial reporting; and
5. I and others at the Bank signing this certification have disclosed to the joint independent auditors, the Board of Directors, and the Board of Directors’ Audit Committee, based on our most recent assessment of the internal control over financial reporting, the following:
   A. All significant deficiencies and material weaknesses in the establishment or implementation of the internal control over financial reporting that are reasonably expected to harm the Bank’s ability to record, process, calculate and report financial information; and
   B. Any fraud, whether or not material, involving management or other employees who have a significant role in the Bank's internal control over financial reporting.

Nothing in the foregoing shall derogate from my responsibility or the responsibility of any other person, under any law.

Review Report of the Joint Independent Auditors to the Shareholders of Bank Leumi le-Israel B.M.

Introduction

We have reviewed the accompanying financial information of Bank Leumi le-Israel B.M. and its subsidiaries (hereinafter - the "Bank"), which includes the condensed consolidated interim balance sheet as at June 30, 2023 and the condensed consolidated interim income statement, comprehensive income statement, statement of changes in equity and cash flow statement for the three-month and six-month periods then ended. The Board of Directors and management are responsible for the preparation and presentation of the financial information for these interim periods in accordance with Israeli GAAP for interim financial reporting and in accordance with the Banking Supervision Department's directives and guidance. Our responsibility is to express a conclusion regarding the financial information for these interim periods based on our review.

Review scope

We performed our review in accordance with Review Standard (Israel) 2410 of the Institute of Certified Public Accountants in Israel, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", and a review standard applied in the review of banking corporations pursuant to the Banking Supervision Department's directives and guidelines. A review of interim financial information consists of inquiries, mostly of persons responsible for financial and accounting matters, and of applying analytical and other review procedures. A review is substantially smaller in scope than an audit performed in accordance with Israeli GAAP and, as a result, does not enable us to obtain assurance that we would become aware of all significant matters that might have been identified in an audit. Consequently, we are not expressing an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying financial information is not prepared, in all material respects, in accordance with Israeli GAAP for interim financial reporting and in accordance with the directives and guidance of the Banking Supervision Department.

Appendix A - Non-Cash Investments and Financing Activities in the Reporting Period

For the year ended December 31, 2022

On September 23, 2021, Bank Leumi Corporation (hereinafter - "BLC"), a US-based corporation (85 percent of which is held by the Bank), which wholly owns BLUSA, entered into a merger agreement with Valley.

On April 1, 2022, the merger was completed and, part of the consideration - NIS 3,047 million in Valley shares - was received.

For more information, please see Note 15.A to the financial statements as at December 31, 2022.

Appendix B - Proceeds from Disposal of Investments in a Previously-Consolidated Subsidiary[a]

	For the year ended December 31
	2022
	Audited
	In NIS million
Derecognized cash	1,210
Assets (excluding cash)[b]	24,855
Liabilities	(23,378)
Identified assets and liabilities	2,687
Assets and liabilities attributable to non-controlling interests	(423)
Derecognized assets and liabilities	2,264
Capital gain on disposal of investment in previously-consolidated subsidiaries[c]	1,089
Total proceeds from disposal of previously-consolidated subsidiaries	3,353
Net of non-cash proceeds from disposal of investments in previously-consolidated subsidiaries	3,047
Cash proceeds	306
Less derecognized cash	1,210
Inflows from disposal of investments in previously consolidated subsidiaries	(904)

(a) For more information, please see Note 15.A to the financial statements as at December 31, 2022.
(b) Including goodwill totaling NIS 14 million.
(c) Profit after elimination of capital reserves and taxes totaling NIS 752 million.

List of Notes

Note 1 - Significant Accounting Policies

A. Basis of Preparation of the Financial Statements

1. Reporting principles

The condensed consolidated interim financial statements as at June 30, 2023 have been prepared in accordance with Israeli GAAP on interim financial reporting and the directives and guidelines of the Banking Supervision Department.

The accounting principles applied to the preparation of the interim financial statements are consistent with those applied to the audited Annual Financial Statements as at December 31, 2022, except as outlined in Section B below. These interim financial statements do not include all information required to be included in the full annual financial statements and should be read in conjunction with the Annual Financial Statements as at December 31, 2022 and their accompanying notes (hereinafter - the “Financial Statements”).

On August 14, 2023, the Bank's Board of Directors approved the condensed consolidated interim financial statements for publication.

2. Use of estimates

Preparing the condensed consolidated interim financial statements in accordance with the said directives and guidance requires management to exercise judgment, and to use estimates, assessments and assumptions, which affect the reported amounts of assets and liabilities as well as the reported amounts. It is clarified that the actual results may differ from those estimates.

When developing accounting estimates used in the preparation of the Bank's financial statements, the Bank's management is required to make assumptions regarding circumstances and events involving significant uncertainty. In exercising its judgment to determine the accounting estimates, the Bank's management relies on past experience, facts, various representations, analyses and reviews, external factors and reasonable assumptions, in accordance with each estimate’s particular circumstances. The uncertainty reflected in the economic and other environmental conditions is still significant; therefore, estimates and assessments may be revised according to the development of the conditions and circumstances as well as economic changes.

With the exception of what is detailed under item b. below, the policy applied by the Bank in using assessments and estimates is consistent with that used in the annual financial statements as at December 31, 2022. The underlying estimates and assumptions are reviewed on an ongoing basis. Changes in accounting estimates are recognized in the period in which the estimates were adjusted and for any future affected period.

3. From time to time, the Bank makes immaterial adjustments to classifications in the comparative figures in order to adjust them to the classification in the current financial statements for comparability. These classifications do not have an effect on profit and loss.

B. First-Time Application of New Accounting Standards, Accounting Standard Revisions, and New Directives Issued by the Banking Supervision Department

As of the reporting periods commencing on January 1, 2023, the Bank applies the following accounting standards and directives:

1. ASU 2022-01, Derivatives and Hedging - Fair Value Hedging - Portfolio Level Method

On March 28, 2022, the Financial Accounting Standards Board (FASB) published ASU 2022-01, Derivatives and Hedging - Fair Value Hedging - Portfolio Level Method in an effort to better adjust hedge accounting to companies’ risk management policies (hereinafter - the “ASU”).

The main amendments to the ASU include, inter alia, expanding the last level method such that several levels can be hedged, clarifications regarding accounting treatment, as well as additional disclosure requirements.

The circular's guidelines shall apply as of January 1, 2023. The ASU provisions that enable new hedging relationships will be implemented prospectively. The application of the provisions has had no material effect on the financial statements.

2. Discontinuation of the LIBOR rates

In March 2021, the British Financial Conduct Authority (FCA) officially announced the discontinuation of all LIBORs as of the end of 2021, with the exception of the dollar LIBOR, which was discontinued in June of 2023.

On October 3, 2021, the Banking Supervision Department published the new Proper Conduct of Banking Business Directive No. 250A, Transition from LIBOR. The directive outlines principles for implementing the transition from LIBOR to alternative base interest rates, in order to ensure adequate preparations and taking into account the potential risks involved in the transition. The directive takes into account the required fairness and disclosure aspects vis-a-vis customers. The directive covers both current agreements and new agreements.

When selecting the new interest base rates and adopting the alternative calculation methods, the Bank took into account the recommendations of the committees and work groups for the various currencies, including the International Swaps and Derivatives Association (ISDA) and fairness considerations. The Bank updated the relevant customers regarding the expected change, and posted it on its website.

LIBOR transactions were converted in all currencies after December 2021, and in USD - upon discontinuation of the interest rate's publication at the end of June 2023; therefore, the Bank has no exposure to LIBOR interest.

For more information, please see Note 1.Y. to the financial statements as at December 31, 2022.

C. New accounting standards, revised accounting standards and new directives of the Banking Supervision Department in the period before their application

1. ASU 2022-02, Financial Instruments - Credit Losses: Troubled Debt Restructurings and Vintage Disclosures

On March 31, 2022, the Financial Accounting Standards Board (FASB) published ASU 2022-02, Financial Instruments - Credit Losses: Troubled Debt Restructurings and Vintage Disclosures (hereinafter - the "ASU").

On June 4, 2023, a draft circular was distributed to update the Reporting to the Public Directives, regarding the update. The publication revises the accounting treatment of debts that underwent restructuring of troubled debt, and increases the disclosure regarding credit quality according to the year the credit was provided.

The revision includes the following changes, among others: Replacing the term "Debts that underwent restructuring of troubled debt" with the term "Changes in terms and conditions of debts of borrowers in financial difficulties", updating the disclosure requirements and revoking the requirement to calculate the loan loss provision for a debt that underwent restructuring of troubled debt using the discounted cash flow method.

Effective date: The provisions established in the draft circular will take effect as of January 1, 2024.

The Bank is studying the standard's requirements and assessing the effect of the new provisions on its financial statements.

2. ASU 2022-03 regarding the fair value measurement of equity securities that are restricted for trading

On June 29, 2022, the US Financial Accounting Standards Board (hereinafter - the "FASB") published ASU 2022-03 regarding the fair value measurement of equity securities that are restricted for trading (hereinafter - the "ASU").

Note 1 - Significant Accounting Policies (cont.)

The ASU clarifies that contractual restriction of trading in a capital security constitutes a specific restriction for the entity and is not part of the security's accounting unit of measure and therefore will not be taken into account in the fair value measurement. In addition, the ASU emphasizes that it is not possible to recognize and measure the contractual restriction on trading separately.

Moreover, the ASU contains new disclosure requirements for entities holding contractually restricted securities, including disclosure regarding the securities' fair value, the nature and remaining period of the restriction and the circumstances that may result in cancelation of the restriction.

The provisions of the ASU will be applicable to publicly-traded entities in the US as of the annual and interim periods commencing after December 15, 2023 or on early adoption, if the entity opted for early adoption of the ASU. The ASU will be implemented prospectively while attributing the adjustments made in its respect to profit or loss.

Note 2 - Interest Income and Expenses

	For the three months ended June 30		For the six months ended June 30	
	2023	2022	**2023**	2022
	Unaudited			
	In NIS million			
a. Interest income[(a)]				
From loans to the public	**6,534**	3,528	**12,176**	6,551

Total	**137**	(157)	**105**	(189)
Total noninterest finance income	**483**	688	**508**	702

(a) Excluding the effect of hedge ratios.
(b) Derivatives which constitute part of the Bank's assets and liabilities management system that are not designated for hedging purposes.
(c) Of which the losses in the amount of NIS 2 million and NIS 13 million for the three- and six-month periods ended June 30, 2023 in respect of held-for-trading bonds held as of the balance sheet date (losses of NIS 50 million and NIS 76 million for the three- and six-month periods ended June 30, 2022, respectively).
(d) There were no gains or losses in respect of held-for-trading equity securities that are still held as of the balance sheet date in the three- and six-month periods ended June 30, 2023 (losses of NIS 2 million in respect of held-for-trading shares still held as of the balance sheet date in the three- and six-month periods ended June 30, 2022).
(e) For interest income from investments in held-for-trading bonds, please see Note 2.
(f) Including exchange rate differentials from trading activities.
(g) Reclassified from accumulated other comprehensive income.
(h) Including gains and losses from fair value measurement of equity securities for which there is available fair value as well as upward or downward adjustments of equity securities for which there is no available fair value.

Note 3B - Earnings per Ordinary Share

A. Basic Earnings Per Share

The Bank's net income per share is calculated by dividing the gain attributed to the Bank's ordinary shareholders by the weighted average of the number of the Bank's outstanding ordinary shares, as follows:

	For the three months ended June 30		For the six months ended June 30	
	2023	2022	**2023**	2022
	Unaudited			
Basic earnings				
Net income attributable to the Bank's shareholders (in NIS million)	**2,453**	1,992	**3,434**	3,601
Weighted average of the number of shares (in thousands of shares)				
Balance as at beginning of period	**1,543,805**	1,452,896	**1,543,805**[(a)]	1,452,896 [(a)]
Weighted effect of the issuance of shares	**-**	6,993	**-**	3,516
Weighted effect of share buyback plan	**(1,308)**	-	**(658)**	-
Weighted average of number of shares	**1,542,497**	1,459,889	**1,543,147**	1,456,412
Basic earnings per share (in NIS)	**1.59**	1.36	**2.23**	2.47

(a) Balance at the beginning of the period less share buyback until December 31, 2021, and 2022.

Note 3B - Earnings per Ordinary Share (cont.)

B. Diluted Earnings Per Share

The calculated diluted earnings per share is divided by the weighted average of the number of the Bank's outstanding ordinary shares, after adjustment for all the potentially dilutive ordinary shares, as follows:

	For the three months ended June 30		For the six months ended June 30	
	2023	2022	**2023**	2022
	Unaudited			
Diluted earnings				
Net income attributable to the Bank's shareholders (in NIS million)	**2,453**	1,992	**3,434**	3,601
Weighted average of the number of shares (in thousands of shares)				
Weighted average of the number of ordinary shares used to calculate basic earnings per share	**1,542,497**	1,459,889	**1,543,147**	1,456,412
Weighted effect of the issuance of options to employees[(a)]	**-**	-	**-**	-
Weighted average of the number of shares, fully diluted	**1,542,497**	1,459,889	**1,543,147**	1,456,412
Diluted earnings per share (in NIS)	**1.59**	1.36	**2.23**	2.47

(a) There are instruments with dilution potential, but they were not included in the calculation in the reporting period since their effect is anti-dilutive. Please see Note 8.B.

C. Share capital

As of June 30, 2023, the Bank's issued and paid up share capital less the Bank's share buyback plan during 2018 to 2023 is 1,537,230,655 ordinary shares of NIS 1 p.v. each. (as of June 30, 2022, the Bank's issued and paid up share capital less the Bank's share buyback plan during 2018 to 2020 is 1,543,805,097 ordinary shares of NIS 1 p.v. each).

D. Buyback after the financial statements date

From July 1, 2023 to August 1, 2023, the Bank performed a buyback of 4,165,866 shares of 1 par value each of the Bank's issued share capital.

For more information regarding the Banking Supervision Department's approval for the buyback, please see Note 9A.

Note 4 - Accumulated Other Comprehensive Income (Loss)

A. Changes in Accumulated Other Comprehensive Income (Loss) After Tax Effect

1. Changes in accumulated other comprehensive income (loss) for the three-month periods ended June 30, 2023 and 2022 (unaudited)

	Other comprehensive income (loss) before attribution to non-controlling interests

Comments:

(a) In most cases, fair value inputs are based on quoted share prices, which do not necessarily reflect the price that can be obtained from selling large blocks of securities.

(b) Shares for which no fair value is available are presented at cost less impairment, adjusted upwards or downwards for observable prices in similar transactions or identical transactions of the same issuer.

(c) Included in equity under the “Adjustments in respect of the presentation of available-for-sale bonds at fair value, net” under other comprehensive income, except for securities designated to be hedged at fair value.

(d) Carried to the income statement but as yet unrealized.

(e) An amount of NIS 15.6 billion out of total foreign currency securities are rated SSA (Super-nationals, Sovereign and Agencies) (June 30, 2022 - NIS 14.5 billion, December 31, 2022 - NIS 12.8 billion).

General comments:

Loaned securities in the amount of NIS 120 million (as of June 30, 2022 - NIS 214 million; as of December 31, 2022 - NIS 52 million) are presented under the loans to the public item.

Securities that were pledged totaled NIS 12,795 million (as of June 30, 2022 - NIS 16,516 million; as of December 31, 2022 - NIS 17,405 million).

For more information on the financial performance of investments in bonds, equity securities and mutual funds, please see Note 2 and Note 3A.

The distinction between Israeli and foreign bonds was made according to the issuer’s country of residence.

(a) Reclassified; during the first quarter of 2023, a reclassification was made between interest-bearing and non-interest-bearing deposits. For the sake of comparability, the Bank made an immaterial adjustment to the comparative figures. The effect of the adjustment as of June 30, 2022 and December 31, 2022 amounted to deposits in the amount of NIS 82.2 billion and NIS 62.7 billion, respectively, from interest-bearing to non-interest bearing. The aforementioned had no effect on the Bank's profit and loss and equity.

Note 8 - Employee Benefits

A. Signing of a collective agreement

On April 16, 2023, the Bank signed a special collective agreement with the Workers' Union for 2023-2026.

Below is additional information regarding the main points of the collective agreement:

1. Annual budget for pay raises - The salary update basket for each of the years 2023-2026 will be the number of employees multiplied by NIS 723 for a manager and NIS 381 for a clerk.
   1.1. In order to motivate all Bank employees to achieve the Bank's return on equity targets in accordance with the Bank's business strategy, a mechanism was established according to which the annual salary update budget will be able to increase up to a maximum annual amount of NIS 950 per manager and NIS 500 per clerk (hereinafter - the "Maximum Amount"), subject to achieving a return on equity of at least 15 percent. A mechanism was established regarding the budget between the minimum and maximum amounts in case of a return of between 10 percent and 15 percent. In addition, a compensation mechanism - payable as a bonus rather than as a pay raise - was established for 2025-2026, in the event that there will not be an entitlement to the maximum budget but the annual inflation exceeds 3 percent. The pay raise budget will be divided differentially between those entitled to it, based on the contribution of each employee to achieving the Bank's targets (excellence indicators).
   1.2. In view of the return achieved in 2022 (17 percent) and the return expected for 2023, a pay raise will be paid at the beginning of 2023 and at the beginning of 2024 according to the maximum amount.
2. Employment period without permanent employee status - In order to increase the Bank's managerial flexibility, on the back of the changes in the banking market, the Bank may employ employees under the collective agreement without giving them permanent employee status for a period of up to 10 years gradually, according to the employee's seniority, and no more than 6 additional years.
3. In order to enable further progress in the Bank's digital-technological transformation, in accordance with the Bank's strategy, it was agreed to significantly increase the number of employees that the Bank may employ under the technological agreement, which will provide the Bank with managerial flexibility in the recruitment and management of the human capital in these areas - without giving permanent employee status.
4. On the back of the continuing transition to the use of digital tools based on data and advanced models, which creates redundancies of various positions at the Bank, an outline has been established to regulate the treatment of employees whose position has become redundant in a way that will enable the Bank to continue its accelerated streamlining trend.
5. In order to motivate the employees each year to achieve the work plan targets, at the beginning of each year, management will publish the targets for which a bonus will be paid on the basis of the annual results. To encourage excellence and a direct connection between contribution and compensation, the bonus will continue to be paid differentially according to the contribution of each employee to the Bank's success.
6. The agreement includes improved social and related benefits for the various population groups at the Bank.
7. New employees recruited to the Bank will be employed under Section 14 of the Severance Pay Law throughout their entire employment period at the Bank.
8. Management and the Workers' Union will negotiate agreements for the adoption of a new promotion format, according to the occupation of each employee (instead of seniority and hierarchy as the main considerations) and an outline for time-limited terms of office.
9. As part of the agreements and to celebrate the Bank's 120th anniversary in 2022, the Bank paid employees a special one-time bonus of NIS 10,000 per employee.

   The effect of the engagement in a collective agreement is an expected decrease in the Bank's net income in 2023 by NIS 70 million, before efficiency measures taken by the Bank's management each year, which are expected to offset most of the increase. In addition, there was a one-time immaterial increase in the Bank's actuarial liabilities.

B. Issuance of the option warrants

On August 16, 2022, the Bank published an outline for a securities offering to officers (other than directors or the President and CEO) and employees of the Bank group totaling up to 5,000,000.

For more information, please see Note 24.A. to the financial statements as at December 31, 2022.

Note 8 - Employee Benefits (cont.)

On March 30, 2023, 239,502 additional option warrants, that are not listed for trading on the Tel Aviv Stock Exchange Ltd., were allocated to 13 employees of the Bank, of which 3 are senior officers at the Bank (other than directors or the President and CEO), including options out of the said amount, which shall be allocated and shall expire or for which the right of the offeree shall be revoked and shall not be exercised into shares and shall be returned to the option pool, all as detailed in the Outline.

At the vesting date of the option warrants, offerees shall be entitled to exercisable shares in an amount to be determined according to the benefit value component only. For this purpose, the "benefit value component" is the difference between the closing price of an ordinary share of the Bank on the TASE on exercise date and the exercise price. The option warrants shall vest in three equal annual tranches (each tranche shall be $33^{1}/_{3}$% of the amount of option warrants allocated to each offeree) as of the allocation date, as follows:

The first tranche shall vest after one year will have elapsed from the allocation date and shall expire 24 months later. It is clarified that the exercise of the first tranche is also subject to a lockup period and to the provisions of Section 102. The second tranche shall vest after two years will have elapsed from the allocation date and shall expire 24 months later. The third tranche shall vest after three years will have elapsed from the allocation date and shall expire 24 months later.

After the exercise of each tranche period ends, the option warrants for that tranche shall expire (if they have not expired or have not been exercised prior to that in accordance with the provisions of the option plan) and the option warrants shall not be exercisable as from that date.

The option warrants are offered to the offerees free of charge, as part of their employment terms and conditions with the Bank. The exercise price of the option warrants effectively allocated is NIS 29.53 per share, according to the average closing price in NIS of the Bank's stock in the thirty trading days that preceded the Board of Directors' approval for the option warrants' allocation.

In respect of the issuance of the abovementioned option warrants, the Bank shall record payroll expenses according to the fair value of the option warrants. This expense shall be recorded in the Bank's financial statements over the options' vesting period.

The fair value estimate of the option warrants as of their vesting date is NIS 1.5 million. The fair value estimate of the option warrants was performed by an external appraiser and is based on the binomial model for option pricing in accordance with the assumptions as included in the outline.

The Bank received approval from the Israel Tax Authority to designate the plan as a "plan to allocate options through a trustee", under Section 102 of the Income Tax Ordinance, using the capital gains taxation track.

On June 28, 2023, the Bank's Board of Directors approved the allocation of 117,585 additional option warrants, which are not listed for trading on the Tel Aviv Stock Exchange Ltd., to 9 employees of the Bank (other than directors or the President and CEO), including options out of the said amount, which shall be allocated and shall expire or for which the right of the offeree shall be revoked and shall not be exercised into shares and shall be returned to the option pool, all as detailed in the Outline.

At the vesting date of the option warrants, offerees shall be entitled to exercisable shares in an amount to be determined according to the benefit value component only. For this purpose, the "benefit value component" is the difference between the closing price of an ordinary share of the Bank on the TASE on exercise date and the exercise price. The option warrants shall vest in three equal annual tranches (each tranche shall be $33^{1}/_{3}$% of the amount of option warrants allocated to each offeree) as of the allocation date, as follows:

The first tranche shall vest after one year will have elapsed from the allocation date and shall expire 24 months later. It is clarified that the exercise of the first tranche is also subject to a lockup period and to the provisions of Section 102. The second tranche shall vest after two years will have elapsed from the allocation date and shall expire 24 months later. The third tranche shall vest after three years will have elapsed from the allocation date and shall expire 24 months later.

Note 8 - Employee Benefits (cont.)

After the exercise of each tranche period ends, the option warrants for that tranche shall expire (if they have not expired or have not been exercised prior to that in accordance with the provisions of the option plan) and the option warrants shall not be exercisable as from that date.

The option warrants are offered to the offerees free of charge, as part of their employment terms and conditions with the Bank. The exercise price of the option warrants effectively allocated is NIS 27.59 per share, according to the average closing price in NIS of the Bank's stock in the thirty trading days that preceded the Board of Directors' approval for the option warrants' allocation.

In respect of the issuance of the abovementioned option warrants, the Bank shall record payroll expenses according to the fair value of the option warrants. This expense shall be recorded in the Bank's financial statements over the options' vesting period.

The fair value estimate of the option warrants as of their vesting date is NIS 0.7 million. The fair value estimate of the option warrants was performed by an external appraiser and is based on the binomial model for option pricing in accordance with the assumptions as included in the outline.

The Bank received approval from the Israel Tax Authority to designate the plan as a "plan to allocate options through a trustee", under Section 102 of the Income Tax Ordinance, using the capital gains taxation track.

On June 28, 2023, the Bank's Board of Directors approved the allocation of 1,135,570 option warrants to the Bank's President & CEO and to 12 officers of the Bank who are members of the Bank's management and one employee of a subsidiary of the Bank according to an outline published by the Bank on August 16, 2022. Out of all said option warrants, the President & CEO is entitled to 145,794 option warrants, the allocation of which was approved on August 10, 2023 by the Bank's general meeting.

For more information, please see Note 24.A. to the financial statements as at December 31, 2022.

The option warrants are exercisable for up to 1,135,570 of the Bank's ordinary shares of NIS 1 p.v. each.

The exercise price of the option warrants will be NIS 27.59 per share. The exercise price is not CPI-linked. The exercise price was determined according to the average closing price of the Bank's stock in the thirty trading days preceding the date of the Board of Directors' resolution.

The option warrants will not be listed for trading on the TASE. The exercise shares that will be issued due to the exercise of the option warrants will be listed for trading on the TASE.

Even if the tenure at the Bank of any of the offerees ends, the option warrants will be in effect until the end of the exercise period.

The shares resulting from the exercise of the option warrants will have equal rights to the ordinary shares for all intents and purposes.

Note 8 - Employee Benefits (cont.)

Rate of increase in the CPI	**(375)**	(372)	(346)	**420**	414	387
Departure rate	**209**	225	192	**(239)**	(246)	(215)
Rate of compensation	**409**	404	378	**(366)**	(363)	(339)

(a) The assumptions are only in respect of the Bank's data.

The employee benefits liability amount is affected by several key variables, which include market variables (discount rates of the liabilities for various periods) and actuarial variables, with some of the actuarial variables being associated with employee behavior. There may be a correlation between changes in market variables and changes in the behavioral actuarial variables. For example, in case of a sharp interest rate hike in the Israeli economy, government bond yields may rise (lowering the pension liability amounts), causing the number of employees opting for the pension fund track to decrease (a decision which will also decrease the Bank's pension liability amounts).

Changes in the Bank's Equity

Allocation of option warrants

For details regarding the expiration and issuance of option warrants not listed for trading to employees and officers of the Bank, please see Note 8.B.

Treasury shares of the Bank

As of the reporting date, the Bank owns 82,564,566 treasury shares.

The Bank's share buyback plan

On May 22, 2023, the Bank's Board of Directors approved a share buyback plan for a total of up to NIS 800 million, from May 24, 2023 until the earlier of May 15, 2024 or until the total buyback amount has been reached.

The share buyback plan will take place as part of the trading on the Tel Aviv Stock Exchange (TASE) and/or through transactions outside the TASE, through an external, independent member of the TASE, which will act under an irrevocable power of appointment, in accordance with the safe harbor mechanism published by the Israel Securities Authority. The buyback plan will take place in three separate stages, each of which shall be irreversible, in accordance with the safe harbor mechanism (hereinafter - “Stage A”, “Stage B” and “Stage C”).

The implementation of Stage A began on May 24, 2023 and ended on August 1, 2023, during which time the Bank purchased (through the independent Stock Exchange member it had contracted) 10,740,308 shares totaling NIS 300 million under the said plan.

Immediately prior to publishing this report, the Bank decided to proceed to Stage B, granting the Tel Aviv Stock Exchange member an irreversible order to initiate Stage B on August 16, 2023. Stage B will end on the earlier of: (a) November 2, 2023; or (b) Completion of the Bank’s share buyback in the amount of NIS 300 million. After the completion of Stage B, if the Bank decides to proceed to Stage C, it shall give the Tel Aviv Stock Exchange member an irreversible order to initiate Stage C on the second trading day following the publication of the first financial statements after the decision to go forward with Stage C has been made. In such a case, Stage C will end on the earlier of: (a) May 15, 2024; or (b) Purchase of the Bank’s shares in the amount of NIS 800 million, less the total amount purchased as part of Stage A and Stage B. If, following the completion of Stage B or Stage C, a decision will be made not to proceed with Stage B or Stage C, mutatis mutandis, the Bank will publish an immediate report to that effect.

Approval of the Banking Supervision Department to carry out the buyback plan, as required under Proper Conduct of Banking Business Directive No. 332, was received on May 17, 2023, subject to meeting the restrictions and capital targets, including the condition whereby the plan will be discontinued effective immediately if, during the plan term, the most recent financial statements published by the Bank will not comply with a Common Equity Tier 1 capital ratio of at least 10.9 percent.

Circular on Adjustments to Proper Conduct of Banking Business Directives for Dealing with the Coronavirus Crisis (Temporary Order) - Proper Conduct of Banking Business Directive No. 250

As of January 1, 2022, Leumi is subject to the minimum capital targets in effect prior to the temporary order - i.e. the CET1 capital ratio shall not fall below 10 percent, and the total capital ratio shall not fall below 13.5 percent. In addition to the Common Equity Tier 1 capital is a capital requirement of 1 percent of the outstanding housing loans as of the dates of the financial statements, excluding housing loans for which an expedient was granted during the temporary order term for dealing with the coronavirus crisis.

In accordance with the circular published by the Banking Supervision Department on September 30, 2021, as of October 1, 2021, the easement remains in effect only in respect to the capital requirement for housing loans not intended for the purchase real estate properties (all-purpose loans). As at June 30, 2023, the additional capital requirement for housing loans is 0.20 percent in terms of CET1.

Accordingly, the minimum capital requirements applicable to the Bank as of June 30, 2023 are 10.20 percent for Common Equity Tier 1 capital ratio (including capital requirement for outstanding housing loans) and 13.50 percent for total capital ratio.

Regarding the leverage ratio, according to the temporary order, a banking corporation whose total consolidated assets constitute at least 24 percent of the Israeli banking system's total assets shall have a consolidated leverage ratio of no less than 5.5 percent (in lieu of 6 percent previously). On May 15, 2022, a circular amending the temporary order was published, according to which the easement shall be extended until December 31, 2023. A corporation which will utilize the easement until that date will be required to once again meet the required leverage ratio that was in place prior to the temporary order in two quarters' time, by June 30, 2024. It was also determined that taking advantage of the easement shall not prevent the distribution of dividends, subject to an total capital planning aimed at reverting to the required leverage ratio.

Note 9A - Equity (cont.)

Dividend Distribution Policy

On March 6, 2019, the Bank's Board of Directors approved a dividend distribution policy, under which the Bank will distribute, each quarter, a dividend of up to 50 percent of the Bank's net income in accordance with the Bank's financial statements for the previous quarter. This was subject to, inter alia, the Bank's meeting its capital adequacy targets, even after the dividend distribution. The actual dividend distribution is subject to the specific resolutions being passed by the Board of Directors prior to each distribution, and to the provisions of the law which apply to dividend distribution, including the provisions of the Companies Law and directives of the Bank of Israel.

On August 14, 2023, the Board of Directors approved a dividend distribution totaling NIS 736 million, which represents approx. 30 percent of the net income for the second quarter of 2023; the approved dividend amount per share of NIS 1 p.v. is 48.00 agorot. The final dividend amount per share is subject to changes due to the share buyback plan. The Board of Directors has set August 28 2023 as the record date for dividend payment and September 7 2023 as the payment date.

Details of paid dividend

May 23, 2023	June 15, 2023	19.10	294

Shelf Prospectus, Bond Issue and Commercial Securities

On May 27, 2021, the Bank published a shelf prospectus in accordance with a permit granted by the Israel Securities Authority. On May 18 2023, the Israel Securities Authority approved the application to extend the issuance period under the Bank's shelf prospectus to May 26, 2024.

On January 18, 2023, the Bank issued a total of USD 500 million p.v. in “green” Subordinated Notes (Series Leumi $ 2033). The series was listed for trading on the TACT Institutional on the Tel Aviv Stock Exchange.

The Subordinated Notes (Series Leumi $ 2033) are repayable in one payment, after 10 years and six months from their issuance date, where the Bank has the option of early redemption in the period from 5 years and three months to 5 years and six months from the issuance date, subject to certain conditions.

The Subordinated Notes (Series Leumi $ 2033) bear fixed annual interest at a rate of 7.129 percent per year, which will be paid in semi-annual payments. Until July 18, 2028. On that date, if early redemption has not been made, the interest rate will be updated in accordance with the government yield in the United States on the same date plus the spread agreed in the issuance, as detailed in the issuance documents.

If circumstances of a trigger event (a point of non-viability or trigger event for absorption of the principal loss amount, the earlier of the two) were to occur, the Subordinated Notes (Series Leumi $ 2033) will be converted into shares according to the average closing prices of the Bank’s shares on the Tel Aviv Stock Exchange in the 14 consecutive trading days preceding the date on which the conversion notice was issued (translated into USD according to the rate on that date), or according to the set minimum rate (USD 4.21053, subject to adjustments), the highest of the two.

The Subordinated Notes (Series Leumi $ 2033) are eligible for inclusion in Tier 2 capital from the dates of their issuance.

On May 30, 2023, the Bank issued a total of NIS 1.492 billion p.v. in bonds by way of an expansion of Series 183 Bonds in consideration for NIS 1.419 billion, as well as NIS 2.428 billion p.v. in commercial securities (CS Series 4).

Note 9A - Equity (cont.)

The principal of the Commercial Securities and interest in respect thereof shall be payable in one lump sum on May 28, 2024; it is not linked to the Consumer Price Index, and carries a spread of 0.19 percent over the Bank of Israel's interest rate.

On August 7, 2023, the Bank issued NIS 0.5 billion p.v. in Credit Linked Notes (Series 1).

The Note's principal will be payable in one lump sum on December 24, 2026, as long as the Bank does not make early redemption, as detailed in the terms of the issuance. The unpaid balance of the Note's principal will bear annual interest at the Bank of Israel interest rate plus 2.3 percent, which will be paid in 40 monthly installments, from September 24, 2023 to December 24, 2026, the final repayment date of the Note's principal. The Notes (principal and interest) are not linked to any linkage basis.

Series 183 Bonds, Credit Linked Notes (Series 1), and Commercial Securities (Series 4) are not recognized for regulatory capital purposes.

Early redemption of Subordinated Bonds

On July 5, 2023, the Bank's Board of Directors decided to redeem, by way of full early redemption, Subordinated Bonds Series 401, which were issued to the public in July 2018. Accordingly, on July 31, 2023, subordinated bonds totaling NIS 681 million were redeemed (including linkage differences).

Note 9B - Capital Adequacy, Leverage and Liquidity

Overview

In May 2013, the Banking Supervision Department amended Proper Conduct of Banking Business Directives Nos. 201-211 on capital measurement and adequacy, in order to adapt them to the Basel III rules.

It should be noted that Basel III rules introduce significant changes in the calculation of regulatory capital requirements, inter alia, in relation to the following:

1. Regulatory capital components
2. Capital deductions and regulatory capital adjustments
3. Treatment of exposures to financial corporations
4. Treatment of exposures to credit risk for impaired debts
5. Capital allocation for CVA risk

Volatile Capital Components

The employee benefits standard, which was first applied in January 2015, has a material effect on Leumi's Common Equity Tier 1 capital, mainly due to the liability being measured in accordance with market interest rates, which are at historical lows, and also due to the considerable volatility such measurement has brought to the Bank's regulatory capital.

In this context, on July 12, 2016, the Bank received individual approval from the Bank of Israel regarding the method of calculating the discount rate to be used for calculating the liability for employee benefits for the purpose of measuring regulatory capital. Pursuant to the approval, the calculation of the discount rate is based on a moving average of market yields for the eight-quarter period ended on the reporting date. This calculation is implemented from the financial statements for the period ended June 30, 2016 to the financial statements for the period ended June 30, 2022.

On September 5, 2022, the Bank's Board of Directors approved, after obtaining the approval of the Banking Supervision Department, to change the manner in which pension liabilities are measured for regulatory capital purposes. According to the new measurement method, each quarter, the Bank will calculate the change in the pension liabilities resulting from changes in the discount interest rate, net of the change in the value of assets pre-designated to hedge these liabilities. The change in the net pension liabilities, after tax, will be spread in a linear fashion, over four quarters, as of the quarter for which the calculation had been made. The new method will be implemented starting on July 1, 2022 and will be in effect until the earlier of the two: a) The financial statements as at December 31, 2029 (inclusive) or b) The reporting date on which the average pension liabilities across the last four quarters will be lower than NIS 10 billion, linked to the CPI (from the known CPI as of July 1, 2022 to the known CPI on the relevant reporting date). At the same time, the Banking Supervision Department revoked its approval to measure the pension liabilities for regulatory capital purposes according to a moving average of market yields for a period of eight quarters ended on the relevant reporting date, which was in effect as of the financial statements as at June 30, 2016.

On November 15, 2016, the Bank's Board of Directors decided, based on the recommendation of the Audit Committee, to calculate the liabilities for employee pensions according to the fixed spread of internationally AA-rated bonds.

For regulatory capital purposes, the pension liability amounts to NIS 17,879 million and the Common Equity Tier 1 capital - to NIS 51,373 million, compared with a book value of NIS 17,855 million for the pension liability and Common Equity Tier 1 capital of NIS 50,521 million.

Note 9B - Capital Adequacy, Leverage and Liquidity (cont.)

Following is an analysis of the effects of the changes on Common Equity Tier 1 capital as at June 30, 2023:

- Change in total risk-weighted assets – risk-weighted assets amounted to NIS 457.3 billion as at June 30, 2023. Every NIS 1 billion increase in risk-weighted assets will reduce the Common Equity Tier 1 capital ratio by 0.02 percent and total capital ratio by 0.03 percent.
- Change in Common Equity Tier 1 capital - as of June 30, 2023, Common Equity Tier 1 totals NIS 51.4 billion. A decrease of NIS 100 million in the Common Equity Tier 1 capital will reduce the CET1 capital ratio by approx. 0.02 percent.

(b) Adjustments for the efficiency plans in accordance with the provision of the Banking Supervision Department are charged over a 5-year period, on a straight-line basis, in respect of capital adequacy calculations.
(c) These data include adjustments in respect of the effect of first-time application of GAAP for current expected credit losses, which are gradually reduced until December 31, 2024. For more information, please see Note 1.X.1 to the financial statements as of December 31, 2022.

D. Leverage ratio pursuant to the Banking Supervision Department's directives

On April 28, 2015, the Banking Supervision Department issued Proper Conduct of Banking Business Directive No. 218, "Leverage Ratio". The directive sets a simple, transparent and non-risk based leverage ratio to serve as a supplementary and reliable measure for risk-based capital requirements, with the purpose of limiting excess leverage in banking corporations.

The leverage ratio is expressed as a percentage, and is defined as the ratio between capital measurement and exposure measurement. As defined in Proper Conduct of Banking Business Directive No. 202, Tier 1 capital is used for calculating the leverage ratio, taking into account the transitional provisions. A bank's total exposure is the sum of its balance sheet exposures, exposure to derivatives, exposure to securities financing transactions and to off-balance-sheet items. As a rule, the measurement is consistent with the accounting values, and no risk-weighting is applied. In addition, unless specifically permitted to do so under the Directive, the Bank may not use physical or financial collaterals, guarantees or other credit risk mitigation techniques to reduce the exposure measurement. Balance sheet assets deducted from Tier 1 capital (in accordance with Directive No. 202) are deducted from the exposure measurement. Pursuant to the Directive, the Bank calculates the exposure to derivatives according to of Proper Conduct of Banking Business Directive No. 203A, and the exposures for off-balance-sheet items - by converting the items' notional amount by credit conversion coefficients, as stipulated in Proper Conduct of Banking Business Directive No. 203.

Pursuant to the Directive, banking corporations shall have a consolidated leverage ratio of no less than 5 percent. A banking corporation whose total consolidated assets constitute at least 24 percent of the Israeli banking system's total assets shall have a consolidated leverage ratio of no less than 6 percent. Thus, the Bank is required to have a minimum leverage ratio of 6 percent.

On November 15, 2020, the Bank of Israel published a circular outlining further amendments to Proper Conduct of Banking Business Directives for Handling the Coronavirus (Temporary Order) (Directive No. 250). The circular sets adjusts Proper Conduct of Banking Business Directive No. 218, "Leverage Ratio", such that a banking corporation whose consolidated on-balance sheet assets is 24 percent or more than the total on-balance sheet

Note 9B - Capital Adequacy, Leverage and Liquidity (cont.)

assets of the banking system, shall comply with a leverage ratio of no less than 5.5 percent; according to the above, the minimum leverage ratio the Bank is required to meet is 5.5 percent. For more information about the temporary order for addressing the coronavirus crisis, please see Note 9A. Above.

As for the easing of the leveraging requirements, the easement shall be in effect until December 31, 2023, provided that the leverage ratio of a banking corporation does not fall below the leverage ratio as of June 30, 2022 or the minimum leverage ratio applicable to the banking corporation prior to the temporary order, whichever the lower. On May 15, 2022, a circular amending the temporary order was published, according to which the easement shall be extended until June 30, 2024, with the leverage ratio not falling below the leverage ratio as of December 31, 2023 or the minimum leverage ratio applicable to the banking corporation prior to the temporary order, whichever the lower. It was also determined that taking advantage of the easement shall not prevent the distribution of dividends, subject to an total capital planning aimed at reverting to the required leverage ratio.

Leverage ratio	**6.69%**	6.25%	6.36%
Minimum total leverage ratio set by the Banking Supervision Department	**5.50%**	5.50%	5.50%

(a) The data include adjustments in respect of the efficiency plan in accordance with the directives of the Banking Supervision Department. For more information regarding the adjustments for the efficiency plan, please see Section C above.
In addition, in the calculation of the leverage ratio, adjustments in respect of the implementation of the new measurement method relating to certain actuarial liabilities were taken into account. For additional details regarding the effect of the transition to the new method, see Section B above.

(b) The data include adjustments in respect of CECL, in accordance with the directives of the Banking Supervision Department.

(c) Total exposures were calculated after implementing the revisions to Proper Conduct of Banking Business Directive 218, "Leverage Ratio", following the revision of Directives 203 and 203A, "Measurement and Capital Adequacy - the Standardized Approach - Credit Risk". Comparative results were not restated.

E. Liquidity Coverage Ratio Pursuant to the Directives Issued by the Banking Supervision Department

On September 28, 2014, a circular was published adding Proper Conduct of Banking Business Directive No. 221, "Liquidity Coverage Ratio", which applies the recommendations of the Basel Committee regarding liquidity coverage ratio to the banking system in Israel. The liquidity coverage ratio examines a time-horizon of 30 days under a stress scenario, and is intended to ensure that a banking corporation has an inventory of high-quality liquid assets that is able to cover the corporation's liquidity requirements in this time horizon. The Directive prescribes the manner of calculating the liquidity coverage ratio, including the characteristics and operational requirements for an "inventory of high-quality liquid assets" (the numerator) and sufficient buffers for them; it also prescribes the net cash outflow expected under the stress scenario defined in the Directive for 30 calendar days (the denominator).

The stress scenario set forth in the directive includes a shock scenario combining a corporation-specific shock and a systemic shock; in this context, standard withdrawal and deposit rates were defined for outflows and inflows, respectively, according to the various balance categories.

As from January 1, 2017, the required minimum liquidity coverage ratio is 100 percent. However, in a period of financial pressure, a banking corporation may fall below these minimum requirements.

F. Net stable funding ratio pursuant to the Banking Supervision Department's directives

As of the financial statements dated December 31, 2021, the Bank is reporting the Net Stable Funding Ratio (NSFR) Directive No. 222, which is based on a publication of the Basel Committee. The NSFR is aimed at improving the resilience of banking corporations' liquidity risk profile in the long term, by requiring them to maintain a stable financing profile according to the composition of their assets and their off-balance-sheet activities. The ratio prevents banking corporations from over-reliance on short-term wholesale financing. The measurement is made both on the consolidated and separate levels each quarter; the requirement is to meet a 100 percent ratio.

B. Legal claims

During the regular course of business, legal claims have been filed against the Bank and certain consolidated companies, including class actions certification motions. Note 26 to the Bank's Annual Financial Statements as at December 31, 2022 included information regarding all pending material legal claims as of the publication date of the Annual Financial Statements. The following note contains information regarding material legal claims filed during the reporting period and close to its publication date, if any, as well as changes that occurred in respect of material lawsuits filed in previous reporting periods; the note does not contain information regarding legal claims reported in Note 26 to the Bank's Annual Financial Statements as at December 31, 2022 in which no change has occurred.

In the opinions of the management of the Bank and the managements of the consolidated companies - which are based on legal opinions regarding the expected results of such claims, including class action certification motions - the financial statements reflect adequate provisions, where needed, to cover any damages resulting from such claims.

In the opinion of the management of the Bank and the managements of the consolidated companies, the amount of additional exposure arising from legal claims filed against the Bank and the consolidated companies on various issues, the amount of each of which exceeds NIS 2 million, and regarding which the chances of the claims succeeding are not remote, is approx. NIS 327 million.

1. Following are the changes in material claims reported in Note 26 to the Annual Financial Statements of the Bank as at December 31, 2022:

   1.1. On July 22, 2015, a motion for class certification was filed against the Bank. According to the applicant, the Bank's reporting to the Execution Office regarding amounts paid directly to the Bank on account of debt in respect of which a collection procedure is being conducted by the Execution Office, is delayed by the bank and, as a result, a difference allegedly arises between the actual amount of debt and the debt amount recorded in the Execution Office file. The applicant estimated the amount of the class action at millions of shekels. On March 14, 2023, the court approved a request agreed between the parties for the withdrawal of the applicant from the claim and, as a result, the class action lawsuit was deleted and the personal claim of the applicant was rejected.

Note 10 - Contingent Liabilities and Special Commitments (cont.)

1.2. On November 24, 2020, a motion for class certification was filed with the Jerusalem District Court against the Bank and against six other banks. According to the lawsuit, the banks have violated the Credit Information Service Law, 2016 and the regulations thereunder, by reporting to the Central Credit Register legal proceedings against customers, contrary to the provisions of the law and in a manner that damaged the customers' ability to obtain credit and compromised their privacy and reputation. The plaintiffs did not state a damage assessment for the class and claimed a monetary damage that varies among class members, as well as non-monetary damage. On March 26, 2023, the court approved a settlement in this procedure, which ended the class action.

1.3. On March 29, 2017, a motion for class certification was filed against the Bank and similar legal claims were filed against other banks. Alternately, the applicant, the Bank may not charge a "correspondent bank fee" when transferring foreign currency from a customer's account to a bank account abroad, contrary to the provisions of the Banking Law (Service to Customer), 1981 and the rules pursuant thereto (hereinafter - the "Banking Grounds"); alternatively, the applicant claims that the Bank may only charge a correspondent bank fee at the amount of the expense it actually incurred (the amount that it actually paid to the correspondent bank); to the extent that the Bank did not act accordingly, this constitutes a breach of contract, unjust enrichment, and is contrary to the provisions of the Emissary Law, 1965 (hereinafter - the "Agency Law Grounds"). The applicant claims that, the personal damage he has incurred is USD 30, and the damage incurred by the class of plaintiffs cannot be estimated. On February 16, 2023, a court decision was handed down certification of the claim as a class action lawsuit only on the Agency Law Grounds, and rejecting the Banking Grounds. On May 30, 2023, a request for permission to appeal was filed on behalf of the Bank (as well as several other banks) on the certification decision. On June 1, 2023, an appeal was filed by the applicant against the certification decision regarding the rejection of the Banking Grounds.

1.4. On September 6, 2021, a motion for class certification was filed with the Haifa District Court against five banks, including the Bank, stating that the plaintiffs suffered damage following tax overcharges relating to proceeds from securities (such as dividends, interest, etc.), in cases there is a difference between the customer's country of residence and the security issuer's taxing country. According to the plaintiffs, the tax rates should be charged in accordance with the treaties for preventing double taxation between the relevant countries which, they claim, is not carried out effect. The plaintiffs do not state a damage assessment for the class. On July 9, 2023, the court approved the withdrawal motion of the applicants and, as a result, the class action lawsuit was concluded.

2. Also pending against the Bank are motions for class certification for a material amount, which – according to the Bank's management, which is based on legal opinions as to the odds of these motions being approved – it is impossible to estimate the odds at this stage. For this reason, no provisions were made in respect of these motions:

2.1. On June 4, 2023, a motion for class certification was filed in the Tel Aviv District Court against the Bank and against other banks. The motion argued, among other things, that banks must grant customers daily interest on credit balances or inform them of the possibility of depositing the funds in an interest-bearing daily deposit. The applicants estimate the class damages at over NIS 1 billion (for all the defendant banks).

2.2. On June 21, 2023, a motion for class certification was filed in the Tel Aviv District Court against the Bank and against other banks. The subject of the motion is the Bank's raising of the Prime interest rate, for the purpose of determining the debit interest on current account balances, interest for delay and interest on loans and on any type of debit balances, at the rate of the Bank of Israel's interest rate increase rather than according to the change in interest on the sources used to finance the credit in the period beginning in April 2022. The applicants estimate the class damages at over NIS 5 billion (for all the defendant banks).

Note 10 - Contingent Liabilities and Special Commitments (cont.)

2.3. On July 19, 2023, a motion for class certification was filed in the Tel Aviv District Court against the Bank and against other banks. The motion claimed, among other things, that the interest rate paid on deposits made through the website or app pay lower than the average interest rates than the customary and accepted interest rate and the actual interest paid on deposits made through a clerk, without informing the customers regarding the possibility of receiving higher interest and without inviting them to negotiate the terms and conditions with the Bank. The applicants estimate the class damages at over NIS 984 million (for all the defendant banks).

C. Contingent Liabilities and Miscellaneous Commitments

On February 1, 2023, a decision was received from the Committee for the Imposition of a Monetary Sanction regarding Banking Corporations according to the Prohibition on Money Laundering Law, 2000, regarding the imposition of a financial sanction in the amount of approx. NIS 1.8 million in connection with two technological malfunctions that occurred at Pepper in 2021, which affected the accessibility and completeness of the identification process documentation, which constitutes part of the process for opening accounts in a certain period. The malfunction did not and could not cause harm of any kind to customers, or exposure of information in their regard. Pepper acted to repair the malfunctions. The financial sanction was paid in full.

D. Other proceedings

On February 28, 2023, a petition for a mandatory injunction was submitted to the Tel Aviv District Court (Economic Department) for discovery and review of documents. The applicant is petitioning for the discovery of various documents relating to the compensation paid to the Bank's officers, in order to examine the filing of a derivative claim on behalf of the Bank against senior officers and employees at the Bank in connection with the compensation granted to the Bank's officers in apparent violation of the Compensation for Officers of Financial Corporations Law (Special Approval and Disallowance of Expenses for Tax Purposes in Respect to Exceptional Compensation), 2016 and Proper Conduct of Banking Business Directives 301 and 301A.

Net amount of liabilities in respect of derivatives	170	176	147	17	154	780	1,444

(a) The Bank did not apply netting agreements.
(b) Of which outstanding balance-sheet standalone assets in respect of derivatives totaling NIS 26,173 million (June 30, 2022 - 26,972 million, December 31, 2022 - NIS 26,638 million).
(c) Of which outstanding total standalone liabilities in respect of derivatives totaling NIS 23,107 million (June 30, 2022 - 23,954 million, December 31, 2022 - NIS 23,311 million).
(d) Off-balance sheet credit risk for derivatives (including derivatives with negative fair value) before credit risk mitigation, as calculated for the purpose of limitations on borrower indebtedness.
(e) The difference, if positive, between all total amounts for derivatives (including derivatives with negative fair value) included in the borrower's indebtedness, as calculated for the purpose of borrower credit limitations, before credit risk mitigation, and the book balance of assets for the borrower's derivatives).
(f) Book balance of assets for derivatives after offsetting fair value and collateral amounts that meet the offsetting guidance, in accordance with the circular regarding offsetting assets and liabilities.
(g) The difference between all total amounts for derivatives (including derivatives with negative fair value) included in the borrower's indebtedness, as calculated for the purpose of borrower indebtedness limitations, after credit risk mitigation, and the total of: the net book balance of assets for the derivatives and off-balance-sheet credit risk.
(h) The difference, if positive, between all total amounts for derivatives (including derivatives with negative fair value) included in the borrower's indebtedness, as calculated for the purpose of borrower credit limitations, before credit risk mitigation, and the on-balance sheet credit risk for the borrower's derivatives.
(i) On balance-sheet credit risk and off-balance-sheet credit risk, as revised in the Reporting to the Public Directives, in a circular dated July 24, 2022, following the publication of Directive 203A (for additional details, see under Capital and Capital Adequacy). Comparative results were not restated.
(j) Restated.

Comments:
1. No credit losses were recognized in respect of derivatives in the six-month periods ended June 30, 2023, June 30, 2022 and the year ended December 31, 2022.
2. The effect of the counterparty credit risk and the effect of deferred gains at the transaction execution date on the valuation of assets for derivatives as at June 30, 2023, June 30, 2022 and December 31, 2022 was NIS 249 million, NIS 186 million and NIS 225 million, respectively.
   The effect of the non-performance risk on the valuation of assets for derivatives as at June 30, 2023, June 30, 2022 and December 31, 2022 was NIS 15 million, NIS 34 million and NIS 21 million, respectively.

Total interest income, net	1,550	396	18	109

(a) The classification is based on the office's location.
(b) Average balance calculations are based on daily balances, as at the beginning of the quarter or the beginning of each month.
(c) Risk-weighted assets - as calculated for capital adequacy purposes.
(d) Assets under management - including customers' provident assets, study funds, mutual funds and securities.
(e) Including housing loans with outstanding loans to the public as at end of period in the amount of NIS 19.0 billion to customers whose business activity is classified to business segments.
(f) Spread from credit granting activity is the difference between the interest received from credit and the cost of raising the sources used to grant the credit (hereinafter - "transfer prices"). These transfer prices are subject to the period, currency and type of interest in the transaction. Transfer prices are the Bank's internal pricing tool and are based on internal models and the Bank's judgment. Spread from deposit taking activity is the difference between the transfer prices and the interest paid to customers for these deposits.

Comment: Operating segments are reported according to the format and classifications prescribed by the Reporting to the Public Directives of the Banking Supervision Department, as detailed in Note 29A to the Financial statements as at December 31, 2022.

Balance of deposits by the public as at the end of the reporting period	124,928	-	-	28,226
Average balance of risk-weighted assets[b][c]	90,077	66,109	3,578	738
Balance of risk-weighted assets as at the end of the reporting period[c]	94,291	69,187	3,542	855
Average balance of assets under management[b][d]	62,046	513	-	48,912
Breakdown of interest income, net:				
Spread from credit granting activity[f]	604	295	14	5
Spread from deposit taking activity[f]	154	-	-	29
Other	-	-	-	-
Total interest income, net	758	295	14	34

(a) The classification is based on the office's location.
(b) Average balance calculations are based on daily balances, as at the beginning of the quarter or the beginning of each month.
(c) Risk-weighted assets - as calculated for capital adequacy purposes.
(d) Assets under management - including customers' provident assets, study funds, mutual funds and securities.
(e) Including housing loans with outstanding loans to the public as at end of period in the amount of NIS 17.6 billion to customers whose business activity is classified to business segments.
(f) Spread from credit granting activity is the difference between the interest received from credit and the cost of raising the sources used to grant the credit (hereinafter - "transfer prices"). These transfer prices are subject to the period, currency and type of interest in the transaction. Transfer prices are the Bank's internal pricing tool and are based on internal models and the Bank's judgment. Spread from deposit taking activity is the difference between the transfer prices and the interest paid to customers for these deposits.
(g) Reclassified. The results of intersegmental operations arising from crediting and debiting the business units for transfer prices were classified to the "Other" line item. This was done in order to sum up, across all segments, the total spread from loans to the public and total spread from deposits by the public, in lieu of interest income from credit and interest expenses on the deposits.

Spread from deposit taking from the public[g]	1,158	-	-	188
Other	-	-	-	-
Total interest income, net	3,788	1,365	57	206

(a) The classification is based on the office's location.
(b) Average balance calculations are based on daily balances, as at the beginning of the quarter or the beginning of each month.
(c) Risk-weighted assets - as calculated for capital adequacy purposes.
(d) Assets under management - including customers' provident assets, study funds, mutual funds and securities.
(e) Including housing loans with outstanding loans to the public as at end of period in the amount of NIS 18.6 billion to customers whose business activity is classified to business segments.
(f) Including revenues totaling NIS 782 million in respect of the Valley merger.
(g) Spread from credit granting activity is the difference between the interest received from credit and the cost of raising the sources used to grant the credit (hereinafter - "transfer prices"). These transfer prices are subject to the period, currency and type of interest in the transaction. Transfer prices are the Bank's internal pricing tool and are based on internal models and the Bank's judgment. Spread from deposit taking activity is the difference between the transfer prices and the interest paid to customers for these deposits.
(h) Reclassified. The results of intersegmental operations arising from crediting and debiting the business units for transfer prices were classified to the "Other" line item. This was done in order to sum up, across all segments, the total spread from loans to the public and total spread from deposits by the public, in lieu of interest income from credit and interest expenses on the deposits.

Note 12B - Operating Segments - Management Approach

Overview

Operating segments reporting according to management approach presents the Bank's results by business line, in accordance with the Bank's organizational structure.
The Bank's business lines specialize in providing services to customer segments with similar characteristics and needs.

Information regarding operating segments - management approach was included in Note 29B to the Annual Financial Statements as at December 31, 2022.

Set forth below are the condensed results of operations according to management approach

	For the three months ended June 30, 2023 (unaudited)

Stock contracts	7	Discounted cash flows	Counterparty risk	0.60%-100%	1.39%
b. Items measured at fair value on a non-recurring basis					
Collateral-dependent non-performing credit	94	Collateral's fair value			

* For a defaulted counterparty.

Please see comments below.

(1) The following unobservable inputs were used to measure the fair value of asset-backed or mortgage-backed securities: Spread, probability of default, early repayment rate, and severity of loss in the event of a default.
A significant increase/decrease in the unobservable inputs will be reflected in a significantly lower/higher fair value, respectively.

(2) The following unobservable inputs were used to measure the derivatives' fair value: counterparty credit risk and expected inflation rate. The higher/lower a counterparty's credit risk, the lower/higher the contract's fair value, respectively.
A change in the expected inflation rate will affect the contracts' fair value in accordance with the Bank's CPI-linked position on these contracts. The higher (lower) the expected inflation rate with the Bank committed to paying the CPI-linked amount, the lower (higher) the contracts' fair value, respectively. The higher (lower) the expected inflation rate with the counterparty committed to paying the Bank the CPI-linked amount, the higher (lower) the contracts' fair value, respectively.

(3) The average figure for the unobservable input "counterparty risk" reflects a weighted average. The weighted average was calculated based on the relative fair value of the exposures.

Note 16 - Miscellaneous Topics and Events after the Balance Sheet Date

A. Impairment of the investment in Valley

As outlined in Note 15 and Note 1.E.2. to the Bank's financial statements as at December 31, 2022, the Bank's investment in the shares of Valley National Bancorp (hereinafter - "Valley") is recorded in the Bank's books according to the equity method.

In the wake of significant decreases in the share prices of the US banking segment in general, and mid-sized banks in particular, the Bank examined the need to recognize an impairment in respect of its investment in Valley.

The Bank examined indicators related to Valley's performance and to the performance of the shares, taking into consideration the general situation in the markets, and in the US banking system in particular, with emphasis on mid-sized and small banks.

In view of the above, the Bank believes that the decrease in fair value is of an other-than-temporary nature, and accordingly, the difference between the fair value of the investment and its value in the books was recognized as an impairment loss in the first quarter of 2023.

The fair value of the investment in Valley was determined according to the quoted market value of the share as of March 31, 2023 without adjustments, which was USD 9.24 per share, and as of that date - amounts to NIS 2.4 billion. The impairment recorded in respect of the investment in Valley amounted to NIS 1.1 billion, after tax.

The impairment loss was recorded in the income statement under the "Bank's share in associates' profits (losses)" line item.

For this loss, the Bank recognized a deferred tax asset, which may be utilized as a deduction from the taxable income upon disposal of the investment.

The impairment was allocated in accordance with the fair value of net identifiable assets arising from the Bank's investment in Valley. The reduction in the value did not have a significant effect on the Bank's regulatory capital adequacy.

For more information regarding the impairment of investments in equity-accounted associates, please see Note 4.V.1 to the financial statements as at December 31, 2022.

Shortly before the report's publication date, the market value of Valley's shares held by the Bank is NIS 2.6 billion.

B. Sale of Beit Lin

On March 28, 2023, the Bank engaged (through a wholly owned subsidiary) in an agreement with JTLV 3 (Beit Lin) Limited Partnership (hereinafter - the "Acquirer") for the sale of 50 percent of its rights in an office tower at 35 and 37 Yehuda Halevi St., Tel Aviv, known as Beit Lin, which is currently used by the Bank (hereinafter - the "Property"), according to a total asset value (100 percent) of NIS 650 million. The consideration payable to the Bank is NIS 325 million plus VAT (hereinafter - the "Consideration"; the "Sale Agreement"). At the same time, the parties entered into an agreement to regulate the cooperative relationship in the property for its improvement.

C. The Bank's UK office

On March 8, 2022, the Bank's board of Directors approved the recommendation of BLUK's board to implement a measure which includes returning BLUK's regulatory license, such that after the measure will have been completed, BLUK will be a credit provision company. To this end, BLUK will be merged into LABL, a BLUK subsidiary (hereinafter – "Leumi UK Group").

Leumi UK Group provides credit primarily in the fields of real estate, hotels and ABL, only to commercial customers in the UK and Europe, including Israeli customers active in these geographies; this includes investments in and development of residential real estate and financing of commercial real estate (homes for the elderly and student dormitories). Funding is extended both to customers in and outside the UK (mainly Israeli).

All the conditions required for the organizational change process were met, including the transfer of all business activity from BLUK to Leumi UK Group, an announcement of voluntary liquidation of BLUK and the UK regulator's confirmation regarding the revocation of BLUK's banking license. The aforementioned organizational change process was thus completed.

BANK LEUMI LE-ISRAEL B.M. AND ITS INVESTEE COMPANIES

Corporate Governance, Additional Details and Appendices

Table of Contents

Changes in the Board of Directors

As of the report publication date, the Board of Directors includes ten members, in accordance with the number of directors allowed in banking corporations pursuant to Proper Conduct of Banking Business Directive No. 301 (hereinafter - "Directive 301"). During the second quarter of 2023 there were no changes in the composition of the Board of Directors.

On February 1, 2023, CPA Yitzhak Edelman ended his tenure as a director at the Bank. For more information, please see the immediate report published by the Bank on January 27, 2022 (Ref. No. 2022-01-011986) and the report regarding the end of tenure on February 2, 2023 (Ref. No. 2023-01-013728).

On July 17, 2023, the Annual General Meeting approved the following resolutions:

1. To reappoint CPA firm Somekh Chaikin (KPMG) and Brightman Almagor Zohar & Co. (Deloitte) as the Bank's joint independent auditors, for a period beginning upon the approval of the current annual general meeting until the end of the next annual general meeting of the Bank and to authorize the Bank's Board of Directors to determine their fees.
2. To appoint Mr. Uri Alon as a director who is not an external director, as stated in Section 11D(a)(2) of the Banking Ordinance, 1941 (hereinafter - "Director with an Other Director Status") for a 3-year period upon and subject to the approval or non-objection of the Banking Supervision Department.
3. To appoint Adv. Esther Deutsch as an Other Director for a 3-year period upon and subject to the approval or non-objection of the Banking Supervision Department.
4. To appoint Prof. Yedidia Stern as an External Director in accordance with Directive 301, for a 3-year period upon and subject to the approval or non-objection of the Banking Supervision Department.

For more information, please see the immediate reports dated April 4, 2023, May 10, 2023 and July 17, 2023 (Ref. No.: 2023-01-038853, 2023-01-050268, 2023-01-081393, respectively).

For more information regarding the directors' competencies as required by Directive 301, please see the section entitled Members of the Bank's Board of Directors in the Corporate Governance Report as at December 31, 2022.

The Chief Internal Auditor

Information regarding the Group's internal auditing function, including the appointment of a new internal auditor, the professional standards pursuant to which the Internal Audit Division operates, the annual and multi-year work plans and the considerations taken into account in formulating the work plans were included in the Corporate Governance Report as at December 31, 2022.

The 2022 Internal Audit Report of the Leumi Group was submitted to the Audit Committee on March 22, 2023, discussed by the Committee on March 29, 2023, submitted to the Board of Directors on March 27, 2023 and discussed by the Board on April 24, 2023.

Control of the Bank

As of March 24 2012, Leumi is defined by law as a banking corporation without a controlling core, and no shareholder meets the definition of a controlling shareholder of the Bank.

For up-to-date information regarding interested parties' holdings in the Bank as at June 30, 2023, please see the immediate report on the status of holdings of interested parties and senior officers dated July 6, 2023 (Ref. No.: 2023-01-076281). Please see also the immediate report on the list of holders of significant means of control in the Bank as of March 31, 2023, dated April 10, 2023 (Ref. No.: 2023-01-035011), the report on who became a holder of material means of control from April 13, 2023 and June 4, 2023 (Ref. No.: 2023-01-040491 and 2023-01-052108, respectively).

For more information, please see Note 8.A and the immediate report dated April 16, 2023.

Issuance of option warrants

For more details regarding issuance of option warrants, see Note 8.B

Material Agreements

For more information regarding additional material agreements, please see the Note 16 and the Material Agreements section in the financial statements as at December 31, 2022.

Laws and Regulations Governing the Banking System

Some of the information in this section constitutes forward-looking information. For the meaning and implications of the term, please see the section entitled “Forward-Looking Information”.

During the reporting period, several proposals for regulatory amendments and changes to various legal provisions were published, which could have an impact on the characteristics, scope and profitability of some of the Group's activities and on the credit, operating and legal risks to which it is exposed. Some of the directives are at various stages of discussion and, consequently, it is impossible to assess whether or not they will be issued as binding provisions and, if issued, what the ultimate provisions will be. As a result, at this stage, it is impossible to assess the effect of these provisions on the Group's overall activity, if any. The following section provides detailed information on newly enacted legislation, which came into effect during the reporting period and provisions expected to enter into effect, which were published after the date of signing the financial statements for 2022, which may have a significant effect on the Bank.

For a description of directives published in the reporting period before the date of signing the financial statements for 2022, please see the section entitled “Legislation and Regulation of the Banking System” in the Corporate Governance Report of 2022.

Directives Issued by the Banking Supervision Department

Proper Conduct of Banking Business Directive No. 461, Banking Corporation’s Activity as a Broker Dealer and the FAQ file for applying the directive

On July 19, 2023, the directive was published with the aim of regulating the financial brokerage activity of banking corporations regarding the receipt of orders to carry out transactions in securities and financial instruments for customers, by way of trading for their own account (broker dealer activity). The main points of the Directive are as follows: Establishment of an organizational structure, policies and procedures for carrying out and overseeing transactions and for the prevention of conflicts of interest; adoption of a code of conduct for operating with integrity, fairness and professionalism for the benefit of the customers’ interests, including the provision of information regarding the transaction; adapting the customers’ activity in securities and in financial instruments to their level of knowledge or experience; establishment of procedures for fair and swift execution of customers’ orders; taking all reasonable measures to achieve the best result for customers; implementation of IT systems for protection against operational risks and cyber risks; maintaining documentation and development of monitoring and control tools.

The Directive is effective eighteen months from the date of its publication.

The Directive requires adjustments to be made to work processes.

Amendment to Proper Conduct of Banking Business Directive 451 - Procedures for Providing Housing Loans

Further to the Legislation and Regulation section in the Corporate Governance Report for 2022, on July 19, 2023, the Banking Supervision Department published an additional amendment to the Directive in which the early repayment process of a housing loan was revised, including by way of a loan from a banking corporation or from another institutional lender (loan recycling).

The revision of the law will enter into effect one year after its publication.

Directives regarding banking consumerism

The Economic Plan Law (Legislative Amendments for Implementing the Economic Policy for Budget Years 2023 and 2024), 2023

Under the law published on June 7, 2023, the Banking Law (Service to Customers), 1981 was amended and it was determined that: (a) A banking corporation should inform its customers - in accordance with the fees and commissions list that it is entitled to charge amounts or rates that are lower than the amounts or rates listed therein; (b) A banking corporation shall not charge its customers a fee or commission in an amount or rate that are higher than those listed in the fees and commissions list; (c) If it is agreed with a customer than he/she shall be charged a fee or commission that is lower than that of the fees and commissions list - the customer may not be charged a higher fee or commission than agreed; (d) A customer may not be charged a fee or commission unless the service in respect thereof has been provided to the customer.

Amendment of Proper Conduct of Banking Business Directive No. 422 - Opening a current account with a credit balance and account management

On March 29, 2023, an amendment to the directive was published, which clarified that since a current account is an essential account, through which a customer manages the majority of his/her financial activity (and therefore a banking corporation must enable any customer to open, at least, a current account with a credit balance and to manage it, provided that there is no reasonable grounds for not providing service (hereinafter - "reasonable refusal") - according to the Banking Law (Customer Service), sweeping rules should not be established to block a customer's activity in his/her account, and the use of basic payment methods or account transactions should not be prevented just because the account or customer is a certain type of account or customer, and that each request should be examined on its merits, exercising discretion. In addition, the Directive was expanded such that it will apply not only to accounts with a credit balance but also to accounts with a debit balance that do not deviate from the approved credit facility. In addition, the basis payment services determined in the Directive were expanded in order to allow the customer to conduct his finances in an efficiently and conveniently. The amendment will enter into effect one year from its publication date.

Proper Conduct of Banking Business Directive 501 - Management of a Customer Service and Support System

On March 29, 2023, the directive was published establishing principles for the provision of service and support to customers, which express the customer-centric concept and obligates the banks to maintain efficient and responsible communication with their customers and to provide them with professional, effective and available service and support in various service channels, while addressing the customers' needs, their characteristics and the complexity of the financial products. Among other things, the directive establishes obligations regarding corporate governance, according to which the Board of Directors and senior management are required to determine a strategy and policies for the provision of service and support to customers and to promote an organizational culture, operational infrastructures, control mechanisms and work processes that will improve the quality and availability of the service and support provided to customers. The directive includes principles for providing service and support to customers, as follows: (1) An optimal service and support system - ensuring the provision of service that meets the needs of the customers, across a variety of channels, in simple, respectful and clear language and in a professional, readily available, quick and helpful manner; (2) Promoting useful communication between the banking corporation and the customer when providing the service and support: (3) Preventing barriers to service, harm or deception; (4) Availability and quality throughout the entire period of engagement; (5) Service and support adapted to the customers; (6) Providing proper and quality service across a variety of channels.

In addition, it was determined that a service level agreement and a service terms agreement must be published. The directive includes an indirect amendment to Proper Conduct of Banking Business Directive 401 - "Opening Days of Banking Corporations' Offices", which determined that a banking corporation may not prevent customers from entering a branch to receive service even without making an appointment in advance. It was also determined that the actual average waiting and response times must be published regarding the services and service channels detailed in the service level agreement and compared to the levels of service to which the banking corporation has committed in the service level agreement. The directive will enter into effect on March 29, 2024. Publication of the information regarding times and the manner of providing the services - the provision whereby entering the branch and receiving service as described above must not be prevented entered into effect on June 29, 2023. Publication of the actual average waiting and response times will enter into effect two years from publication of the directive.

Amendment to Proper Conduct of Banking Business Directive No. 434 - Joint Account - "Survivors" Clause

The proposed amendment, dated June 13, 2023, prescribes various provisions intended to increase awareness of partners to a bank account to the survivors' clause and its significance, and to enable a survivor to use the account in case of a partner's death, inter alia: (1) In the joint account opening agreement, the banking corporation should offer its customers a survivors' clause and present it clearly. In conjunction with the survivors' clause, an explanation regarding its significance should be included; (2) In case of a change in signatory rights in a joint account, the bank should inform the partners regarding the applicability of the survivors' clause to the account and their entitlement of alter their choice; (3) If a partner joins the account, the bank will ask the partners for their up-to-date choice regarding the applicability of the survivors' clause; (4) Processes were prescribed with the aim of enabling surviving partners to repay existing debts through means of payment issued to the deceased partner. The amendment will enter into effect 12 months from its publication date. Within 6 months of the amendment's publication date, the bank must contact, once, all existing joint account holders who did not opt for the condition to apply to them, in order to draw their attention to the issue and determine their needs.

Draft Amendment to Proper Conduct of Banking Business Directive No. 367 - "E-Banking"

Under the draft, which was published on July 5, 2023, it is proposed to amend Section 29 of the directive such that all customers can be contacted by phone messages, including voice messages, without the need for an e-banking agreement, for notices on the following topics: (1) To encourage customers with a current account balance over a certain amount - to be determined by the banking corporation - to transfer funds held in the current account to more profitable interest-bearing channels or to channels that will reduce their total interest payments; (2) Assistance from the banking corporation to mortgage holders who are in financial difficulties or are likely to.

These directives regarding banking consumerism, and the drafts, if any, require making adjustments in the work processes, as needed.

The Bank is working to update these processes.

Initiatives for Increasing Competition

Further to the section entitled Legislation and Regulation Governing the Banking System in the Corporate Governance Report for 2022, following are details of directives in this area, which were published subsequent to the signing date of the annual report for 2022. These directives are expected to affect the Israeli banking system in the coming years.

The Economic Plan Law (Legislative Amendments for Implementing the Economic Policy for Budget Years 2023 and 2024), 2023

Under the law, which was published on June 7, 2023, the following amendments were made:

(1) It was determined that the directive in the Law for Promotion of Competition and Reduction of Concentration in the Banking Market (Legislative Amendments), 2017 that obliges a bank with a broad scope of activity that issues debit cards to limit the credit facilities of the credit cards it issued to its customers will be revoked after January 31, 2024. For additional information on this subject, please see the section entitled "Legislation and Regulation Governing the Banking System" in the Corporate Governance Report for 2022.

(2) It was determined that the directive in the Law for Promotion of Competition and Reduction of Concentration in the Banking market (Legislative Amendments), 2017, according to which a bank with a considerable scope of activity issuing debit cards may contact customers regarding renewal of their credit cards only within the 45-day period preceding the termination date of the credit card agreement (except in cases outlined in the directive), will be revoked after May 31, 2025.

(3) The Banking Law (Customer Service), 1981 was amended such that as of September 1, 2023, a banking corporation that refuses to open an account for a financial entity and for a payments company will provide a reasoned notice thereof to the Banking Supervision Department.

(4) The Banking Law (Customer Service), 1981 was amended determining that, starting from September 1, 2023, as part of an engagement agreement between the banking corporation and the customer to whom the debit card is issued, a provision will apply, according to which the banking corporation will allow a financial entity engaged in the operation of issuing debit cards issued by the banking corporation to request and obtain the customer's consent to

make use of customer information it has received in the execution of the issue or the operation of the issue, for the purpose of providing financial services to the customer. A banking corporation will not prevent the operating entity, by act or omission, to obtain the customer's consent.

(5) The Banking Law (Customer Service), 1981 was amended, requiring the banks to notify each customer, at the beginning of each calendar month, regarding the total amount of fees and commissions and interest collected by the bank from the customer in the previous month (such amounts that were collected for a housing loan will be detailed in a separate notice). The amendment will enter into effect: regarding fees and commissions - as from January 1, 2024, and regarding interest and housing loans - as from June 2, 2024.

(6) The Regulation of Payment Services and Payment Initiation Law, 2023 was published. The law covers two main issues: (a) Licensing of payment services - Regulation of payment services provided by non-bank entities, (b) Payment initiation - Regulation of payment initiation, including licensing aspects and consumer protection aspects of the initiation services. The regulation of payment services is intended to produce uniform requirements for entities engaged in the provision of payment services, to encourage competition in the field of payment services in Israel and to enable the entry of new players into the market. The law will enter into effect one year from its publication date, except for certain topics as detailed in Chapter L of the Law.

Notice of the Competition Commissioner regarding the possible determination that the five largest banking groups are a concentrated groups

On June 29, 2023, the Competition Authority announced that as part of a review it is carrying out with the banks, the Competition Commissioner has decided to initiate a consultation procedure with the Governor of the Bank of Israel and Banking Supervision Department (in accordance with the law) regarding the possible determination that the five largest banks constitute a concentration group and to provide them with guidance regarding deposits and the management of current account balances, as follows: (1) Prohibition on linking a deposit with the administration of other banking services; (2) Imposition of a requirement that the banks accept deposits from non-bank payments companies that request to act as "deposit aggregators"; (3) Reduction of barriers to the transfer of deposits separately from the rest of the banking basket ("separable" deposits); (4) Directives requiring the banks to present relevant comparative information to customers by "push".

The announcement clarified that the Commissioner's reviews have not yet been completed. To the extent that the Commissioner decides to declare a concentration group and issue guidance, a hearing will be held regarding the announcement and the guidance.

Proper Conduct of Banking Business Directive No. 473, Distribution of Credit Cards by Issuers Engaged with a Banking Corporation in a Distribution Agreement

Section 7F to the Banking Law (Service to Customers), 1981 prescribes that when a customer contacts a banking corporation in order to enter a credit card agreement therewith, or when a banking corporation contacts a customer proposing such an agreement, the banking corporation should distribute the credit cards of the issuers with whom it has engaged in a distribution agreement. The clause authorizes the Banking Supervision Department to prescribe provisions regarding the distribution agreement between the banking corporations and other issuers. In the directive date June 29, 2023, provisions were prescribed regarding the said credit card distribution processes, inter alia, on the following topics: (a) Manner of distribution; (b) The details which the banking corporation is required to provide to the customer; (c) Guidance regarding unreasonable refusal to engage in a distribution agreement with an issuer.

Memorandum of Law Money Funds (Legislative Amendments), 2023

On July 30, 2023, the memorandum of law was published, which proposes to amend the Joint Investment in Trust Law, 1994 and the Regulation of Investment Advice, Investment Marketing and Investment Portfolio Management Law, 1995, with the aim of enabling the launch of new money funds with characteristics more similar to financial deposits (low-risk fund, expected return estimated in advance and fixed dates). The distribution channels of these funds will be expanded such that they can be distributed not only by an investment advisor or an investment marketer, so as to increase their accessibility to the general public. Among other things, this will increase the competition in "money market" products (the market for short-term liquid products, up to one year, with low credit risk), and encourage the entry of new players into the investment brokerage domain.

Legislation

The Insolvency and Economic Rehabilitation Law (Amendment No. 4 - Temporary Order - Novel Coronavirus), 2023

Further to the details in the chapter Laws and Regulations Governing the Banking System in the Corporate Governance Report for 2022, Amendment 4 to the Law prescribes a dedicated track for handling debts of debtors (corporations and private individuals) hurt by the coronavirus crisis, which will allow debtors, among other things, to reach debt settlement agreements as an alternative to full insolvency proceedings. On March 21, 2023, the amendment's validity was extended by an additional 12 months, until March 17, 2024.

Additional Topics

Protection of Privacy Regulations (Instruction regarding Data Transferred to Israel from the European Economic Area), 2023

Further to the section entitled Legislation and Regulation Governing the Banking System in the Corporate Governance Report of 2022, the regulations which prescribe provisions regarding information provided to Israel from a member country of the European Economic Area, were published in the Official Gazette on May 7, 2023.

Credit Ratings

Following are the credit ratings and outlook of the State of Israel and the Bank as at August 14, 2023

	Fitch	A-(xgs)	Stable	F1 (xgs)
Local rating (in Israel)	S&P Maalot	AAA	Stable	A-1+
	Midroog	Aaa	Stable	P-1

Following is the development of the Bank's credit rating and credit outlook from January 1, 2023 to August 14, 2023

On February 1, 2023, credit rating agency Moody's reiterated the Bank's rating and rating outlook.

On May 2, 2023, the Fitch rating agency announced a change in the existing rating methodology for various banks around the world, including Israeli banks and Bank Leumi, in which, in addition to retaining the existing rating, a rating was added that takes into account a scenario where there is not state support to cover the public's deposits in a crisis.

On August 1, 2023, credit rating agency S&P reiterated the Bank's rating and rating outlook.

On August 2, 2023, credit rating agency S&P Maalot reiterated the Bank's rating and rating outlook.

Appendix 1 - Income and Expenditure Rates[a] and Analysis of Changes in Interest Income and Expenses

Comments:

(a) The data in the above tables are stated after the effect of derivatives instruments hedging.

(b) Based on monthly opening balances, except for the unlinked Israeli currency segment where the average balance is calculated according to daily inputs, and before deducting the average on-balance sheet loan loss provisions; foreign subsidiaries - based on quarterly opening balances.

(c) Before deducting the average balance of loan loss provisions. Including non-accrual debts.

(d) The average balance of unrealized gains/losses from fair value adjustments of held-for-trading bonds were deducted from/added to the average outstanding held-for-trading bonds and available-for-sale bonds, as were gains/losses in respect of available-for-trading bonds included in shareholder's equity under Accumulated other comprehensive income (loss), in the Adjustments in respect of presentation of available-for-sale securities at fair value item in respect of bonds transferred from the available-for-sale portfolio for the three- and six-month periods ended June 30, 2023, in the amount of NIS (3,418) million and NIS (3,469) million, respectively, and for the three- and six-month periods ended June 30, 2022 - NIS (1,343) million and NIS (361) million, respectively.

(e) Including book balances of derivatives, other non-interest-bearing assets, non-monetary assets, and less loan loss provision.

(f) Including book balances of derivative instruments and non-monetary liabilities.

(g) Net yield – net interest income divided by total interest-bearing assets.

(h) The change attributed to the quantity change was calculated by multiplying the new price by the change in quantity. The change attributed to the change in price was calculated by multiplying the former quantity by the new price.

(i) Fees and commissions for the three-month and six-month periods ended June 30, 2023 in the amount of NIS 102 million and NIS 199 million, respectively, were included in the interest income from loans to the public (fees and commissions for the three-month and six-month periods ended June 30, 2022 in the amount of NIS 119 million and NIS 253 million, respectively).

(j) Reclassified. During the first quarter of 2023, a change in classification was made between interest-bearing and non-interest-bearing deposits. For comparability reasons, the Bank made an immaterial adjustment to the comparative figures. The aforementioned had no effect on the Bank’s profit and loss and equity. For additional information, please see Note

Glossary of Terms

Term	Definition
A	
Actuarial Calculation	Any calculation that reflects uncertainties, i.e., is risk-adjusted. For example, an Actuarial Calculation reflects past experience and management's estimates as to the expected retirement dates of a bank's employees and the expected retirement benefits which are allocated on a linear basis over the expected service period.
Active Market	A market in which transactions in an asset or liability exist at a sufficient frequency and volume to provide information about pricing on an ongoing basis.
Actuarial Gain/Loss	Mostly reflects adjustments in respect of actuarial estimates, as at the end of the year, of defined benefit pension plans and a deduction of amounts previously recorded in other comprehensive income.
Asset and Liability Management (ALM)	Management of the Bank's assets and liabilities with the aim of avoiding a mismatch between the two and, in the long-term, increasing the Bank's capital for the benefit of its shareholders.
Asset-Backed Securities (ABSs)	A security whose interest and principal payments are collateralized or pledged by a specific financial asset.
Auxiliary Corporation	A corporation which is not in itself a bank and whose activities are limited to the fields of activity permitted to the bank controlling it, except activities reserved exclusively for corporations defined as banks under law.
Average Duration (AD)	Average duration is measured in years and weights the periodic interest payments of the financial instrument over its life until final redemption.
B	
Balanced Score Card (BSC)	A performance metric used for measuring the performance of the Bank and its business lines on a number of quantitative and qualitative issues defined by Bank's management in its strategic plan.
Basel II/Basel III	Banks' risk management directives set by the Basel Committee on Banking Supervision (BCBS), which is the primary supervision and global standard setter for prudential regulation and supervision of banks. The BCBS's directives serve as the benchmark for leading standards designed to ensure the stability of financial institutions.
Basic Earnings per Share	Basic earnings per share will be calculated by dividing the profit or loss attributed to holders of the parent company's ordinary shares (the numerator) by the weighted average number of ordinary shares outstanding during the period (the denominator).
Basis Point (BP)	1/100th of 1 percent; BP is used as a common unit of measure for interest rates.

Basis Risks	Basis Risk is the potential loss as a result of changes in the consumer price index and exchange rates due to the difference between the value of assets and the value of liabilities, including the impact of future transactions in each of the linkage bases.
Benchmark Interest Rate	Interest determined on an external objective basis according to a pre-set formula, i.e., the bank plays no direct role in setting it.
Bid-Ask Spread	The difference between the offered purchase price and selling price. This is, in fact, the difference between the highest price a buyer is willing to pay for an asset and the lowest price in which a seller is willing to sell it.
Build Operate Transfer (BOT)	A model used to finance public projects whereby a public entity grants a concession to a private company to finance, plan, build and operate a public facility for a fixed period of time, at the end of which control of the facility is transferred to the government.
C	
Capital Adequacy Ratio	The ratio between the Bank's qualifying Regulatory Capital and its risk-weighted assets (the Bank's assets weighted to reflect credit, market and operational risks), calculated in accordance with the Bank of Israel's directives and to reflect the risk associated with exposures undertaken by the Bank during the course of its activities.
Collateralized Debt Obligation (CDO)	A bond backed by a portfolio of bonds and/or loans of various seniority levels and ratings.
Collateralized Loan Obligation (CLO)	A bond backed by a loans portfolio.
Collective Provision	A Collective Provision for Loan losses is applied to large groups of relatively small and homogeneous debts and to debts that were reviewed specifically and were found to be non-performing. The Collective Provision in respect of the off-balance sheet instruments is based on provision rates that were set for on-balance sheet loans, while taking into account the Bank's estimates regarding the probability of utilizing the various off-balance-sheet items.
Common Equity Tier 1 Capital	Going Concern Capital Common Equity Tier 1 (CET1) Capital includes the equity attributed to a bank's shareholders, with the addition of some of the non-controlling interests (minority interests) of consolidated subsidiaries less goodwill, other intangible assets and regulatory adjustments and additional deductions, pursuant to Proper Conduct of Banking Business Directive No. 202, "Measurement and Capital Adequacy – Regulatory Capital" and pursuant to the transitional provisions of Proper Conduct of Banking Business Directive No. 299, "Measurement and Capital Adequacy – Regulatory Capital – Transitional Provisions".

Conduct Risk	Conduct Risk is the risk that any dealings with Bank's customers which are not fair, transparent and aimed to meet their needs will lead to losses due to legal damages, fines or reputational damage.
Committee Of Sponsoring Organizations of the Treadway Commission (COSO)	A structured internal controls model. The model is intended to assist businesses and other entities to assess, estimate and enhance their internal control functions.
Cost of Interest	The interest component allocated to a current year and classified into payroll expenses.
Cost of Service	All components of employee benefits costs allocated to a specific period.
Credit Default Swap (CDS)	A financial instrument that transfers the credit exposure between parties to a transaction to the issuing entity.
Credit Derivative	A contract that transfers the credit risk from a buyer to a seller. There are various forms of Credit Derivatives: Credit Default Swap (CDS), a note for partial cover of credit risk, Total Return Swap (TRS), etc...
Credit Valuation Adjustment (CVA)	The calculation of credit risk in derivatives reflects the expected loss to the bank in case the counterparty to the transaction will default.
Credit Risk	Credit risk is the Bank's risk of loss as a result of the possibility that a borrower or counterparty fails to meet its agreed commitments towards the bank.
Cross Border Activity	A term referring to various cross-border financing arrangements, such as cross border loans, letters of credit or bankers' acceptances.
Current Expected Credit Losses (CECL)	A model for expected credit losses.
Cyber Event	An event during which the Bank's IT and/or computer-embedded systems and infrastructures are attacked by, or on behalf of, opponents (whether external or internal to the bank) and such attack may result in the materialization of the cyber risk, including an attempted attack even if it did not result in actual damage.
D	
Defined Benefit Plan	Fixed and predetermined pension or insurance amounts which are paid to eligible employees, whether or not they depend on the investment results of the pension fund or insurer.

Delinquent Debt	The delinquency (arrears) status of a debt is determined according to its contractual repayment terms. The debt is in arrears if some or all of the debt amount has not been repaid within 30 days of its due date. For this purpose, a debt in a current account in excess of the authorized credit facility will be regarded as being in arrears if not repaid within 30 days, or if that account is not credited with sums sufficient to cover the debt under the credit facility within the period determined by the Bank's management.
Diluted Earnings Per Share	Dividing the profit or loss attributed to holders of the parent company by the weighted average number of ordinary shares outstanding, to assume conversion of all potentially dilutive ordinary shares.
Dodd Frank Wall Street Reform and Consumer Protection Act (DFA)	The DFA is a U.S. federal law which came into force on July 28 2019. The DFA sets in motion a comprehensive financial reform which has various implications for the Leumi Group, the principal of which is associated with transactions involving over-the-counter derivative swaps.
E	
Embedded Derivatives	Embedded Derivatives are derivative instruments which are embedded into other financial contracts and instruments or into commercial contracts for the purchase or sale of products and services (these contracts are known as host contracts). The accounting treatment is applied according to the economic substance of the items and transactions, rather than according to their legal form; therefore, embedded derivatives whose economic characteristics are not clearly and closely related to those of the host contract are bifurcated therefrom for the purpose of measurement in the Bank's books of accounts.
European Market Infrastructure Regulation (EMIR)	A regulation of the European Union which is intended to enhance the stability of over-the-counter markets in all EU countries.
Exposure at Default (EAD)	The expected amount of counterparty exposure in case of credit default.
F	
Fair Value	The amount for which an asset can be exchanged or a liability assumed in a transaction between knowledgeable, willing parties. This value is determined according to the fair value hierarchy set in accounting standards: • Level 1 – Value based on quoted market prices; • Level 2 – Estimated value based on observable inputs; • Level 3 – Estimated value determined by using valuation techniques that include unobservable inputs.

Fannie Mae (FNMA)	A U.S. government-sponsored enterprise which purchases and securitizes mortgages and sells them on the free market. (The company is not backed by the U.S. government).
Federal Deposit Insurance Corporation (FDIC)	An independent federal agency insuring deposits in U.S. banks; FDIC is one of the U.S.'s banking supervisory bodies.
Foreign Accounts Tax Compliance Act (FATCA)	A U.S. tax law intended to improve tax enforcement. Pursuant to FATCA, non-U.S. financial entities must disclose to the U.S. Internal Revenue Service information about accounts held by them for anyone who is required to report under FATCA, even if he/she is not a U.S. resident.
Forwards	Forwards are contracts between two parties for the sale of a specified quantity of an asset at a particular price on a stipulated future date (the settlement date). Such contracts are binding on both parties to the agreement. Forwards are not standard contracts and are not traded on capital markets, but are drawn up specifically according to the parties' needs.
Freddie Mac (FHLMC)	FHLMC is a U.S. government-sponsored agency that purchases and securitizes mortgages and sells them to the public. (The company is not backed by the U.S. government).
Futures	Futures are contracts between two parties for the sale of a specified quantity of an asset at a particular price on a stipulated future date (the settlement date). Such contracts are binding on both parties to the agreement. Futures are standard contracts traded on capital markets.
G	
Ginnie Mae (GNMA)	A federal mortgage company. The bonds issued by GNMA are backed by the Government National Mortgage Association.
I	
Indebtedness	The Bank's loan exposures to a borrower or group of borrowers, including loans under the bank's responsibility, the bank's investments in the borrower's securities, commitments of the bank to pay money on a customer's behalf (including guarantees and Documentary Credit) and transactions in over the counter (OTC) derivatives. Indebtedness is calculated according to the provisions of Proper Conduct of Banking Business Directive No. 313 of the Banking Supervision Department.
Interest Rate Risk	The risk of loss or impairment as a result of changes in interest rates across various currencies.

Internal Capital Adequacy Assessment Process (ICAAP)	The capital adequacy assessment process is aimed at calculating the capital required to support the various risks to which the Group is exposed in order to ensure that the Group's effective capital exceeds the capital requirements at any time.
Internal Rate of Return (IRR)	A measure used to estimate the profitability of potential investments. This metric is an indicator of the efficiency and quality of a specific investment in relation to the net present value, which is an indicator of the value and size of the investment. The Internal Rate of Return is the interest rate that discounts the expected cash flow from a financial instrument to its balance in the Bank's balance sheet.
L	
Leverage Ratio	Defined as the measured capital (the numerator) divided by the measured exposure (the denominator), with the ratio expressed as a percentage.
Linkage Base and Exchange Rate Exposure	The exposure to the basis risk is the potential loss as a result of changes in the consumer price index and exchange rates due to the difference between the value of assets and the value of liabilities, including the impact of future transactions in each of the linkage bases. The exposure to basis risks is measured as a percentage of the Group's exposed capital. At the Bank level, the exposed capital includes common equity and certain provisions, net of property, plant and equipment and investments in investees.
Liquidity Coverage Ratio	Liquidity Coverage Ratio examines a time-horizon of 30 days under a stress scenario, and is intended to ensure that a bank has an inventory of high-quality liquid assets that is able to cover the corporation's liquidity requirements in this time horizon.
Liquidity Risk	Liquidity Risk is the risk arising from uncertainty regarding the possibility of raising resources and/or disposing of assets, unexpectedly and within a very short time, without incurring a substantial loss.
Loan-to-Value (LTV) Ratio	The ratio of a bank loan to the value of a purchased asset. LTV reflects one aspect of the loan risk; a higher LTV reflects a higher risk to the lending bank.
Loss Given Default (LGD)	This is the percentage out of a borrower's total Exposure at Default (EAD), which the Bank is expected to lose on default.
M	
Market Risks	Market Risk is defined as the risk of loss in balance sheet and off-balance sheet positions as a result of a change in the fair value of a financial instrument due to change in market conditions (i.e., changes in: price levels in various markets; interest rate volatility; foreign exchange rates; inflation rates; share and commodity prices, as well as in other economic measures).

Mortgage-Backed Securities (MBS)	Bonds which are backed by financial assets, the principal and interest payments of which are based on a cash flow from repayment of loans collateralized by financial assets. The collateral assets may be pools of loans, including housing mortgages or other financial assets.
N	Impaired non-accruing loans.
Net Interest Margin (NIM)	Ratio between net interest income and the average balance of interest-bearing assets.
Net Stable Funding Ratio (NSFR)	The purpose of NSFR is to improve the long-term liquidity ratio profile of banking corporations by requiring them to maintain a stable funding ratio according to the composition of their assets and off-balance-sheet activities. The ratio limits banking corporations' over-relyance on wholesale short-term financing. Measurement - both for consolidated and separate reporting purposes - is made each quarter and the requirement is to comply with a 100 percent rate.
Non-Performing Credit	On-balance sheet credit that is assessed on a case by case basis and which - based on present circumstances and information - it is probable that the Bank will be unable to collect the full amounts payable (principal plus interest) under the contractual terms of the debt agreement. A debt which is assessed on a case by case basis shall be classified as non-performing whenever the principal or interest has been past due for a period of 90 consecutive days or more, unless it is both well secured and in the process of collection. Off-balance sheet credit is classified as non-performing if it is at least reasonably possible that the contingent liability in respect of the off-balance sheet item will materialize, and if the debts that may result from the materialization of the contingent liability should be classified into this category. Furthermore, a non-performing debt which is assessed on a specific basis and whose terms were changed due to restructuring of a troubled debt will also be considered as non-performing loans.
Non-Performing Loan (NPL)	Non-accrual troubled debt.
O	
OECD	An international organization whose members are developed countries that accept the principles of liberal democracy and free market. The organization is a platform for discussing policy, benchmarking, identifying solutions to difficulties and drawing up codes, guiding principles and shared standards for the implementation of domestic economic and social policies. Each member state can make a significant contribution to the organization’s policy and development of shared policies.

Off-Balance Sheet Exposures	These exposures arise from the Bank's undertakings to its borrowers that have not yet been realized/utilized by the borrowers as of the reporting date and therefore have not yet been recorded as a balance sheet asset or liability. Such exposures include, among other things: Unutilized undertakings to extend loans; • Unutilized credit facilities; • Undertakings pursuant to guarantee agreements; • Undertakings pursuant to an approval in principle where the Bank is committed to maintain the interest rate over a certain period, • and more.
On-call Credit	Loan granted for several days and repaid on call, in accordance with the conditions of the agreement between the Bank and the customer.
Operational Risk	Operational Risk is the risk of loss as a result of inadequate, or failure of, internal processes, people and systems, or external events. This definition includes legal risk, but does not include strategic risk and reputational risk.
Option Contract/Option	There are two types of Option Contracts: an option to buy (call option) or an option to sell (put option). A call option is the right to buy a specified asset at an agreed price (strike price) up to (American-style option) or on (European-style option) a stipulated date. A put option is the right to sell a specified asset at an agreed price (strike price) up to (American-style option) or at (European-style option) a stipulated date.
P	
Performance Stock Units (PSU)	Performance Stock Unit awards are restricted shares and depend on the bank's future performance.
Pillar 1	The allocation of minimum capital against credit, market and operational risks, using a method that correlates the scope of exposure to the various risks and Regulatory Capital requirement. The Pillar 1 Directives set by BCBS were adopted as part of Proper Conduct of Banking Business Directives No. 201 to No. 209; these directives set a supervisory method for calculation of risk-weighted assets and calculation of the capital requirements in respect of such risk-weighted assets.

Private Individuals	Persons who are not corporations (whether registered or non-registered) and who are not engaged in business activity. According to the directives of the Bank of Israel, private persons are defined such that this category includes non-business loans to individuals who are classified into the private individuals sector according to uniform definitions of the Central Bureau of Statistics including households and private banking.
Probability of Default (PD)	A financial term describing the likelihood of borrower default within a given period of time from the date on which rating is issued. It provides an estimate of the likelihood that a borrower will be unable to meet its contractual debt obligations.
R	
Regulatory Capital	Capital used to calculate the Bank's capital adequacy ratio and other regulatory ratios (such as: leverage ratio, credit concentration and more). Accounting capital components and other qualifying Regulatory Capital instruments (such as subordinated notes that qualify as Regulatory Capital).
Repurchase Agreement or Reverse Repurchase Agreement	These repo agreements are agreements for the purchase or sale of securities in consideration for cash or securities; when entering into these agreements, the seller and the buyer agree to enter into a reverse transaction at a predetermined date and price.
Reputational Risk	The risk that the publication or public disclosure of a customer-related transaction or practice, as well as the Group's business results and events relating thereto will have an adverse effect on the public's trust in the Group or reduce its customer base or that the Group will incur high legal costs or that its revenues will decline.
Residual Risk	Residual Risk is the risk of loss remaining after all other specific risks have been factored in. For example: when a person purchases an asset, he is exposed to various risks. Many of these risks are not unique to the purchased asset, but rather reflect broader scenarios, such as increase or decrease in share prices, increase or decrease in interest rates or change in growth rate of a specific economy or industry. The exposure to this risk can be reduced by diversification.
Restricted Share Units (RSUs)	An ordinary share whose issuance terms restrict its tradability over a certain period or until the occurrence of a certain event where the period has not yet elapsed and/or the event has not yet occurred.
Restructuring of Troubled Debt	A debt, for which the Bank, whether for economic or legal reasons related to financial difficulties of the borrower, grants the borrower a waiver by changing the terms of the debt, in order to enable the borrower to repay the cash payments in the short term or by accepting other assets as debt repayment.

Return on Equity	Net income less dividend for preferred shares which was not recorded as an expense in profit or loss and was declared in the reported period only, divided by the average common equity.
Rate of Return on Equity (ROE)	The ratio between a business's return (net income) and its common equity. This rate measures the Bank's ability to generate profit from its net assets and illustrates how efficiently the Bank operates to utilize further investments in order to increase its revenues. Return on Equity in banks is reflected in the following ratios: • Net income attributed to bank's shareholders net of dividend distributed in respect of preferred shares which was not recorded as an expense in profit or loss and was declared during the reporting period, divided by the average common equity; • Net income attributed to bank's shareholders net of dividend distributed to preferred shares which was not recorded as an expense in the income statement and was declared during the reporting period, divided by the average common equity net of average balance of preferred shares that were included in common equity.
Return on Risk-Adjusted Capital (RORAC)	A Rate of Return measure used to compare returns on various investments taking into account the risk. Actual return is adjusted by measuring the asset's exposure to risk and curtails the return on higher-risk assets. The method's effectiveness depends on the accuracy of the risk associated with different assets and on the extent to which the "sanction" imposed on higher-risk assets does, indeed, reflect each investor's risk aversion. Risk assessment of new types of assets, such as financial derivatives, involves high levels of uncertainty due to the actual behavior of their prices.
Risk-Weighted Assets (RWA) or Risk Assets	Risk-Weighted Assets reflect balance sheet and off-balance sheet exposures arising from the Bank's activities and weighted by their level of credit, market and operational risk according to Proper Conduct of Banking Business Directives No. 203 to No. 209. Such Risk Assets are designed to reflect the weighted risk in respect of which the Bank is required to comply with the Regulatory Capital Requirement as part of the Capital Adequacy requirements.
S	
Securitization	A process whereby bank loans and credit are pooled to create a long-term loan through bonds.

Securitization Structures	Structures created in order to transfer cash flows from other instruments or assets to bondholders, for which a Special-Purpose Entity (SPE) is set up that pools the underlying cash flow-generating assets that are transferred by the originator and forwards the cash-flows to the bondholders according to a structure agreed upon with the bondholders in accordance with the seniority of the different series of bonds (tranches). Such assignment of rights creates a legal structure in which the assets of the transferring entity will not be accessible to creditors of the SPE and the creditors will not be exposed to the risks associated with other activities of the transferring entity. The sole function of the SPE is to receive the said cash flows and transfer them to the bondholders.
Small Business Administration (SBA)	A U.S. government agency that supports small businesses in the U.S.A.
Special Mention Loan	Loan under Special Supervision is credit for which there are potential weaknesses which should be monitored closely by the Bank's management. Off-balance sheet loan is classified as loan under special supervision if the materialization of the contingent liability in respect of the item is defined as "reasonably possible" and if the debts that may be recognized as a result of the materialization of the contingent liability meet the criteria for classification into this category.
Standby Letter of Credit (SBLC)	A Standby Letter of Credit is a bank guarantee in the format of a commercial letter of credit, whose main goal is to secure a payment. A Standby Letter of Credit is similar to a guarantee in the sense that it constitutes an undertaking by the Bank to pay the amount specified therein against a payment demand by the beneficiary, whereas in the case of a commercial letter of credit one is required to present various documents in order to secure the payment by the Bank in respect of the guarantee.
Specific Provision	A provision that is determined specifically for each debt, excluding housing loans (including any restructuring of troubled debt subject to specific assessment according to the Bank’s policy). The provision amount is estimated according to the projected cash flows which are discounted at the debt’s original effective interest rate or, when the debt is defined as a debt whose collection is contingent on collateral or when an asset is expected to be seized - according to the fair value of the collateral net of disposal costs and after appropriate cushions are utilized. In order to determine the appropriate provision, the Bank assesses the relevant borrowers on an ongoing basis and according to procedure.

Strategic Risk	A business risk that includes current and future adverse effects on capital, profits, reputation or standing as a result of erroneous business decisions, inappropriate implementation of the decisions or lack of response to industry-specific, economic, regulatory and technological changes.
Subordinated Notes	Bonds the interests in which are subordinate to the claims of all other creditors of the bank, excluding other bonds of the same type.
Substandard Loan	A loan which is insufficiently guaranteed by the current sound worth and repayment capacity of a borrower or a pledged collateral, if any. Balance sheet credit risk that has been classified in this manner should have a well-defined weakness or weaknesses, which jeopardize the repayment of the debt. Loan, in respect of which a collective loan loss provision is recorded, shall be classified as a Substandard Loan when it has been past due for 90 days or more.
Supervisory Review Process (SREP)	The processes intended to ensure that banks have adequate capital to support all the risks associated with their business and also to encourage banks to develop and use better risk management techniques in monitoring and managing their risks. As part of the process, the Banking Supervision Department assesses a bank's risk profile and its internal process for assessing the adequacy of the regulatory capital it maintains against the exposures. This process is designed to provide regulators with tools for independent assessment of the Bank's risk profile and risk management and to enable early intervention in order to prevent compromising the Bank's financial stability.
Swap	A series of forward contracts or a series of futures contracts for several stipulated periods in which two parties agree to exchange cash flows on a notional amount.
Syndication	A transaction in which several lenders share extending a loan to a single borrower, but each borrower extends a loan at a certain amount to a borrower and has the right to be repaid by that borrower. Often, groups of lenders finance such loans together, with the amount extended greater than any single lender is willing to lend.
Synthetic Collateralized Debt Obligation (SCDO)	An agreement backed by a portfolio of (derivative) collateralized debt securities of various seniority levels.
T	
The Economic Capital Model	The Bank uses the Economic Capital Model, which is based on the borrowers' rating, in order to assess the overall credit risk of the entire loan portfolio and portions thereof.

Tier 2 Capital	A tier of capital included in the calculation of qualifying regulatory capital. Tier 2 capital (also known as "gone concern capital") is a substandard component of the Bank's capital; it mainly comprises qualifying instruments previously issued by the Bank and included in Tier 2 capital pursuant to the transitional provisions for the implementation of Basel III Directives as well as the new qualifying capital instruments that constitute the Bank's Contingent Convertible (CoCo) capital instruments issued by the Bank and which will be converted into the Bank's shares if the Bank reaches the point of non-viability. In addition, this Tier 2 capital also includes items, such as: a collective loan loss provision before the relating tax effect up to a ceiling of 1.25 percent of total credit risk assets
Total Indebtedness	A customers' total debts to the bank.
Treasury Shares	Shares directly held by the company. These shares do not have equity or voting rights.
V	
Value at Risk (VaR)	A model for measuring the maximum potential loss as a result of market risks materialization in a set time period and given a predetermined statistical probability. This method requires the revaluation of all of the corporation's positions based on the fair value of the assets and liabilities. The model's objectives are to estimate the risks to which financial institutions are exposed, stemming from materialization of market risks in various activities.
